

ANNOUNCEMENT OF FEDERAL FUNDING OPPORTUNITY

EXECUTIVE SUMMARY

Federal Agency Name(s): National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Department of Commerce

Funding Opportunity Title: 2011 Pacific Islands Region Marine Turtle Program

Announcement Type: Initial

Funding Opportunity Number: NOAA-NMFS-PIRO-2011-2002875

Catalog of Federal Domestic Assistance (CFDA) Number: 11.454, Unallied Management Projects

Dates: Proposals must be received by the Pacific Islands Regional Office (PIRO) by 5:00 p.m. Hawaii Standard Time, February 14, 2011. Proposals received after the established deadline will be rejected and returned to the sender without consideration. For proposals submitted through Grants.gov, a date and time receipt indication will be the basis of determining timeliness. Proposals must be validated by Grants.gov in order to be considered timely. For those without access to the internet, one signed original and two hard copy applications must be received by the established due date for the program at the following address: NOAA Federal Program Officer for the Pacific Islands Region Marine Turtle Program, Pacific Islands Regional Office, National Marine Fisheries Service, 1601 Kapiolani Boulevard, Suite 1110, Honolulu, Hawaii 96814. Use of U.S. mail or another delivery service must be documented with a receipt. No facsimile and electronic mail proposals will be accepted.

Funding Opportunity Description: NOAA's National Marine Fisheries Service (NOAA/NMFS) is soliciting proposals for the 2011 Pacific Islands Region Marine Turtle Program that will support specific programmatic activities for conservation, protection, or management of listed sea turtle species either occurring within the Pacific Islands Region (PIR) or those that have documented linkages to the PIR, such as turtles that may originate from areas outside U.S. jurisdiction but migrate through or forage within the PIR or may interact with PIR fisheries managed by NOAA/NMFS.

The PIR is comprised of the exclusive economic zones (EEZs) adjacent to the State of Hawaii, U.S. territories of American Samoa, Guam, and the Commonwealth of the Northern Mariana Islands (CNMI), and the U.S. Pacific Remote Island Areas (PRIAs) of Jarvis, Johnston, Wake, Howland and Baker Islands, Kingman Reef, and Palmyra and Midway Atolls. Sea turtle species occurring in the PIR include: leatherback (*Dermochelys coriacea*), hawksbill (*Eretmochelys imbricata*) loggerhead (*Caretta caretta*), green (*Chelonia mydas*), and olive ridley (*Lepidochelys olivacea*).

FULL ANNOUNCEMENT TEXT

I. Funding Opportunity Description

A. Program Objective

NOAA/NMFS is soliciting competitive proposals for grants and cooperative agreements that will support specific programmatic activities for the conservation, protection, or management of listed sea turtle species either occurring within the PIR or with sea turtle populations that have documented linkages to the PIR. Total funding available under this notice is anticipated to be approximately \$750,000. Actual funding for this program is contingent upon FY 2011 Congressional appropriations. Applicants will be selected by NOAA/NMFS on a competitive basis.

B. Program Priorities

Priority will be given to projects that support activities for the conservation, protection, or management of listed sea turtle species, with highest ranking priority to projects designed to reduce mortality and increase survivorship and/or collect necessary baseline information on previously unstudied marine turtle aggregations. Community-based integrated programs with an educational component intended to elevate public awareness and build capacity for turtle conservation and stewardship at the community level are strongly encouraged. Projects that have linkages to greater ecosystem studies or protected area networks are encouraged.

All proposals should be able to clearly identify how proposed activities relate to recovery criteria and priorities listed in U.S. Sea Turtle Recovery Plans. International projects must clearly articulate the linkage of turtle stocks to the PIR. Projects with objectives to "reduce" or "eliminate" certain impacts should be able to incorporate metrics of performance to help evaluate project success. Single year projects that can attain measured and significant results in one fiscal calendar year are highly encouraged (such as, for example, mitigation of lighting impacts at nesting beaches). However, multi-year proposals that show programmatic growth and development over time will not be discounted and may be considered (funding dependent).

