

# North American Wetlands Conservation Act

## United States Standard Grant

### *2019 Proposal Instructions*

**Proposal Deadlines = FEBRUARY 22, 2019 & JULY 3, 2019**

**Program Authorizing Legislation:** North American Wetlands Conservation Act (16 USC Ch. 64)

**Paperwork Reduction Act Statement:** We are collecting this information in accordance with the legislative authority listed above. Your response is required to obtain or retain a benefit. We will use the information you provide to conduct a competitive review and select projects for funding and, if awarded, to evaluate performance. We may not conduct or sponsor and you are not required to respond to a collection of information unless it displays a currently valid OMB control number. We estimate that it will take you on average about 203 hours to complete an initial application, including time to maintain records, and gather information. Actual time for these activities will vary depending on program-specific requirements. You may send comments on the burden estimate or any other aspect of this information collection to the Information Collection Clearance Officer, U.S. Fish and Wildlife Service, MS BPHC, 5275 Leesburg Pike, Falls Church, VA 22041-3803.

OMB Control Number: 1018-0100 (Expires: 7/31/2021)

## INTRODUCTION

These instructions are applicable to U.S. Standard Grant proposals submitted through July 3, 2019.

### HOW TO MAKE YOUR PROPOSAL SUCCESSFUL

#### Contact a Migratory Bird Joint Venture

Coordinate with your Joint Venture before pursuing partners and writing your proposal. Joint Ventures are located throughout the United States, and they may be able to assist with partnership opportunities: <https://www.fws.gov/birds/management/bird-conservation-partnership-and-initiatives/migratory-bird-joint-ventures/joint-venture-directory.php>

#### Proposal Outline Template and Other Information

We recommend that you prepare the Work Plan, Financial Plan Table, and Tract Table before developing the rest of the proposal. These will provide a reference point to ensure that the proposal data is consistent throughout all sections. For Proposal Outline Template and other information visit:

<https://www.fws.gov/birds/grants/north-american-wetland-conservation-act/how-to-apply-for-a-nawca-grant.php#us-standard>

#### Eligibility Criteria

Proposals will be deemed ineligible if they do not adhere to the eligibility and cost criteria. Your proposal will be automatically ineligible if the margins and font style/size are modified from the Proposal Outline Template. To review NAWCA Eligibility Criteria and Process visit:

<https://www.fws.gov/birds/grants/north-american-wetland-conservation-act/how-to-apply-for-a-nawca-grant.php>.

#### Grants.gov, SAM, DUNS

All proposals must be submitted through Grants.gov. When submitting through Grants.gov, the only documents that need to be uploaded to the site are the SF-424 and the SF-424D (SF-424 D Assurances for Construction Projects are required for all NAWCA projects). Grants.gov provides information about acquiring a DUNS number, SAM registration, and authorizing yourself as your organization's Authorized Organization Representative (AOR). Grants.gov and SAM.gov are free websites. Do not pay for your SAM.gov registration or renewal, and do not provide any information to scammers who may contact you. Federal agencies are not required to submit SF-424 through Grants.gov. Federal agencies can submit proposals and supporting documents directly to [dbhc@fws.gov](mailto:dbhc@fws.gov).

#### Submitting the Proposal

1. Please provide one electronic PDF of the narrative proposal, Financial Plan Table, Tract Table, maps, and partner letters. Shapefile and easements can be separate files. Email all documents to [dbhc@fws.gov](mailto:dbhc@fws.gov) with the title of the proposal in subject line.
2. All applicants except Federal agencies must submit SF-424 and SF-424D forms into Grants.gov.
3. Email your proposal and supporting documents to your Migratory Bird Joint Venture.

#### Proposal Deadlines

The U.S. Standard Program consists of two submission cycles. Complete proposals must be submitted by **February 22 and July 3, 2019**. Any group or individual may submit proposals at any time before those dates. Proposals received after the February deadline will be considered for funding as a July submission. Proposals received after the July deadline will be ineligible unless the proposal is clearly labeled as an early 2020 submission (these will be subject to modifications if there are changes in the 2020 submission guidelines).

### **Integrity of Scientific and Scholarly Activities**

In 2011, the Department of Interior (DOI) established a policy to ensure and maintain the integrity of scientific and scholarly activities used to inform management and public policy decisions: DOI Policy, 305 DM 3, "[Integrity of Scientific and Scholarly Activities](#)". The scientific integrity policy applies to the DOI employees, contractors, grant recipients, and volunteers when they analyze or share scientific information with the public or use DOI's information to make policy or regulatory decisions. This policy applies to all funding applications received by the North American Wetlands Conservation Act grant programs. Essentially, the use of false data to leverage grant funds is a direct violation of DOI's scientific integrity policy and requires the refund of any associated federal assistance.

### **Partner Contribution Statements**

We will only accept properly formatted Partner Contribution Statements as verification of partner match. Submitting partner letters that do not follow the format in the guidelines will adversely affect the timely review of a proposal and may result in the contribution being considered as non-match.

### **MAJOR CHANGES/UPDATES FROM THE 2018 US STANDARD GRANT INSTRUCTIONS**

- Invasive Species –If appropriate, answer the following questions regarding invasive species control in the Work Plan description section per tract:
  - What invasive species are present and how will the invasive species be treated (e.g., mechanical or chemical application)? If mechanical, explain what will be done? If chemical application, what kind of chemical will be used and how many applications will be done? If other control methods will be used, please describe.
  - What is the expected duration of the treatment(s)?
  - Who is responsible for maintaining the invasive species control after the treatment and for how long?
  - If working with private landowner(s), is there an agreement involved?
  - How will the invasive species treatments affect the acres over time?
- Fencing Activities – If grant and/or match funds will be used to construct fencing of any kind, answer the following questions in the Work Plan description section per tract:
  - Is the fencing wildlife friendly? If so, how will it improve nearby habitat conditions and not impede wildlife movement? For more information on wildlife friendly fencing, please find the suggested document for reference: <http://fwp.mt.gov/fwpDoc.html?id=34461>
  - Who is responsible for maintaining the fencing over time?
- The partner contribution letter template has been updated to include a question that asks if and how the project will benefit tribal hunting and fishing treaty rights. This change came in response to the House of Representatives Committee on Appropriations Report submitted to the Department of the Interior, Environment, and Related Agencies Appropriations Bill for Fiscal Year 2018 (<https://appropriations.house.gov/uploadedfiles/23918.pdf>), under the section North American Wetlands Conservation Fund (page 22).

## PROJECT OFFICER'S PAGE

To download full Proposal Outline Template, visit:

<https://www.fws.gov/birds/grants/north-american-wetland-conservation-act/how-to-apply-for-a-nawca-grant.php#us-standard>

**Please do not include a cover/transmittal letter at the beginning of the proposal.** The Project Officer's page should be the first page of the proposal. Do not adjust margins on the Project Officer's Page. The information below in italics is intended to assist you as you complete the blank proposal outline.

**What is the proposal title?** *Due to database limitations, it is critical that the title be limited to 80 characters (including spaces) and that phased proposals retain the original title with only the phase number changing. Enter a short, descriptive, and unique title, such as "Falcon Bottoms," "Turtle Bog Marsh," or "Great Bay." If the proposal is a phase of an earlier funded proposal, use the same title as the earlier proposal and include the appropriate Roman numeral to denote that this is a subsequent proposal, such as "Falcon Bottoms II."*

**What is the date you are submitting the proposal?**

**What are the geographical landmarks for the proposal?**

*List Counties and States that the tract(s) are included in; if tract(s) are unknown, then list all of the project area*

1. State(s):
2. County(ies): *List all counties in alphabetical order*
3. Congressional District(s): Visit <https://www.census.gov/geo/maps-data/maps/reference.html> for the most up to date list of Congressional Districts or download the [Congressional District GIS shapefile](#) (select 2018 and Congressional Districts).
4. JV(s): *Identify the Migratory Bird Joint Venture area(s). Visit the [USFWS JV Directory website](#) or download the [JV GIS shapefile](#).*
5. BCR(s): *Identify the Bird Conservation Region BCR(s). Visit <http://nabci-us.org/resources/bird-conservation-regions-map/> or download the [BCR GIS shapefile](#).*

**Project Officer information:**

1. Name: *The Project Officer **MUST** be the primary point of contact for the project and must be affiliated with/employed by the grantee's organization. List the person who will be managing the project activities, filing reports, and communicating with DBHC.*
2. Title:
3. Organization: *If the organization entered here is not the grantee organization, please explain. (See 2019 Eligibility Criteria and Processes)*
4. Applicant Organization Address (No P.O. Box Address): *City, State, Zip + 4 where available*
5. Project Officer Address (No P.O. Box Address): *City, State, Zip+ 4 where available*
6. Telephone number: *List the numbers at which the Project Officer can be reached, including work and cell numbers.*
7. E-mail address:
8. Additional Contacts: *We require a single Project Officer, but please list another contact who may communicate with us pre- or post- award about the project if the Project Officer is unavailable. Provide name(s), email(s), and phone number(s).*
9. DUNS Number:

**Please answer the following questions:**

**2010 Gulf of Mexico Deepwater Horizon Macondo Oil Spill** – *Although the funding was expended with the previous round of projects, this justification is included now in case there are any projects that are cancelled or withdrawn.*

Projects occurring in Florida, Alabama, Mississippi, Louisiana, and Texas, as well as those benefiting affected habitats and species may be funded with fines paid by British Petroleum (BP) to settle Migratory Bird Treaty Act violations. Projects must clearly demonstrate conservation benefits to affected habitats or populations of species listed in [Attachment B](#) (NAWCA Priority Bird Crosswalk List) and [Attachment C \(New Map: NAWCA Priority Gulf Spill Funding Zones map\)](#) that winter, breed, or migrate through areas affected by the spill. Additional guidance may be forthcoming.