Applicants should ensure that proposals address one or more of the stated priorities, which are listed in order of preference and evaluation ranking (i.e., activities in #1 carry higher evaluation ranking priority than #2 or 3). If a project meets more than one of these priorities, the applicant should list first the priority that most closely reflects the objectives of the proposed project.

1. Projects to reduce mortality and increase survivorship. Such projects may focus on the following: reduction/elimination of illegal harvest; reduction and/or mitigation of fishery bycatch; reduction and/or mitigation of negative impacts at nesting beaches (e.g., predation, erosion/inundation, low hatch success, coastal development) or foraging habitats (e.g., boat collisions, marine development); education/outreach and public awareness raising initiatives to encourage community stewardship; and strengthening of legislation designed to protect turtles.

2. Projects to collect necessary demographic information for Pacific marine turtles to better inform management of sea turtle stocks. Such projects may include, for example, aerial surveys, volunteer networks (including stranding networks), rapid assessments, or standardized monitoring in terrestrial or marine habitats to contribute to or bolster NOAA/NMFS existing studies of regional connectivity, habitat use, and population assessments.

3. Projects to build capacity for in-country programs. Such projects may include the following: development of locally relevant research and management plans, locally-based stakeholder meetings to progress conservation or management actions, economic studies for management planning; or exchange programs of persons with technical expertise to build local capacity to progress research and/or management objectives.

C. Program Authority

16 U.S.C. §661

II. Award Information

A. Funding Availability

Total funding available under this notice is anticipated to be approximately \$750,000. Actual funding availability for this program is contingent upon FY 2011 Federal appropriations. Award amounts will be determined by the proposals and available funds. There is no limit on the number of applications that can be submitted by the same applicant; however, multiple applications submitted by the same applicant must clearly identify different projects. If an application for a financial assistance award is selected for funding, NOAA/NMFS has no obligation to provide any additional funding in connection with that award in subsequent years. Pre-award costs are not allowed under the award unless approved by the NOAA Grants Officer.

B. Project/Award Period

The project budget period is recommended to be 3-12 months in duration. May 1, 2011 should be used as the proposed start date, unless otherwise directed by the Program Officer.

Where requested in the applicant's proposal and deemed reasonable by NOAA, a project may be approved for an extension to the award period. If an application is selected for initial funding, NOAA/NMFS has no obligation to provide additional funding in connection with that award in subsequent years.

C. Type of Funding Instrument

Under this solicitation, NOAA/NMFS will fund the projects under the 2011 Pacific Islands Region Marine Turtle Program as grants and/or cooperative agreements. The NOAA/NMFS Pacific Islands Regional Office may be substantially involved in the issuance of cooperative agreements. This may include but is not limited to partnering in collaborative efforts, re-directing activities to meet regional interests, and/or assisting in the development of educational materials.

III. Eligibility Information

A. Eligible Applicants

Eligible applicants are individuals, institutions of higher education, nonprofits, commercial organizations, state, local and Indian tribal governments. Federal agencies, or employees of Federal agencies, are not eligible to apply.

The Department of Commerce/National Oceanic and Atmospheric Administration (DOC/NOAA) is strongly committed to broadening the participation of historically black colleges and universities, Hispanic serving institutions, tribal colleges and universities, and institutions that work in underserved areas. The 2011 Pacific Islands Region Marine Turtle Program encourages proposals involving any of the above institutions.

B. Cost Sharing or Matching Requirement

No cost sharing or matching is required under this program.

C. Other Criteria that Affect Eligibility

If relevant, any necessary research permits, authorizations or letters of endorsement to handle sea turtles or undertake all proposed activities are required. This documentation should either be submitted with the proposal (space permitting, see below) or referenced as immediately available upon request (if space does not allow). Any projects that include turtle capture and handling will be required to collect genetic samples for regional connectivity studies currently supported by NOAA Fisheries Service; applicants must therefore demonstrate possession of active CITES export permits or the capacity to acquire them.