**Are you requesting that this proposal be considered for funding using BP Gulf Spill funds?** *Yes/No*  
If yes, you must demonstrate a nexus between your project and the migratory bird species and other wildlife and habitat affected by the Gulf spill. Furthermore, provide the best available science-based information (banding information, telemetry, etc.) indicating that the population(s) of species targeted in this proposal also use habitats along the Gulf of Mexico that were affected by the Spill.

Limit your response to two pages and attach the response after the Project Officer page. The North American Wetlands Conservation Council (Council) will use this information to make a final funding determination. If your proposal is not funded with Gulf Spill funds, it will still be considered under other NAWCA funding sources. A new Gulf Spill map has been developed and approved by Council ([Attachment C](#)). Under exceptional circumstances, Council will consider proposals that are out of the indicated priority areas.

**Is an Optional Matching Contributions Plan (MCP) submitted with the proposal?** *Yes/No*    **Or**  
**Does the proposal contain match associated with a previously submitted MCP?** *Yes/No*

**Are you requesting that this proposal be considered as a continuation of a previous grant agreement (a Programmatic Project Proposal)?** *Yes/No*

If yes, provide the title and grant agreement number of the previous grant agreement.

**Do you expect this project to be the first phase of a Programmatic Project?** *Yes/No*

**How many more proposals are planned for the same proposal area?**

**Will any of the NAWCA funds requested as part of this proposal be received or spent by the U.S. Fish and Wildlife Service or another Federal agency?** *Yes/No*

If yes, which agency(ies) will receive these funds and what is the fund amount:

Agency \_\_\_\_\_ Amount \_\_\_\_\_

(add additional lines as necessary and include accounting code if possible)

**Does this proposal include acquisition activities that will add to the National Wildlife Refuge System (NWRS)?** *Yes/No*

If yes, please indicate which NWRS program the acquisition(s) will be added to: National Wildlife Refuge (NWR) and which one(s), Waterfowl Production Area (WPA) and which one(s), or Small Wetland Acquisition Program (SWAP).

**Are carbon sequestration credits involved in your proposal?** *Yes/No*

If yes, please highlight and provide details in the appropriate financial plan narrative/work plan section. Include information about whether the credits will generate program income (Described in Grant Administration Standards).

**Will any portion of any tract or activities associated with any tract be used to satisfy wetland or habitat mitigation requirements under Clean Water Act, Rivers and Harbors Act, Fish and Wildlife Coordination Act, Water Resources Development Act, ecological service credits or other related statutes now or in the future? Yes/No**

If yes, please highlight and provide details in the appropriate financial plan narrative/work plan section.

**Have you confirmed that all partners, key personnel, and contractors are eligible to participate in Federal grants? Yes/No**

*Project Officer must confirm that parties are eligible to participate in federal grants by checking the Federal Excluded Parties List at: <https://www.epls.gov/>. If an ineligible party participates in a federally funded project, all or a portion of the federal funding may be terminated.*

**To ensure that the proposal complies with available guidelines and that partners are aware of their responsibilities, the Project Officer certifies to the following statement:** I have read the 2019 U.S. Standard Grant proposal instructions, eligibility information, and applicable U.S. grant administration policies and informed partners or partners have read the material themselves. To the best of my knowledge, this proposal is eligible and complies with all NAWCA, North American Wetlands Conservation Council, and Federal grant guidelines and the information submitted herein is true and correct. The work in this proposal consists of allowable and eligible work and costs associated with long-term wetlands and migratory bird habitat conservation. *If habitat or migratory bird benefits described in the proposal are found to be grossly exaggerated and/or intentionally misleading, the proposal may be declared ineligible or any resulting awards may be fully or partially terminated.*

**Audit reports.** If the applicant organization expended more than \$750,000 of federal funds during the last calendar year, please include a copy of your most recent of SF-FAC that was submitted to the Federal Audit Clearinghouse. If your organization did not expend more than \$750,000 of federal funds last year, please certify that the Single Audit (formerly A-133) was not required.

**Required Overlap/Duplication Statement:** Applicants must provide a statement that addresses whether there is any overlap between the proposed project and any other active or anticipated projects in terms of activities, costs, or time commitment of key personnel. If any overlap exists, applicants must provide a description of the overlap in their application. Applicants must also state if the proposal submitted for consideration under the program is/is not in any way duplicative of any proposal that was/will be submitted for funding consideration to any other potential funding source (Federal or non-Federal). If such a circumstance exists, applicants must detail when the other duplicative proposal(s) were submitted, to whom (entity name and program), and when funding decisions are expected to be announced. If at any time a proposal is awarded funds that would be duplicative of the funding requested from the Service, applicants must notify the Service point of contact for this funding opportunity immediately. *This requirement can be a few short sentences explaining whether there is any overlap between or among proposed projects. For instance, you will need to include an overlap statement if you submitted a tract(s) for funding consideration in a NAWCA Small Grants proposal and also submitted that same tract(s) for consideration under a U.S. Standard Grants proposal (or vice versa).*

**Do you have any comments about, or suggestions for, the NAWCA program?**

You may provide comments with this proposal, or send them at any time.

- By mail to: Coordinator, North American Wetlands Conservation Council  
U.S. Fish and Wildlife Service  
Division of Bird Habitat Conservation  
Mail Stop: MB  
5275 Leesburg Pike  
Falls Church, VA 22041-3803

- Via e-mail(preferred) to: [dbhc@fws.gov](mailto:dbhc@fws.gov)

### PROPOSAL SUMMARY (3 pages maximum)

The Proposal Summary is the only narrative material provided to the North American Wetlands Conservation Council and Migratory Bird Conservation Commission so it must be descriptive and succinct. Consider developing the Summary after you have written the rest of the proposal, as this will help ensure that information in the Summary is consistent with the proposal. The Proposal Summary must follow the format provided in the blank proposal outline exactly, including margins, spacing, font size, etc. Click here for the [Proposal Summary Example](#).

#### General Requirements

1. The Proposal Summary will be used as a stand-alone document and will be subject to editing by the U.S. Fish and Wildlife Service. Start the Proposal Summary on a new page (i.e., do not begin the Proposal Summary on the same page as the Project Officer's page), and enter a page break at the end of the Proposal Summary. Save the Proposal Summary in a separate file for ease of editing.
2. Do not number Proposal Summary pages. Starting with the Financial Plan Table as page 1, number all remaining pages.
3. The Proposal Summary, which includes tabular and narrative information, may be a maximum of three pages.
4. All margins must be 1 inch. Failure to adhere to margin requirements may affect eligibility of your proposal.
5. Format must be a PDF version
6. Font size: 11 point and Font type: Times New Roman. Failure to adhere to font size requirements may affect the eligibility of your proposal.
7. The information in the summary table must exactly match the information provided elsewhere in the proposal.

#### Specific Requirements (see [Proposal Summary Example](#)).

1. Center "NORTH AMERICAN WETLANDS CONSERVATION ACT PROPOSAL SUMMARY" in all capital letters at the top of the page, and center the project title and state with initial capital letters beneath it. If the proposal is a phase of an earlier funded proposal, use the title of the earlier proposal with an appropriate Roman numeral denoting the phase number.
2. All other information is left justified, without indentation, except for financial totals on the right side of the page, which are right justified.
3. Type the header for each paragraph category in all capital letters (e.g. COUNTY (IES), STATE(S), CONGRESSIONAL DISTRICT(S); GRANT AMOUNT; MATCHING PARTNERS; etc.).
4. Using the prescribed format shown in the example, provide the requested information for each category. **However, do not include categories shown in the example if no information for that category exists.** For instance, if there is no restoration work being done, do not include a "Restored" line in the "ACTIVITIES, COSTS AND ACRES" section.
5. Enter the total grant amount on the right side of the page, right justified, on the same line as the header "GRANT AMOUNT." Under "Grant Amount", type "Allocation:" Enter the name of the organization(s) that will be allocated grant funds (normally, this will be the Grantee organization, which administers the funding as planned in the proposal; however, in certain circumstances, other organizations may be receiving grant funds directly). Enter the allocation amount after the organization(s) name. Enter the total for MATCHING PARTNERS, and the total for ACTIVITIES, COSTS AND ACRES each on the same line as their respective headers, in alignment with the total grant amount.
6. MATCHING PARTNERS: Enter the grantee organization and contribution (if applicable)

immediately underneath the category header. List the matching partners and their contributions under the grantee. Provide the full partner name; do not abbreviate. List the individual match contributions in tabular format (see example). **For the grantee or partner associated with a Matching Contributions Plan (MCP), list the amount associated with the MCP phase as the contribution amount on a separate line.**

7. GRANT AND MATCH - ACTIVITIES, COSTS AND ACRES: Insert the total costs and acreage associated with the grant and match funds to the right on the same line as the header (right justified). Under the header, list one or more appropriate activities, costs, and acreages from the following activity categories: Fee Acquired; Fee Donated; Easement(s) Acquired; Easement(s) Donated; Lease(s) Acquired; Lease(s) Donated; Restored; Enhanced; Wetland Established; Other; Indirect Costs. **List the activities in that order, but do not list categories in which no activity will take place.** After each category listed, indicate the amount being expended in tabular format, and then type a slash (/) and the total acreage involved. If building envelope acres are involved with any activities, ensure that these acres are not included in the acreage totals for the proposal.
  - Include only those activities, costs, and acres associated with grant or match funds. See the instructions for the Financial Plan Table below for contributions from non-match funds.
  - If acquired acreage also will be restored or enhanced in the current proposal, place parentheses around the restored or enhanced acreage to show that they have already been accounted for under the acquired category. These are referred to as non-additive or non-add acres. Non-add acres should also be indicated if restoration or enhancement activities are occurring on a property acquired in a previous phase or another NAWCA project.

In the following simplified example, 300 new acres are to be acquired in Fee Title using grant and/or match funds.

- 200 new acres are to be restored using grant and/or match funds; 150 of the 300 acres acquired in fee in this project are also restored – (150); an additional 200 acres acquired in a previous NAWCA project will also be restored – (200).
- 100 new acres are to be enhanced using grant and/or match funds; 100 of the 300 acres acquired in fee are also enhanced – (100); an additional 300 acres acquired in a previous phase will also be enhanced – (300).

GRANT AND MATCH - ACTIVITIES, COSTS AND ACRES	\$2,050,000/600 (750) acres
Fee Acquired	\$1,000,000/300 acres
Restored	\$500,000/200 (350) acres
Enhanced	\$500,000/100 (400) acres
Other	\$50,000

8. **NON-MATCHING PARTNERS: List all non-matching partners and contributions in the same format as for matching partners. List contributions only; do not include acres or activities.**
9. **MATCHING CONTRIBUTIONS PLAN:** If a partner’s match amount is associated with a MCP (either a new MCP submitted with the proposal or a follow-on phase for a MCP previously approved by the Council), list only the match amount that is being applied to the current proposal. MCPs can only be submitted for excess match associated with the acquisition of a single tract.

All of the acres associated with a new MCP are listed with the appropriate activity. Acreage associated with a previously approved/used MCP does not appear in subsequent proposals; list the MCP amount attributed to the current proposal as “Previously Approved MCP Funds”.

In the following simplified examples, costs and acres are listed along with the correct format for a new MCP (example 1) and the second phase of a previously approved MCP (example 2):

Example 1.

- 400 new acres are to be acquired in Fee Title using grant and/or match funds (total cost = \$2,000,000).
- 100 additional match acquisition acres are the basis for a new MCP (total appraised value = \$3,000,000).

GRANT AND MATCH - ACTIVITIES, COSTS AND ACRES	\$3,000,000/500 acres
Fee Acquired	\$3,000,000/500 acres [this includes all of the MCP acres and \$1,000,000 of the value of the MCP]

Example 2.

- In this example, the MCP is the second phase of the previously approved MCP (\$2,000,000 remains after the initial phase). No acres are listed because these have been accounted for in the initial phase. Only the \$2,000,000 cost associated with this phase of the MCP is listed.
- 300 new acres are to be acquired in Fee Title using grant and/or match funds (\$1,000,000).

GRANT AND MATCH - ACTIVITIES, COSTS AND ACRES	\$3,000,000/300 acres
Fee Acquired	\$1,000,000/300 acres
Previously approved MCP funds	\$2,000,000

This phase would close out the MCP.

- 10. PROPOSAL PURPOSE AND DESCRIPTION:** Describe the proposed project’s goals and objectives; why the work is proposed; who will be doing what activity (ies); where they will be doing the activity (ies) (for example, on a Refuge, on private land, near a conservation area); how they will accomplish the work (building dikes, installing water-control structures, etc.); what, if any, joint venture is involved or benefiting.
- 11. HABITAT TYPES AND WILDLIFE BENEFITTING:** Describe the habitat types involved in the proposed proposal activities; provide examples of the species (Blue-winged Teal, American Bittern, etc.) benefiting and their uses of the habitats (breeding, feeding, resting, etc.).
- 12. PUBLIC BENEFITS/PUBLIC ACCESS:** Describe the benefits of the proposal to the public (hiking, hunting, birding, education, water quality, etc.); describe whether any of the grant/match tracts will allow public access, and if so, what type of access.
- 13. NEW PARTNERS:** Identify partners who have never previously participated in any NAWCA grant.
- 14. RELATIONSHIP TO PREVIOUSLY FUNDED NAWCA PROPOSALS:** If applicable, summarize the relationship of the current proposal with previously funded NAWCA proposals in the region and show how the current proposal adds to progress (if any) towards regional conservation goals for habitats and/or birds. If this is a phased NAWCA proposal and/or if your organization has received other NAWCA Standard grants in the same general area specifically identify the cumulative habitat achievements of previous phases and how the landscape and the bird populations of that landscape have changed.
- 15. THREATS AND SPECIAL CIRCUMSTANCES:** Describe any threats to habitats in the proposal area or other circumstances that make funding at this time particularly important.

**Proposals Requesting Over \$1,000,000**

Applicants must include an explanation of the extraordinary circumstances justifying the request and attach it after the Summary Page. The Council will evaluate the request and approve/disapprove based on factors such as opportunity, resource values involved, threat level, loss of match and/or the amount of

available funding.

**Matching Contribution Plans (Optional)**

If any match was previously approved by the Council via an optional Matching Contributions Plan (MCP), include a copy of the DBHC email approving the MCP and provide the following information: tracts affected, how much of each partner’s match has been used in previous proposals, how much is being used in this proposal, and how much will remain after the current proposal is funded (Click here to see an [example of an MCP table](#)).

**FINANCIAL TABLE**

**NOTE: Landowner and tract names must be consistent throughout the proposal**

**Insert the Financial Plan Table as page 1, after the Summary Pages.**

1. Complete the Financial Plan Table provided in the Word proposal outline or Excel template and insert it as page 1. Click here for the [Financial Plan Table Example](#). You may submit additional tables if those will help explain the financial plan, but keep to a minimum. The Word Proposal Outline contains a blank Financial Plan Table or you may use the table in the Excel Tables Template workbook found here: <https://www.fws.gov/birds/grants/north-american-wetland-conservation-act/how-to-apply-for-a-nawca-grant.php#us-standard>.
2. Identify each tract (or logical groupings of tracts) using a consistent method on all maps and throughout the proposal. Show all costs covered by the grant, each matching partner, and each non-matching partner for all grant/match tracts. Non-match should not be listed in the table unless it has been pooled with grant/match dollars to accomplish grant/match acres. Entirely non-match tracts and activities should not be included in the table.
3. For all grant expenditures, list the partner that will be spending grant funds on the same line item.
4. You may show grant and one partner’s contribution on one line for the same tract if that partner will be receiving grant funds, but do not combine different partner contributions on the same line. For example, if there are 10 separate partners contributing to fee acquisition for a particular tract, then there should be 10 separate partner entries for that tract. Add lines to the table as needed. In the [Financial Plan Table Example](#), multiple lines were added under Land Costs: Fee Acquired to demonstrate separate lines for each partner. In the example, lines were added under “Land Costs: Fee Acquired” because different tracts are affected and they should not be lumped.
5. Separate match funds into "Old" (spent prior to proposal submission) and "New" (to occur after proposal is submitted and during the Grant Agreement period).
6. If you are submitting a MCP, be sure the Financial Plan Table only includes funds for the current proposal and not the entire contribution in the MCP. Costs from the first phase of an MCP should appear with the activity and partner in the appropriate direct cost category. For subsequent phases of an MCP, enter the MCP match costs in line L. PREVIOUSLY APPROVED MCP, which is above line M. GRAND TOTAL DIRECT costs, and list the appropriate amount as old match.

**Previously Approved MCP example (showing final portion of Financial Plan Table only):**

ACTIVITIES	GRANT \$	ABBREVIATED PARTNER NAME	OLD MATCH \$	NEW MATCH \$	TOTAL GRANT + MATCH \$	TRACT ID	NON-MATCH \$
<b>L. PREVIOUSLY APPROVED MCP</b>		PARTNER A	<b>\$3,000,000</b>		<b>\$3,000,000</b>		
<b>M. GRAND TOTAL DIRECT (Sum of G and H, I, J, K, L)</b>	<b>\$1,000,000</b>		<b>\$4,000,000</b>	<b>\$3,500,000</b>	<b>\$8,500,000</b>		<b>\$500,000</b>
Indirect Costs		PARTNER B		\$5,000	\$5,000	4	
<b>N. TOTAL INDIRECT</b>				<b>\$5,000</b>	<b>\$5,000</b>		
<b>GRAND TOTAL (Sum of M and N)</b>	<b>\$1,000,000</b>		<b>\$4,000,000</b>	<b>\$3,505,000</b>	<b>\$8,505,000</b>		<b>\$500,000</b>

7. Show each private landowner by name, contribution amount, and tract if they are contributing to grant/match acres.
8. For acres being acquired, restored, or enhanced by pooling both grant/match funds and non-match funds, and in which NAWCA will acquire an undivided interest in those acres, list the total costs in either grant or match in the table, as appropriate. Do not pro-rate acres between grant or match (See item 2 for clarification on when to include non-match).
9. All cost categories are shown in the Word and Excel template. Do not include categories that do not apply to your proposal (e.g., if there is no enhancement in your proposal, then delete those activity rows).
10. You may use a landscape orientation, versus portrait, for the printed page if needed.
11. You may abbreviate partner names in the table, but be sure to spell them out in the Partner Information section in the bottom portion of the Financial Plan Table.
12. Below the Financial Plan Table in the Partner Information section, list each sub-grantee who will receive, because of this proposal, any of the following:
  - Federal grant funds or “new” matching funds,
  - Property (e.g., land structures, dikes, levees, earthen dams, equipment, supplies) that will be purchased with Federal grant or matching funds or
  - Property committed as “new” match.
  - Contractors or vendors who will be paid for goods, construction, planting or services purchased for the proposal and individuals are NOT considered sub-grantees.