IV. Application and Submission Information

A. Address to Request Application Package

Applications are available through the Grants.gov website at <http://www.grants.gov> . For organizations without internet access, application materials and instructions may be obtained from Ms. Tia Brown, NOAA Federal Program Officer, Pacific Islands Regional Office, 1601 Kapiolani Blvd., Suite 1110, Honolulu, Hawaii, 96814.

B. Content and Form of Application

NOAA employees (whether full-time, part-time, or intermittent) are not permitted to assist in the preparation of an application, except that staff may provide information on program goals, funding priorities, application procedures, and completion of application forms. Since this is a competitive program, NOAA employees will not provide assistance in conceptualizing, developing, or structuring proposals, or write letters of support for a proposal.

Eligible nonprofit organizations that have not previously received NOAA funding support must submit proof of their non-profit status with the application in the form of one of the following:

1. A reference to the applicant in the Internal Revenue Service's most recent list of tax-exempt organizations under Section 501(c) of the IRS Code;
2. A copy of a currently valid IRS tax exemption certificate on which the applicant is named;
3. A statement from a state taxing authority or state's attorney general certifying that the applicant has non-profit status and that none of the net earnings accrue to any private shareholder;
4. A certified copy of the organization's certificate of incorporation or similar document that clearly establishes nonprofit status; or
5. Any of the above proof regarding a parent organization, if one exists, and a statement signed by the parent organization that the applicant is a local nonprofit affiliate.

Applications must adhere to all provisions set forth below. Failure to do so will result in the application being returned without review.

Proposals must include a project narrative giving detail on the proposed work to be performed by the recipient, how it plans to accomplish such tasks, and its related benefits and monetary costs. Proposals may not exceed 10 pages of double-spaced, white 8-1/2" x 11" paper exclusive of the required Application for Federal Assistance forms and

documentation described below. A minimum 12-point font size is required. Tables and visual materials, including charts, graphs, maps, photographs, and other pictorial presentations are not included in this 10-page limitation. Abbreviated CVs or resumes should be appended to each application; appended material must not exceed a total of 25 pages in length and can include any letters of endorsement, an indirect cost rate agreement, permit information, or any other supporting information. All information needed for a comprehensive review of the proposal should be found in the project narrative and required federal financial assistance application forms described below. The edition of the forms contained at the Grants.gov website or provided by NOAA in response to a request for hard copy must be used.

The following forms are required as part of each application: Application for Federal Assistance (SF-424); Budget Information, Non-Construction Programs (SF-424A); Assurances, Non-Construction Programs (SF-424B); Certification Regarding Lobbying (CD-511); and, if applicable, Disclosure of Lobbying Activities (SF-LLL). These forms are available for download from the NOAA Grants Online application package.

Proposals must include the following information:

1. Title Page

This page should provide project title, project duration, applicant name(s), name(s) of the Principal Investigator (or Project Manager) and any Co-Investigators (or Co-Managers), complete contact information (address, telephone, fax, email, and phone number) of the applicant(s), and a statement regarding the Federal, non-Federal, and total costs of the project.

2. Project Summary

Provide a brief summary of project goals and objectives, proposed activities, geographic area where project activities would occur, and expected outcomes and benefits of proposed activities. This summary may be posted on our website if the project is funded.

3. Project Description

Each project must be completely and accurately described. The main body of the proposal should be a clear statement of work to be undertaken including: information that demonstrates the need for the project; specific goals and objectives; descriptions of methodologies and time-lines for all phases of work; performance measures for the period of proposed work and expected results or outcomes; and, if applicable, relationship of the project to additional work that is ongoing, planned, anticipated, or underway through Federal Assistance or funded by other means. Multi-year applications must include all the above information for each year of the proposed activity. Each project should therefore be

described as follows:

(a) Background: Provide any relevant background information regarding species, habitat, geographic area, community, or situation being addressed by the proposed project. This section should describe the problem being addressed and why action is necessary to address it. International projects must also clearly articulate the linkage of turtle stocks to the PIR.

(b) Project goals and objectives: Identify the project goals designed to address the problem described in the previous section. Objectives intended to achieve each project goal should be articulated in simple, understandable terms and should be as specific and quantitative as possible. Objectives should be attainable within timeframe, budgetary and human resource considerations. This section should also describe how project objectives relate to recovery criteria and priorities in the U.S. Sea Turtle Recovery Plans.

(c) Project narrative: The project narrative is the technical or scientific plan of activities that are to be accomplished during each budget period of the project. It should include detailed descriptions of specific methods that will be employed. Project milestones and timelines (e.g. the number of months) to meet them should be established.

(d) Benefits or results expected: Identify the type of results and expected outcomes anticipated upon project completion and how they will benefit the species. Describe how the achievement of these outcomes will be evaluated for success and how outcomes or products will be applied to future action or made available to appropriate user groups.

(e) Need for Government financial assistance: Demonstrate the need for government financial assistance. List all other sources of funding that are or have been sought for the project.

(f) Federal, State and local government activities: List any plans or activities (Federal, State, or local government activities) this project would affect and describe the relationship between the proposed project and those plans or activities.

(g) Project management: Describe how the project will be organized and managed and who will be responsible for carrying out project activities. The lead organization/individual and person listed as the technical contact should be identified as the Project Manager (PM) or Principal Investigator (PI). Use of sub-contractors or volunteer staff time to complete project activities and oversight of those individuals should be discussed. The PM/PI is responsible for all technical oversight and implementation of the approved work plan as delineated in the proposal. One PM or PI must be designated on each project, but the PM/PI may or may not be the applicant. However, if the applicant is not the PM/PI, there must be an explanation of the relationship between the applicant and PM/PI (e.g., applicant will be responsible for managing the grant funds and the PM will be

responsible for completing the project milestones on time and within budget, etc.). Project participants or organizations that will have a significant role in conducting the project should be listed as Co-investigators or Co-Managers. Organizations or individuals that support the project, for example, researchers contributing data or materials, should be referred to as Cooperators. Copies of the PM's or PI's and all Co-investigator's/Co-Manager's current resumes or curricula vitae must be included as appendices.

4. Total project costs and budget justification

Each application must include clear and concise budget information, both on required Federal forms and in the narrative detail of this section. Multi-year applications must include budget information for each year of project activity.

Applications must include OMB standard form 424A, "Budget Information - Non Construction Programs." All instructions should be read before completing the form, and the amounts per category and total amounts indicated on the form should correspond with amounts indicated in the budget narrative and justification.

On a separate sheet or spreadsheet, list itemized costs per category and the corresponding Federal and non-Federal share and direct and indirect cost totals. Describe and justify the requested budget. For the non-Federal share, the itemized costs should be separated into cash and in-kind contributions. If in-kind contributions are included, describe briefly the basis for estimating the value of these contributions.

5. Appendices

Abbreviated curricula vitae or resumes of the PM/PI and any Co-Managers/Co-Investigators should be included with the application. Applicants requiring scientific research permits must also include evidence of such a permit (e.g., by providing the permit number) or evidence they have submitted a permit application. Additional material that is necessary or useful to the description of the project may also be provided (e.g. letters of endorsement, tables or visual materials). Letters of endorsement are strongly recommended.

C. Submission Dates and Times

Proposals must be received by the Pacific Islands Regional Office by 5:00 p.m. Hawaii Standard Time February 14, 2011. Proposals received after the established deadline will be rejected and returned to the sender without consideration. For proposals submitted through Grants.gov, a date and time receipt indication will be the basis of determining timeliness. The proposal must be validated by Grants.gov in order to be considered timely.