## **WORK PLAN**

The work plan is constructed as series of discrete, stand-alone activities (e.g., fee acquisition, easement donation, restoration, enhancement, etc.) associated with specific tracts. See the [Work Plan Example](#). The work plan should include only grant/match tracts. Eligible non-match dollars pooled with grant/match dollars to accomplish grant/match acres may be listed in the work plan, but acres and dollars that are entirely funded by or attributed to non-match should NOT be included in the work plan.

For the first phase of an MCP, list associated activities/costs with the appropriate tract(s). MCP costs in subsequent proposals should be shown under “Other Direct Grant/Match Activities”, with the name and phase of the MCP listed under “Item & Work”.

### **Work Plan Formatting**

1. Use the following format for identifying tracts. Each tract should be numbered sequentially starting with “1” and given an identifying name (e.g., Tract 1 - Howard Farms, Tract 2 - Brancheau Wetland, Tract 3 - McIntyre). Describe the work to be done using the format in the example. The tract name should exactly match that used in other sections throughout the proposal. Include the following information:
  - a. Tract name, overall number of acres affected on the tract (for instance, if there are 300 acres acquired and 100 of those acres will be restored, the overall acreage affected is 300; the restoration acres would be listed as (100)), tract location (central latitude/longitude in decimal degrees format. Example: 38.752906, -77.1084432), and a list of state or Federal government agencies (if any) with a legal interest in the property (such as those with Notices of Funding or Grant Restrictions on fee deeds or easements).
  - b. For each tract, list the acreages for each of the activities associated with the tract. Identify non-add acres (acres already accounted for in a previous activity: 100 acres acquired and restored – the 100 restored acres are non-add) in parentheses.
  - c. Under each tract listed, type the applicable Work Plan activity category titles in all capital letters

- and list the total cost and acreage for that activity category within that tract. Identify non-add acres for a tract in parentheses. For example, “ACQUISITION FINANCIAL PLAN JUSTIFICATION - \$3,000,000 AND 10,000 acres”. On the next line, separately enter the amount of grant, match, and non-match funding for that activity category within that tract. All costs (“Total \$” column in each table below) must be described and equal the figures in the activity category headers. Identify an actual or estimated timeframe for completion of that activity.
- d. Describe all grant and match activities that will occur on each tract. If multiple activities take place on the same tract, describe them separately but identify if acres overlap between activities. For example, if a proposal includes land acquisition with restoration work done on the same site, this would be described as two separate activities.
2. For each activity, include a clear description of the work to be done and briefly justify why that activity is being included as part of this proposal.
    - a. **Acquisition activities:** Describe how they enable better management or create a restoration opportunity or if they are needed because the site is currently valuable habitat vulnerable to development. Fee acquisition of lands already protected by a conservation easement must be justified.
    - b. **Habitat restoration, enhancement, and establishment activities:** Identify specific habitat types and plant communities affected by project activities. Those habitat types should be identified in Joint Venture implementation plans or similar documents. If a tract includes invasive species treatments or implementation of any type of fencing material, include answers to these questions:
      - What invasive species are present and how will the invasive species be treated (e.g., mechanical or chemical application)? If mechanical, explain what will be done? If chemical application, what kind of chemical will be used and how many applications will be done? If other control methods will be used, please describe.
      - What is the expected duration of the treatment(s)?
      - Who is responsible for maintaining the invasive species control after the treatment and for how long?
      - If working with private landowner(s), is there an agreement involved?
      - How will the invasive species treatments affect the acres over time?
      - Is the fencing wildlife friendly? If so, how will it improve nearby habitat conditions and not impede wildlife movement? For more information on wildlife friendly fencing, please find the suggested document for reference: <http://fwp.mt.gov/fwpDoc.html?id=34461>
      - Who is responsible for maintaining the fencing over time?
  3. Explain any unusually high costs or large differences between per acre value of match and grant tracts. Refer to the [Eligibility Criteria & Processes](#) document for information on eligible and ineligible direct and indirect costs. Please explain if cost estimates differ from the fair market/reasonable value.
  4. Itemize costs shown in the Financial Plan Table for each activity and identify the source (grant or the partner providing the match and non-match dollars). Use only the portions of the table that are applicable to each activity.
  5. For each easement or fee acquisition activity included in the proposal, including old match, whether purchased or donated, complete the NAWCA Land Acquisition Disclosure section as part of the Work Plan. If the acquisition activity for that tract does not involve an easement or lease, do not include those portions of the Disclosure in the Work Plan. Attach to the proposal copies of all easements being used as old match. If available, provide draft language of easements to be acquired with grant or match funds during the project period. Grant funds will not be released for easement acquisition until the easement language has been reviewed and approved by DBHC.
  6. Do not include any activity categories in the Financial Plan Justification that are not applicable to a tract. For example, if no portion of a tract is being acquired as part of the project, the Work Plan for that tract would not include an acquisition section. This also applies for non-match. If the non-match

- contribution does not directly affect the project area, then do not include it in the proposal.
7. Group indirect costs by tract (with the exception of any associated with “Other Grant/Match Activities”). Separate direct cost(s) in the financial plan in the indirect cost tables. Each direct cost line should appear exactly as it did in the direct cost table so that direct and indirect tables can be compared. Indirect costs are eligible as grant or match cost only if you have a previously approved Negotiated Indirect Cost Rate Agreement (NICRA) with the Federal government that establishes the activities on which your organization may charge an indirect rate. Attach your current organization’s approved NICRA, application for rate, or other proof that the indirect costs you have claimed are compliant with applicable Federal regulations. If more than one NICRA applies, attach all applicable agreements. If you do not provide the information in the Financial Plan Table and Work Plan and include copies of applicable agreements, indirect costs will be considered ineligible. Each line entry shown should identify only one source (either grant amount or match amount). For more on indirect costs, go to [Eligibility Criteria & Processes](#), Eligible Grant Costs, and refer to the “What are direct and indirect costs?” answer. Unless your agreement specifically allows it, indirect costs calculated on the following are ineligible:
    - a. Subgrants (subawards), major subcontracts, any in-kind match provided by a party other than the applicant;
    - b. Non-match, in-kind match from partners other than the partner with the NICRA, contributions from Federal agencies, and other items that “distort” the cost base;
    - c. The acquisition costs of interests in real property; and
    - d. The purchase price of equipment with an acquisition cost of \$5,000 or more per unit and a useful life of more than one year (consistent with recipient policy, lower limits may be established).
  8. If some tracts are not yet identified, explain why and the method to be used to select tracts during proposal implementation.
  9. You may group large numbers of tracts with similar activities and per unit costs for the purposes of financial plan justification. Line item costs must be applicable to most tracts in order for those tracts to be grouped in the justification (For instance, 50 grassland easements are held by a single partner and planned enhancement on 40 of those easements will cost approximately the same per acre on all of those easements). Do not group acquisitions that will be held by different partners.
  10. All dollar figures should add up to those in the Financial Plan Table.
  11. Note that all questions are in the future tense, but they also apply to past (match) work and costs.
  12. Include any grant/match cost items that cannot be captured under a specific tract (for instance, grant administration) in a section entitled “OTHER DIRECT GRANT/MATCH ACTIVITIES” at the end of the Work Plan. Describe and itemize those costs (including indirect costs) below that heading.
  13. Note that examples of how to answer the questions are given to enable and encourage you to provide the requested information in the most efficient manner possible. Please follow this format. Use tables, bulleted lists, or short statements instead of full sentences and paragraphs to provide the information. When tables are given as examples, answers should be presented in columns; however, it is not required that a table be developed. Include information and descriptions that only pertain to the proposed project area(s). Additional information, such as a very detailed land-use history of the area/landscape, will not necessarily benefit the proposal.

**WORK PLAN FORMAT**

**TRACT #- Name**

**OVERALL ACRES AFFECTED:**

**CENTRAL LOCATION: (in decimal degrees)**

**STATE/FEDERAL AGENCIES HOLDING INTERESTS: (List agencies and describe interest; if none type NA)**

**Acreeage Summary of Grant/Match Activities on the Tract:**

**Acquisition                      Restoration                      Enhancement                      Establishment**

**Describe all grant/match activities occurring on the tract here:**

**Tract #-Name: Acquisition Financial Plan Justification - \$ \_\_\_\_\_ and \_\_\_\_\_ acres  
Grant - \$ \_\_\_\_\_ Match - \$ \_\_\_\_\_ Non-Match - \$ \_\_\_\_\_ Completion:**

**LAND ACQUISITION DISCLOSURE**

- Type of acquisition: (fee title, easement, lease, etc.)
- Holder of NAWCA conservation interest: (fee title, easement, lease, etc.)
- Grantor/Seller of conservation interest: (if Grantor/Seller is conservation organization, explain below how sale/transfer increases conservation value)
- Tenure of conservation interest: (10 years, perpetuity)
- All funding sources for acquisition: (include landowner if acquisition involved a donation or bargain sale)
- Are mineral rights severed or included? If severed, explain.
- Are water rights severed or included? If severed, explain.

**EASEMENTS:**

- What organization will monitor the easement?
- Should the easement holder cease to exist, to what organization will the easement revert?
- Has the easement holder adopted the “Land Trust Standards and Practices” developed by the Land Trust Alliance? If so, provide the date of that action. If not, describe the standards used to ensure adequate easement management and monitoring.
- Is there a stewardship endowment dedicated to maintaining and managing the easement? If so, what is the amount?
- Is subdivision of the easement property permitted? If so, with what limits?
- List all other allowed activities, allowed structures, or reserved rights not described above.

**LEASES:**

- What is the nature of the lease?
- What activities are allowed/prohibited?
- How does this contribute to long-term conservation of the property?

<b>Item &amp; Work</b>	<b>Units</b>	<b>\$/unit</b>	<b>Total \$</b>	<b>Schedule (month, year)</b>	<b>Funding Source (Grant or Partner name)</b>

## TECHNICAL ASSESSMENT QUESTIONS

The [North American Wetlands Conservation Act](#) specifies criteria to be used to evaluate proposals. The criteria are captured in the following seven Technical Assessment Questions.

**Question 1** - [How does the proposal contribute to the conservation of waterfowl habitat?](#)

**Question 2** - [How does the proposal contribute to the conservation of other wetland-associated migratory birds?](#)

**Question 3** - [How does the proposal location relate to the geographic priority wetlands described by the North American Waterfowl Management Plan, Partners in Flight, the U.S. Shorebird Conservation Plan, and/or the North American Waterbird Conservation Plan?](#)

**Question 4** - [How does the proposal relate to the national status and trends of wetlands types?](#)

**Question 5** - [How does the proposal contribute to long-term conservation of wetlands and associated habitats?](#)

**Question 6** - [How does the proposal contribute to the conservation of habitat for wetland associated federally listed or proposed endangered species; wetland associated state-listed species; and other wetland-associated fish and wildlife that are specifically involved with the proposal?](#)

**Question 7** - [How does the proposal satisfy the partnership purpose of the North American Wetlands Conservation Act?](#)

Technical Assessment Questions format follows. The questions should include:

1. All seven questions must be answered in no more than 14 pages total, including all text and tables (average of two pages per question). Margins must be 1 inch with Times New Roman size 11 font throughout (not including tables). To stay within the page limit, avoid adding links to lengthy documents, such as publications. These additional links will be considered in the 14 page limit length.
2. Answer each question separately. The questions, including species lists, are available in the [Word Proposal Outline](#).
3. Answers should cover benefits derived from completed grant - and match - funded work in the proposal that occurred within the past two years and will occur during the two-year Assistance Award period.
4. Do not include information/benefits/acres associated with non-match work or tracts except in Questions 7C and 7D.
5. Be as qualitative and as quantitative as possible.
6. Select the best methods to provide as much information as possible (such as giving species, abundance and seasonal use information in a table followed by a narrative), while adhering to format and proposal length guidelines.
7. Specifically explain linkages between the proposal tracts and conservation objectives (national and regional) of the following programs and plans: North American Waterfowl Management Plan (NAWMP), Partners in Flight (PIF), U.S. Shorebird Conservation Plan (USSCP), and North American Waterbird Conservation Plan (NAWCP).
8. Do not include benefits to a larger area, such as previous or future phases of the current proposal area.
9. Include all habitat types (not just wetlands).
10. Make sure acreage figures are consistent with those given elsewhere in the proposal.
11. Include only benefits from actions covered by the proposal. For example, if the proposal includes acquisition of sites that need restoration, but restoration is not part of the proposal, do not include restored habitat values in answers to the questions. Note that unless restoration is also included in the proposal, proposals for acquisition of degraded wetlands will be evaluated on the basis of the degraded condition and subsequent resource benefits.
12. If a new Matching Contributions Plan (MCP) is submitted with the proposal, include that acreage

and those benefits in your answers. However, if the MCP component is a phase of a previously approved MCP, do NOT include the associated acreage and benefits in your answers.

13. Reviewers assign points based on information in the proposal. In addition, reviewers evaluate the questions and the proposal in relation to the group of proposals under review. Scores are available approximately ten weeks after the proposal due dates.
14. Review the [U.S. Grant Administration Standards document](#) to see how Technical Assessment Question answers will be incorporated into the Assistance Award/Grant Agreement.

## TECHNICAL ASSESSMENT QUESTIONS FORMAT

---

### TECHNICAL ASSESSMENT QUESTION #1

#### How does the proposal contribute to the conservation of waterfowl habitat?

Under A, B, and C below, list species that will be affected by the grant and match work (do NOT include non-match). In the narratives that follow, succinctly explain how the proposal will impact the species.

**The responses should address the proposal area and proposal activities only. If the proposal is a phase of an ongoing project, address only the current phase activity/acreage.**

**A. High priority species:** Tule Greater White-fronted Goose, Dusky Canada Goose, Southern James Bay Canada Goose, Northern Pintail, Mottled Duck, American Black Duck, Mallard, Lesser Scaup, Greater Scaup.

**B. Other priority species:** Pacific Greater White-fronted Goose, Wrangel Island Snow Goose, Atlantic Brant, Pacific Brant, Wood Duck, Redhead, Canvasback, Ring-necked Duck, Common Eider, American Wigeon, Cackling Goose.

**C. Other waterfowl:**

**D. Narrative**

1. Describe how the proposal will aid in meeting objectives of waterfowl conservation plans.

2. For the species listed above, describe how many individuals/pairs will use the proposal area before and after the proposal is completed and for what life cycle stage(s) after the proposal is completed. Please use the abundance table below to assist you in determining priorities.

		Breeding		Migration		Wintering	
	Species	Before	After	Before	After	Before	After
High Priority							
Priority							
Other							

**Seasonal Relative Abundance Category Codes:**

Abundance Category	Up to 1,000 individuals daily encountered on:	1,000-10,000 individuals daily encountered on:	10,000+ individuals daily encountered on:
Abundant: A	-	25-75% of days	1 day +
Common: C	25+% of days	<25% of days	-
Rare: R	<25% of days	-	-

3. How will the proposal impact species affected and improve habitat quality (describe before - and after - proposal environment)?

4. What is the importance of each tract or logical groupings of tracts shown in the proposal to the species (if tracts are not yet identified, explain what procedure will be used to ensure that high quality habitat is targeted)?

=====

**TECHNICAL ASSESSMENT QUESTION #2**

**How does the proposal contribute to the conservation of other wetland-associated migratory birds?**

Using a table format (see [TAQ # 2 example](#)), succinctly describe the impact of the grant and match work on each selected species. Do NOT include benefits from non-match work, and address only non-waterfowl species.

- Which species or population will benefit and in which plan(s) is it a priority?
- How many individuals/pairs are expected to use the proposal area and, if the proposal area is being restored or enhanced, what is the expected increase in population numbers?
- How will the proposal activities positively affect the species and improve habitat quality?
- What is the importance of each tract (or logical grouping of tracts) in the proposal to the species or population, and for what life cycle stage (If tracts are not yet identified, explain what procedure will be used to ensure that the high quality habitat is targeted)?

**A. Priority bird species:**

**Identify up to ten priority bird species from the BCR lists ([Attachment A](#)) at the end of these instructions** that best demonstrate the benefits of the proposal activities to non-waterfowl species. Use habitat and population objectives from the bird conservation plans listed below (with contact information for the plan coordinators), and the species in the Bird Conservation Regions (reference the BCR lists at the end of these instructions; for more information on BCRs, see <http://nabci-us.org/resources/bird-conservation-regions-map/>)

Species/Plan	Numbers Affected	Benefits of Project	Tract Importance

--	--	--	--

**B. Other wetland-associated bird species:**

**Identify up to ten bird species not included in the priority species lists provided in Part A** above that help demonstrate the benefits of the project activities to non-waterfowl species.

Species/Plan	Numbers Affected	Benefits of Project	Tract Importance

**TECHNICAL ASSESSMENT QUESTION #3**

**How does the proposal location relate to the geographic priority wetlands described by the North American Waterfowl Management Plan, Partners In Flight, the U.S. Shorebird Conservation Plan, and/or the North American Waterbird Conservation Plan?**

**A. National priority wetland areas:**

Using the table format below, indicate how the proposed grant and match activities will address the national priority areas for wetland habitat conservation as outlined in the four major migratory bird conservation plans (North American Waterfowl Management Plan, Partners in Flight (songbirds), North American Waterbird Conservation Plan, and the U.S. Shorebird Conservation Plan).

Exact proposal location will be based on the GIS shapefile information you provide with the maps. **Do NOT include non-match activities.**

National Bird Plan Priority Areas	In	Partially In	Out
NAWMP			
PIF			
Wading Birds			
Shorebirds			

Below are additional tools for your use:

- National Migratory Bird Priority Plans and US Coastal Zone Interactive Mapper: <https://fws.maps.arcgis.com/apps/MapSeries/index.html?appid=632303c8dd8547e19b2b3198fac45078>
- North American Waterfowl Management Plan: <https://nawmp.org/>
- Partners in Flight (songbirds): <https://www.partnersinflight.org/plans/landbird-conservation-plan/>
- North American Waterbird Conservation Plan: <https://www.fws.gov/birds/management/bird-management-plans/waterbird-conservation-for-the-americas.php>
- U.S. Shorebird Conservation Plan: <https://www.shorebirdplan.org/> or <https://www.shorebirdplan.org/science/assessment-conservation-status-shorebirds/>

**B. Regional important wetland areas:**

Briefly describe how the proposed grant and match activities will address the current regional geographic priorities based on Joint Venture and other partner’s science and planning information. It is prudent to work closely with [Joint Venture staff](#) to ensure that this proposal is based on the most current science and planning for all wetland associated migratory birds.