For those without access to the internet, one signed original and two hard copy applications must be received by the established due date for the program at the following address: NOAA Federal Program Officer for the Pacific Islands Region Marine Turtle Program, Pacific Islands Regional Office, National Marine Fisheries Service, 1601 Kapiolani Boulevard, Suite 1110, Honolulu, Hawaii, 96814. Use of U.S. mail or another delivery service must be documented with a receipt. No facsimile and electronic mail proposals will be accepted. May 1, 2011 should be used as the anticipated start date on proposals, unless otherwise directed by the NOAA Program Officer.

D. Intergovernmental Review

This federal funding opportunity is subject to Executive Order 12372, "Intergovernmental Review of Federal Programs." An applicant should consult the office or official designated as the single point of contact in his or her State for more information on the process the State requires to be followed in applying for assistance, if the State has selected the program for review. The names and addresses of these contacts are available at <http://www.whitehouse.gov/omb/grants/spoc.html>.

E. Funding Restrictions

Applicants cannot be reimbursed for time expended or costs incurred in developing a project or preparing the application.

F. Other Submission Requirements

Permits, Pre-approvals, and Clearances: The applicant is required to obtain the necessary permits, approvals and/or clearances that authorize the actions and activities required to carry out the project as proposed. This shall include meeting the requirements of applicable Federal law and all local regulations. To ensure that such permits, approvals, and clearances, where required, are obtained prior to the release of funds to the recipient, specific requirements in the form of Special Award Conditions may be attached to the NOAA award documents.

When requested, the applicant must also be available to respond to questions during all phases of review and evaluation of applications.

V. Application Review Information

A. Evaluation Criteria

A technical advisory panel will evaluate proposals by assigning scores up to the

maximum indicated for each of the criteria below.

1. Importance and/or Relevance and Applicability of Proposed Project to Program Goals (30%). This criterion ascertains whether there is intrinsic value in the proposed work and/or relevance to NOAA, Federal, regional, state, or local activities.

2. Technical/Scientific Merit (30%). This criterion assesses whether the approach is technically sound and/or innovative, if the methods are appropriate, and whether there are clear project goals and objectives. Proposals should provide a clear definition of the project design, strengths and/or weaknesses and the means that are to be employed for securing productive results.

3. Overall Qualifications of the Applicants (15%). This criterion ascertains whether the applicant possesses the necessary education, experience, facilities, and administrative resources to accomplish the project. Reviewers will consider previous related experience and qualifications of the project's PM or PI, Co-Manager(s) or Co-Investigator(s) and other personnel, including designated contractors, consultants, and cooperators. Reviewers will also consider past award performance of the applicant(s) and PM/PI.

4. Project Costs (15%). This criterion evaluates the budget to determine if it is realistic and commensurate with the project needs and time-frame. This includes reviewing the reasonableness of the costs associated with the required tasks to be performed, and the overall relationship with the cost effectiveness for successfully completing the project.

5. Outreach and Education (10%). This criterion assesses whether the project provides a focused and effective education and outreach strategy regarding NOAA's mission to protect the Nation's natural resources.

B. Review and Selection Process

Screening, review, and selection procedures will take place in 3 steps: initial screening, technical and merit review, and final selection by the Selecting Official (i.e., the Assistant Administrator for NMFS). An initial screening and evaluation of applications will be conducted to ensure that application packages have all required forms and application elements, clearly relate to the 2011 Pacific Islands Region Marine Turtle Program, and meet all of the eligibility criteria.

Proposals meeting the requirements of this solicitation will then undergo merit review. Each proposal will be reviewed by reviewers who will independently evaluate and score it using the evaluation criteria provided in section V.A. (Evaluation Criteria) above, and with respect to the priority criteria (1-3) mentioned above in section 1.B. Merit reviewers will be

individuals with appropriate subject-matter expertise and may be from Federal or state agencies, academic institutions, or non-profit organizations. The merit reviewers' ratings will be used to produce a rank order of the proposals.