---

**TECHNICAL ASSESSMENT QUESTION #4**  
**How does the proposal relate to the national status and trends of wetlands types?**

For more information about wetland functions, maps, the classification system/types/codes used below, and national and regional status and trends, visit the National Wetlands Inventory (NWI) website: <https://www.fws.gov/wetlands/>. Contact regional Joint Venture Coordinators for state or regional information. Not all wetland types are listed below, but they are given in the Cowardin report on the NWI website.

Complete the following table. In Section A, list the match and grant acreage by activity for each wetland type or group of types.

**DO NOT INCLUDE NON-ADD ACRES (NORMALLY INDICATED WITH PARENTHESES) OR NON-MATCH ACRES IN THIS TABLE.**

In Section B, list the acreage by type or group of types for each tract. Additionally, as indicated in the example TAQ #4, indicate the funding source for each tract (grant funds, new match funds, old match funds or a combination).

If your proposal is funded, you will be required to submit annual reports that compare actual accomplishments with the acreage figures and habitat types you give here. Additionally, you will be asked for actual accomplishments of your proposal in this format as part of your final report. This data will be used to determine the success of your proposal. See: [TAQ #4 Example](#)

**For both sections, only use those activity rows required with your proposal. Please ensure the acreage totals provided in TAQ #4 match those totals provided on the summary page.**

ACTIVITY AND TRACTS IN THE PROPOSAL	STATUS, TYPES, AND ACRES OF WETLANDS								UPLANDS	TOTAL		
	Note: Types subsidiary to types listed below have the same status.

Tract ID (funding)										
Tract ID (funding)										
Tract ID (funding)										

**Funding Categories:** (G = Grant, OM = Old Match, NM = New Match, NO = Non-Match)

**E1** = Estuarine Subtidal, **E2US** = Estuarine Intertidal Unconsolidated Shore, **E2AB** = Estuarine Intertidal Aquatic Bed, **E2Veg** = Estuarine Intertidal Vegetated (E2EM, Intertidal Emergent Marsh, E2FO, Estuarine Forested, and E2SS, Estuarine Intertidal Scrub-Shrub), **L** = Lacustrine, **M2** = Marine Intertidal, **PEM** = Palustrine Emergent, **PFO** = Palustrine Forested, **PML** = Palustrine Moss-Lichen, **PRB** = Palustrine Rock Bottom, **PSS** = Palustrine Scrub-Shrub, **PUB** = Palustrine Unconsolidated Bottom (PUB, Palustrine Unconsolidated Bottom, PAB, Palustrine Aquatic Bed, and PUS, Palustrine Unconsolidated Shore), **R** = Riverine. Upland category may include restored cropland.

Provide a brief narrative to describe upland habitats (e.g., cropland, grassland, forest) and the relationship to wetlands and migratory bird conservation (i.e., reason for including in proposal).

---

**TECHNICAL ASSESSMENT QUESTION #5**

**How does the proposal contribute to long-term conservation of wetlands and associated uplands?**

Complete the following table. In Section A, list the match and grant acreage by activity for each tenure category.

In Section B, list the acreage by tenure for each tract. Additionally, as indicated in the example TAQ #5, indicate the funding source for each tract (grant funds, new match funds, old match funds or a combination).

**Restoration and enhancement activities should not be listed under the perpetuity tenure category without exceptional and appropriate justification, relative to tenure of agreements. The expectation of maintenance does not make a restoration perpetual.**

If your proposal is funded, you will be required to submit annual reports that compare actual accomplishments with the acreage figures and habitat types you give here. Additionally, you will be asked for actual accomplishments of your proposal in this format as part of your final report. This data will be used to determine the success of your project. See: [TAQ #5 Example](#)

**For both sections, only use those activity rows required with your proposal. Please ensure the acreage totals provided in TAQ #5 match those totals provided on the summary page. Also include any non-add acres with parentheses in your proposal summary and TAQ #5 table. DO NOT INCLUDE NON-MATCH ACRES.**

Tract ID (funding)					
Tract ID (funding)					
Tract ID (funding)					

**Funding Categories:** (G = Grant, OM = Old Match, NM = New Match, NO = Non-Match)

Provide a brief narrative describing the significance of the proposal to:

- Long-term conservation and how the project area and tracts might be affected by changing environmental conditions within the next 30-50 years,
- And also how the proposed activities address, in an adaptive manner, any changes caused by changing environmental conditions change concerns.

Questions that might be discussed include:

- What national, state, or regional-level climate vulnerability/risk assessments have been conducted for the project area and what did they determine?
- Is the project area known from assessments or research to exhibit climate-resilient features or attributes?
- Are populations and the conservation status of priority species from Technical Questions #1 and #2 projected to change over the next 30-50 years?
- What climate-adaptive features or attributes do the project activities include?
- How are project activities compatible with or contribute to the U.S. Fish and Wildlife Services’ Strategic Plan for Responding to changing environmental conditions (<https://www.fws.gov/home/climatechange/>), the National Fish, Wildlife & Plants Climate Adaptation Strategy (<https://www.wildlifeadaptationstrategy.gov/>), or similar documents?

---

---

**TECHNICAL ASSESSMENT QUESTION #6**

**How does the proposal contribute to the conservation of habitat for wetland associated, Federally listed or proposed endangered species; wetland associated state-listed species; and other wetland-associated fish and wildlife that are specifically involved with the proposal?**

For more information on Federally listed species and critical habitat, visit the U.S. Fish and Wildlife Service’s Endangered Species Program website: <https://www.fws.gov/angered/>. Click on Species Information for species-specific information. Visit the Service’s Endangered Species Program contacts page <https://www.fws.gov/angered/regions/index.html> for more information in a regional or state context. Under A and B below, list species that will be affected by the grant and match work (**do NOT include non-match tracts**) and succinctly provide the additional requested information to explain how the proposal will affect the species.

**A. Federally Threatened, Endangered, or Proposed candidate species:**

How many individuals/pairs will use the proposal area and for what life cycle stage and whether this is an improvement in population numbers over the current situation:

How proposal will improve habitat quality (describe the before - and after - proposal environment):

Whether proposed actions and proposal area are identified in a recovery plan or other species plan:

Whether the completed proposal will contribute towards relieving the need for any special protective status for the species:

Importance of each tract or logical groupings of tracts in the proposal to the species (if tracts are not yet identified, explain what procedure will be used to ensure that high quality habitat is targeted):

Additional information:

**B. Wetland-dependent species of greatest conservation need (SGCN) from the appropriate State Wildlife Action Plan (SWAP):**

List a MAXIMUM OF 10 Species: Do NOT list species listed in A, TAQ #1, or TAQ #2.

*The SWAP for each State can be found here: <https://www1.usgs.gov/csas/swap/index.html>*

How many individuals/pairs will use the proposal area and for what life cycle stage and whether this is an improvement in population numbers over the current situation:

How does the species rely on wetland habitats and how does the proposal improve key habitat and community types essential to the conservation of those SGCN (describe the before- and after-proposal environment):

Do the proposed activities and/or proposal area identify factors that may assist in the restoration and improved conservation of the SGCN:

Whether the completed proposal will contribute toward reducing or eliminating the Conservation Need status for the species:

Importance of each tract or logical groupings of tracts in the proposal to the species (if tracts are not yet identified, explain what procedure will be used to ensure that high quality habitat is targeted):

Additional information:

---

---

**TECHNICAL ASSESSMENT QUESTION #7**

**How does the proposal satisfy the partnership purpose of the North American Wetlands Conservation Act?**

**A. Ratio of the Non-Federal Match to the Grant Request:**

State the ratio of the non-Federal match to the grant request (e.g., the ratio of a non-Federal match of \$1,500,000 to a \$1,000,000 grant request = 1.5:1). A 2:1 match or higher gains maximum points. To receive credit, you must submit signed Partner Contribution Statements from matching partners with the proposal.

**B. 10% Matching Partners:**

List the matching partners who contribute at least 10% of the grant request (e.g., for a \$1,000,000 grant request, list the matching partners who contribute at least \$100,000). To receive credit, you must submit signed Partner Contribution Statements from matching partners with the proposal. **It is not acceptable to lump multiple landowners to achieve the 10% match.**

**C. Partner Categories (includes non-match):**

Show the partner diversity by listing each partner (irrespective of contribution amount) under one of the following categories. To receive credit, signed Partner Contribution Statements from matching and non-matching partners must be submitted with the proposal.

**State agencies:**

**Non-governmental conservation organizations:** (e.g., local wildlife club, Ducks Unlimited, Inc., The Nature Conservancy)

**Local governments, counties or municipalities:** (e.g., Conservation District)

**Private landowners:**

**Profit-making corporations:** (e.g., Exxon)

**Native American governments or associations:**

**Federal agencies:**

**Other partner groups:**

For NAWCA purposes, a partner is defined as a group, agency, organization, or individual which participates in a specific NAWCA project as a match provider.

Non-match partners are eligible for inclusion in this section if the non-match funds are pooled with grant or match funds to accomplish acreage goals.

A partner letter is required for each partner, including non-match partners.

**D. Important Partnership Aspects (new grant recipient, significant new partners, unique partners, large numbers of partners under any category in C above, non-financial contributions):**

Briefly state any particularly significant or unique benefits that are provided by the proposal partnerships.

**E. Public Access:**

Open to public access means that any member of the public can legally enter NAWCA proposal tract/tracts subject to only modest restrictions (e.g., daylight hours only, small entry fee, etc.). Under this definition, proposal tracts may be closed during certain times of the year or certain types of activities may be limited to facilitate habitat and wildlife management (manage for hunting access, migratory bird sanctuary or other environmental impacts, etc.). In this section, please explain the nature of the public access per tract. How much acreage will be open to public access? Explain what public access activities will occur on what acres. How much acreage will be closed to public access and why?

**Public Access Scoring:** This definition will be applied to all types of proposal activity including fee acquisitions, easements, restorations, enhancements, and wetland establishments, regardless of whether the activity is funded with grant or match funds (including old match).

2, 1, or 0 points will be awarded as follows:

- 2 points – open to public hunting
- 1 point – open to other public access
- 0 points – closed to public access

## SCORING TABLE

CATEGORIES OF QUESTIONS	Points = 100
#1. WATERFOWL A. High priority species B. Other priority species C. Other waterfowl	MAXIMUM = 15 0-7 0-5 0-3
#2. WETLAND-ASSOCIATED MIGRATORY BIRDS A. Priority bird species B. Other wetland-associated bird species	MAXIMUM = 15
#3. NORTH AMERICAN GEOGRAPHIC PRIORITY WETLANDS AS RECOGNIZED BY MAJOR MIGRATORY BIRD CONSERVATION PLANS A. National geographic priority wetland areas B. Regionally important wetland areas	MAXIMUM = 15 0-9 0-6
#4. WETLANDS STATUS AND TRENDS A. Decreasing wetlands types B. Stable wetlands types C. Increasing wetlands types D. No trend data types E. Uplands	MAXIMUM = 10 0-10 0-4 0-1 0-1 0-8
#5. LONG-TERM CONSERVATION & CHANGING ENVIRONMENTAL CONDITIONS A. Benefits in perpetuity B. Benefits for 26-99 years C. Benefits for 10-25 years D. Benefits for <10 years E. Significance to long-term conservation <u>and</u> changing environmental conditions	MAXIMUM = 15 0-12 0-8 0-6 0-4 0-3
#6. ENDANGERED SPECIES AND OTHER WETLAND-DEPENDENT FISH AND WILDLIFE A. Federal endangered, threatened or proposed species = 1, 2, >2 species B. State Species of Greatest Conservation Need = <u>0-10</u> species	MAXIMUM = 10 0-3, 0-4, 0-5 0-5
#7. PARTNERSHIPS A. Ratio of non-Federal match to grant request = $\leq 1:1$ ; $>1:1 < 1.5:1$ ; $\geq 1.5:1 < 2:1$ ; $\geq 2:1$ B. Matching partners contributing 10% of the grant request = 0-1, 2, 3, > 3 C. Partner categories = 1, 2, 3, > 3 D. Important partnership aspects E. Public Access	MAXIMUM = 20 0, 1, 3, 6 0, 1, 2, 3 0, 2, 3, 4 0-5 0-2

---

---

## TRACT TABLE

Ensure that each tract involved in the proposal is consistently identified in each section of the proposal (Summary, narratives, tables, Technical Assessment Questions, etc.). For any tract(s) involved in the proposal that is/are not yet identified, complete the Tract Table as much as possible, explain why the tract(s) is/are not yet identified and describe the methods to be used to select the tract(s).

Please provide the following information for each tract:

- Tract identification (same as on the Financial Plan Table, Technical Questions 4 & 5, and on the maps submitted with the proposal). If a tract has multiple activities (e.g., Fee Acquired and Restored), then create a separate line for each activity.
- Activity Type: Fee Acquired, Fee Donated, Easement Acquired, Easement Donated, Lease Acquired, Lease Donated, Restored, Enhanced, Wetlands Established.
- Wetland acres, upland acres, and riparian miles within each tract. Any riparian acres should already be accounted for in the Wetland/Upland Acres category(ies). Be sure to also include any non-add acres in parentheses, if applicable.
- Public Access: Include the total amount of acres that will be open to public access.
- Funding category: List Grant, old match, new match, and/or non-match. Non-match should be pooled with Grant and/or match funds.
- Funding source: List NAWCA and/or abbreviated partner names.
- The county and state where the tract is located.
- A central tract location latitude/longitude point in decimal degrees (Example: 38.752906, -77.1084432).
- Title holder (name) after the proposal is completed. For easements, give both the fee and easement holders.
- Matching Contributions Plan information: Make sure tracts and acres that are part of a new Matching Contributions Plan are shown here as in the Proposal Summary; i.e., funding is apportioned according to the Matching Contributions Plan, but all acres are counted in the first proposal.
- Total acres for wetland and upland habitats, as well as the total of acres open public access.

**The tract location latitude/longitude information is mandatory.**

**Landowner and tract names must be consistent throughout the proposal.**

Below the table, complete the Final Titleholder Summary. Acreage total should match the Summary Page data.

**NOTE:** Should your proposal be awarded a grant, you will be asked for actual accomplishments of your proposal in this format as part of your final report. This data will be used in Government Performance and Results Act reporting.

### Tract Table Format

Tract ID	Activity Type	Wetland Acres	Upland Acres	Riparian Miles	Public Access	Funding Category	Funding Source	County and State	Central Tract Location in Decimal Degrees	Final Title Holder
Tract					# Open Acres					

Tract					# Open Acres					
Tract					# Open Acres					
<b>Total Acres</b>		<b>Total # Wetland Acres</b>	<b>Total # Upland Acres</b>		<b>Total # Open Acres</b>					

**Funding Categories:** (G = Grant, OM = Old Match, NM = New Match, NO = Non-Match)

**FINAL TITLEHOLDER SUMMARY:**

**Definitions from USFWS Strategic Plan 2000 – 2005:**

**Riparian:** A landscape position – lands contiguous to perennial or intermittent streams, channels and rivers. Riparian areas may include upland, wetland, and riparian plant communities. Riparian plant communities are affected by surface or subsurface hydrology of the adjacent water source. Riparian plant communities have one or both of the following characteristics: 1) distinctively different vegetative species than adjacent areas, and 2) species similar to adjacent areas but exhibiting more vigorous or robust growth forms.

**Upland:** Land or an area of land lying above the level where water flows or where flooding occurs. May include restored cropland.

**Wetland:** From Cowardin et al. 1979, Classification of Wetlands and Deepwater Habitats of the United States. -- “Wetlands are lands transitional between terrestrial and aquatic systems where the water table is usually at or near the surface or the land is covered by shallow water. For purposes of this classification wetlands must have one or more of the following three attributes: (1) at least periodically the land supports predominantly hydrophytes; (2) the substrate is predominantly undrained hydric soils; and (3) the substrate is nonsoil and is saturated with water or covered by shallow water at some time during the growing season of each year.” By definitions wetlands include areas meeting specific criteria included in the 1987 Corps of Engineers Wetlands Delineation Manual, as well as in the USDA-NRCS’s National Food Security Act Manual.

**PARTNER CONTRIBUTION STATEMENTS**

- Each matching partner (including the grantee and private landowners, if providing funds and/or donating title to property) and non-matching partner (including Federal partners) listed in the proposal must complete a Statement.
- Each statement must be submitted with the proposal before the deadline date.
- The statements must be signed and dated for the contribution to be considered documented.
- It is preferred that each partner listed in the proposal complete a statement. If this cannot be done, another party may vouch for the matching partner, but no credit will be gained in the Partnership Technical Assessment Question 7 under the categories of "10% partners" and "partner categories". These situations will be handled on a case-by-case basis.
- If you want to show support from non-funding sources, do not send statements, but instead include a statement in the proposal such as "To illustrate the overwhelming support for this proposal, we have 37 letters on file from landowners and State and Federal representatives."
- The grantee’s statement should not be a cover or transmittal sheet for the proposal.
- If the North American Wetlands Conservation Council has approved a prior Matching Contributions Plan that involves match for the current proposal, include a copy of the original approval letter or email in this section. Matching contribution plans can only be submitted for excess match associated

with the acquisition of a single tract.

- Remember that the contribution amount on the statement must be the same as the amount shown in the proposal for the partner. If the amount differs in any section of the proposal or on the statement, the lesser of the two will be considered the partner's contribution. If there are many such inconsistencies in the proposal, it will be returned as ineligible.
- The partner contribution letter template has been updated to include a question that asks if and how the project will benefit tribal hunting and fishing treaty rights. This change came in response to the House of Representatives Committee on Appropriations Report submitted to the Department of the Interior, Environment, and Related Agencies Appropriations Bill for Fiscal Year 2018 (<https://appropriations.house.gov/uploadedfiles/23918.pdf>), under the section North American Wetlands Conservation Fund (page 22).