After applications have undergone merit review, the Selecting Official will make the final decision regarding which applications will be funded based upon the numerical rankings and evaluations of the applications

If the Selecting Official accepts a proposal and/or a grant application for a project not in accordance with the rank given or the recommendation of the reviewer panel, the Selecting Official will consult with the Federal Program Officer and provide a detailed written explanation of the reasons for the action based on the selection factors below. The authority for approving a grant award for projects rests solely with NOAA/NMFS.

C. Selection Factors

The merit review ratings shall provide a rank order to the Selecting Official for final recommendation to the NOAA Grants Officer. The Selecting Official shall award in the rank order unless the proposal is justified to be selected out of rank order based on one or more of the following factors:

1. Availability of funds.
2. Balance/distribution of funds:
 - (a) geographically,
 - (b) by type of institutions,
 - (c) by type of patterns,
 - (d) by research areas, and
 - (e) by project types.
3. Whether this project duplicates other projects funded or considered for funding by NOAA or other federal agencies.
4. Program priorities and policy factors.
5. Applicant's prior award performance.
6. Partnerships and/or participation of targeted groups.
7. Adequacy of information necessary for NOAA staff to make a NEPA determination and draft necessary documentation before recommendations for funding are made to the

Grants Officer.

D. Anticipated Announcement and Award Dates

Subject to the availability of funds, review of proposals should occur during March 2011. May 1, 2011 should be used as the proposed start date on proposals, unless otherwise directed by the Program Officer.

VI. Award Administration Information

A. Award Notices

Successful applicants will receive notification that the application has been recommended for funding to the NOAA Grants Management Division. This notification is not an authorization to begin performance of the project. Official notification of funding, signed by a NOAA Grants Officer, is the authorizing document that allows the project to begin. Notifications will be issued to the Authorizing Official and the Project Manager/Principal Investigator of the project either electronically or in hard copy. Unsuccessful applicants will be notified that their proposal was not selected for recommendation. Unsuccessful applications will be returned to the applicant.

To enable the use of a universal identifier and to enhance the quality of information available to the public as required by the Federal Funding Accountability and Transparency Act of 2006, to the extent applicable, any proposal awarded in response to this announcement will be required to use the Central Contractor Registration and Dun and Bradstreet Universal Numbering System and be subject to reporting requirements, as identified in OMB guidance published at 2 CFR Parts 25, 170 (2010), http://ecfr.gpoaccess.gov/cgi/t/text/text-idx?c=ecfr&tpl=/ecfrbrowse/Title02/2cfr25_main_02.tpl , http://ecfr.gpoaccess.gov/cgi/t/text/text-idx?c=ecfr&tpl=/ecfrbrowse/Title02/2cfr170_main_02.tpl .

B. Administrative and National Policy Requirements

1. Department of Commerce Pre-Award Notification Requirements.

Administrative and national policy requirements for all Department of Commerce awards are contained in the Department of Commerce Pre-Award Notification Requirements for Grants and Cooperative Agreements published in the Federal Register on February 11, 2008 (73 FR 7696). You may obtain a copy of this notice by contacting the agency contact, or by going to the website at <http://www.gpoaccess.gov/fr/index.html>. Applicants whose proposed projects may have an environmental impact should furnish information requested to assist proposal reviewers in assessing the potential environmental consequences of

supporting the project.

2. Limitation of Liability.

Funding for programs listed in this notice is contingent upon the availability of FY 2011 Federal appropriations. Applicants are hereby given notice that funds have not yet been appropriated for the programs listed in this notice. In no event will NOAA or the Department of Commerce be responsible for proposal preparation costs if these programs fail to receive funding or are cancelled because of other agency priorities. Publication of this announcement does not obligate NOAA to award any specific project or to obligate any available funds.

3. Universal Identifier.

Applicants should be aware that, they are required to provide a Dun and Bradstreet Data Universal Numbering System (DUNS) number during the application process. See the October 30, 2002 Federal Register, Vol. 67, No. 210, pp. 66177-66178 for additional information. Organizations can receive a DUNS number at no cost by calling the dedicated toll-free DUNS Number request line at 1-866-705-5711 or via the internet (<http://www.dunandbradstreet.com>).

4. National Environmental Policy Act (NEPA).

If recommended for funding, applicants whose proposed projects may have an environmental impact will be asked to furnish sufficient information to assist NOAA in assessing the potential environmental consequences of supporting the project.

NOAA must analyze the potential environmental impacts, as required by the National Environmental Policy Act (NEPA), for each project which seeks NOAA funding. Detailed information on NEPA can be found at the following NOAA NEPA web site: www.nepa.noaa.gov, including our NOAA Administrative order 216-6 for NEPA, www.nepa.noaa.gov/NAO216_6.pdf , and the Council on Environmental Quality implementation regulations, http://ceq.hhs.doe.gov/nepa/regs/ceq/toc_ceq.htm .

If needed by NOAA for NEPA assessment, applicants will be asked to provide detailed information on the activities to be conducted, locations, sites, species, and habitat to be affected, possible construction activities, and any environmental concerns that may exist (e.g., the use and disposal of hazardous or toxic chemicals, introduction of non-indigenous species, impacts to endangered and threatened species, aquaculture projects, and impacts to coral reef systems). In addition to providing specific information that will serve as the basis for any required impact analyses, applicants may also be requested to assist NOAA in drafting an environmental assessment if NOAA determines an assessment is required. Applicants will also be required to cooperate with NOAA in identifying feasible measures to

reduce or avoid any identified adverse environmental impacts of their proposal. The failure to do so shall be grounds for not selecting an application. In some cases if additional information is required after an application is selected, funds can be withheld by the Grants Officer under a special award condition requiring the recipient to submit additional environmental compliance information sufficient to enable NOAA to make an assessment on any impacts that a project may have on the environment.

C. Reporting

Grant recipients will be required to submit financial and performance (technical) reports. All financial reports shall be submitted to NOAA's Grants Management Division in accordance with the award conditions via NOAA's Grants Online. Performance reports should be submitted to the NOAA Program Officer (Ms. Tia Brown, Pacific Islands Regional Office). Electronic submission of performance reports via NOAA's Grants Online web based software is the preferred method and strongly encouraged, however in special circumstances the Program Officer will accept hard copies. All reports will be submitted in accordance to the NOAA Special Award Conditions. The comprehensive final report is due 90 days after the award expiration.

The Federal Funding Accountability and Transparency Act of 2006 includes a requirement for awardees of applicable Federal grants to report information about first-tier subawards and executive compensation under Federal assistance awards issued in FY 2011 or later. All awardees of applicable grants and cooperative agreements are required to report to the Federal Subaward Reporting System (FSRS) available at www.FSRS.gov on all subawards over \$25,000.

VII. Agency Contacts

If you have any questions regarding this proposal solicitation, please contact Ms. Tia Brown at the NOAA/NMFS Pacific Islands Regional Office, 1601 Kapiolani Blvd, Honolulu, Hawaii, 96814, by phone at 808-944-2259, or by email at Tia.Brown@noaa.gov.

VIII. Other Information

Freedom of Information Act

U.S. Department of Commerce regulations implementing the Freedom of Information Act (FOIA) are found at 15 C.F.R. Part 4, "Public Information." These regulations set forth rules for the Department regarding making requested materials, information, and records publicly available under the FOIA. Applications submitted in response to this Federal Funding Opportunity may be subject to requests for release under the Act. In the event that

an application contains information or data that the applicant deems to be confidential commercial information which is exempt from disclosure under FOIA, that information should be identified, bracketed, and marked as "Privileged, Confidential, Commercial or Financial Information." Based on these markings, the confidentiality of the contents of those pages will be protected to the extent permitted by law.