**PARTNER CONTRIBUTION LETTER TEMPLATE**

**NORTH AMERICAN WETLANDS CONSERVATION ACT PROPOSAL  
PARTNER CONTRIBUTION STATEMENT**

**NOTE: The grantee organization that submits the original proposal and accompanying MCP is responsible for maintaining the MCP records throughout the life of the plan. That grantee organization must provide a partner letter with each proposal using the MCP match acknowledging the amount of MCP funds used and the remaining MCP balance. If you also have non-match partners associated with your project it is beneficial if a partner letter is submitted for accountability.**

**What is the title of the proposal that you are contributing to?**

**What is the name of your organization (private landowners/individuals indicate “Private”)?**

**When will you make the contribution?**

**What is the value of your contribution and how did you determine the value? Does the contribution have a non-Federal origin? If this is based on a fund-raising event or other future action, if that future action fails, will you still provide the contribution amount?**

**What long-term migratory bird and wetlands conservation work will the contribution cover?**

**Does the proposal correctly describe your contribution, especially the amount?**

**If applicable to the proposal, is your organization competent to hold title to, and manage, land acquired with grant funds and are you willing to apply a Notice of Grant Agreement or other recordable document to the property?**

**Please confirm that your contribution has not been used to meet any other federal programs match or cost share requirements.**

**Will the project benefit tribal hunting and fishing treaty rights and if so, how?**

**Do you have any additional comments?**

**Signature:**

**Name (printed), Title, and Affiliation:**

**Date Signed:**

---

---

## **MATCHING CONTRIBUTIONS PLAN (MATCH PLAN OR MCP) OPTIONAL**

You may submit a Matching Contributions Plan with a proposal when you have matching funds in addition to what you will use for this proposal and need to maintain the eligibility of this match beyond two years for future proposals. The Council will consider waiving the two-year eligibility rule based on the circumstances by which the additional match was obtained, your need, and how you will use the match. Other sections of these instructions contain information on how to apply the Match Plan dollars, acres, and natural resource benefits in future proposals. Matching contribution plans can only be submitted for excess match associated with the acquisition of a single tract.

- **What is the Match Plan Amount and Purpose?** State the amount of match that must remain eligible for future proposals (use this same amount in the lower right-hand cell of the example below) and briefly describe the conservation goals to be achieved by future proposals supported by this match.
- **What is the Match Plan Intent?** Describe how/why you obtained the additional match, including the sources (partners) and the relationship of these partners to the proposal.
- **What is the Match Plan Need?** Describe why you need this match to complete future phases of the proposal and why obtaining new match for these proposals is not feasible.
- **Is there a Match Plan Chart?** Provide a chart showing Match Plan partner contributions used in the current proposal and future proposals. (See the example.)
- **Where is the location of the MCP acquisition tract?** Describe in detail the location of the tract (city, county, state, and latitude/longitude).

See: [Optional Matching Contributions Plan Example](#)

---

---

## **PROGRAMMATIC PROJECT REQUEST OPTIONAL**

If a new grant award would fund ongoing work being done with a previously awarded grant(s), the applicant may request that the subsequent grant award be a continuation and expansion of the same grant agreement if the original (first) grant agreement is not more than 24 months old at the time of the proposal application deadline. An applicant requesting that a proposal be treated as a programmatic project, and incorporated into an existing grant agreement, must justify the request in the proposal. Relevant factors in the request include:

- The existing grant agreement number and title (must be no more than 24 months old).
- The number of proposals previously added to the existing grant agreement (a maximum of 3 awards can be combined into a programmatic project).
- The relationship between the existing and proposed project boundaries.
- How the new proposal is part of a long-term strategic planning and programmatic effort.
- How the additional project is related to warrant consideration as a continuation of the existing grant agreement.
- The evidenced progress that has been made on the original grant agreement.
- How the grantee organization and Project Officer have performed on prior and current NAWCA grants.
- The planned termination date of the revised grant agreement.

---

---

## STANDARD FORM-424 AND SF-424D INSTRUCTIONS

The SF-424D Assurances for Construction Projects, is required for all NAWCA projects (any project that involves acquisition, restoration, enhancement, or establishment is considered a construction project).

All applicants, except Federal Agencies, are required to submit a completed Application for Federal Assistance (SF-424) and Assurances Construction Programs (SF-424D) form along with their proposal application. As of December 31, 2017, Grants.gov has developed Workspace for all applicants to apply for grants. You can access and submit the forms through [www.grants.gov](http://www.grants.gov)

To learn more about Grants.gov's Workspace and how to apply for Grants, visit:

<https://www.grants.gov/web/grants/applicants/apply-for-grants.html>

Note: The address on the SF-424 #8 d must be the same as the address associated with the DUNS number.

CELL NUMBER and TITLE	INSTRUCTIONS

## MAPS

Include maps as the last attachment on your proposal narrative. Provide at least two maps: one that conveys an understanding of all conservation activities in the proposal area including federal, state, non-match and NGO conservation lands, and one that includes location of all grant and match tracts in the proposal as well as an overall proposal project area.

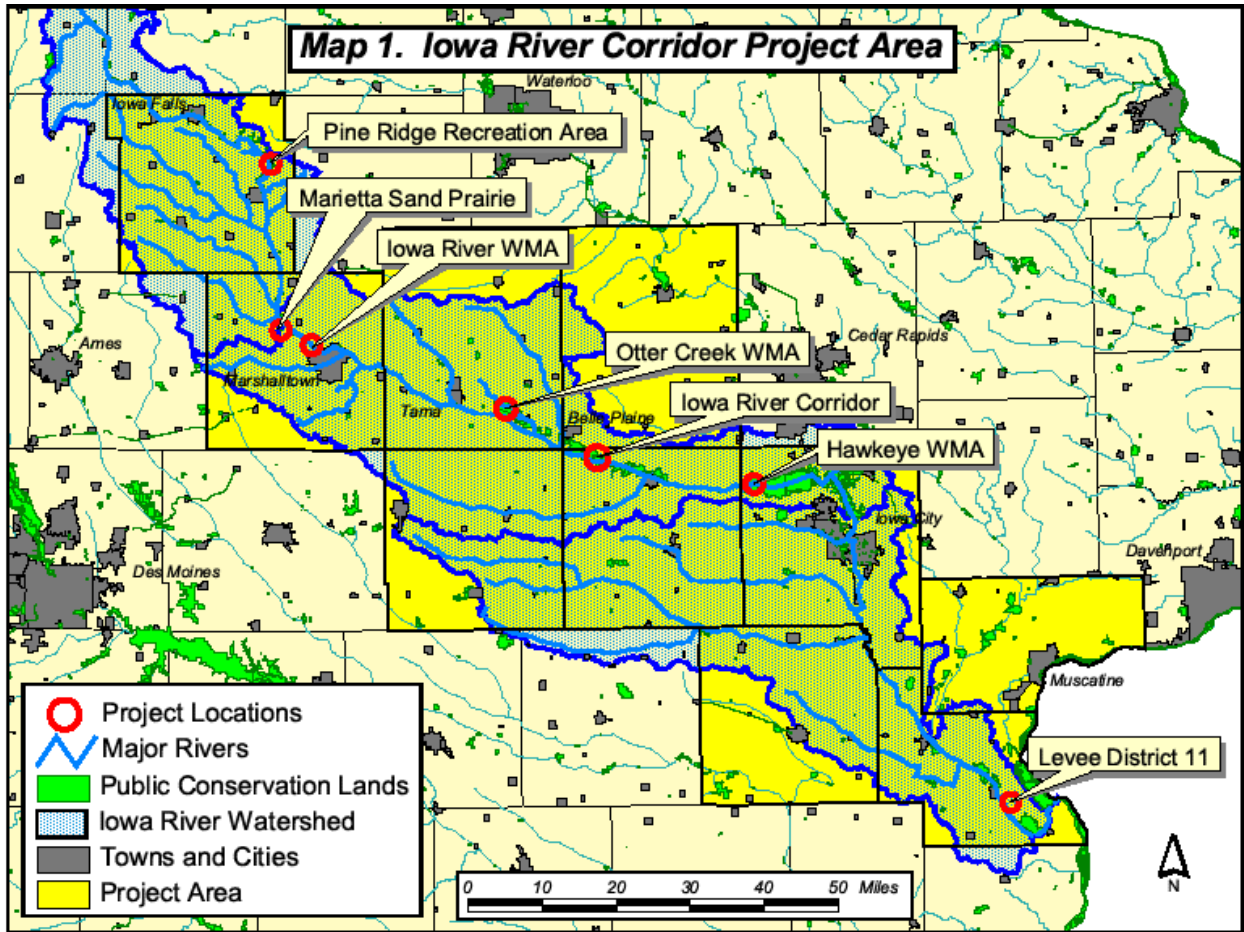

The project area is a larger, defined area that encompasses the project's tract(s). A project area can best be described as follows:

- area that is part of a wetlands conservation plan;
- areas in the same wetlands system (e.g., watershed or river basin);
- areas that are managed to meet the same wetlands objectives;
- areas that are in close proximity;
- areas that provide direct benefits to each other; or
- areas that are part of a pooled project with non-match funds, as long as the NAWCA portion is distinctly identified as an undivided interest of the total acres involved.

Three examples of maps are provided below. These maps represent large-, intermediate-, and small-scale proposal areas. Maps are critical sections of the proposal. Well-constructed and informative maps can have a significant impact on understanding the scope and significance your proposal has to wetland conservation. This understanding will be reflected in the scoring process. Your maps should include:

- Proposal title
- Location of the ENTIRE proposal area (all grant, match, and project area) within State(s) and counties
- Identification and location of all fee-title, easement and lease tracts (or acquisition priority areas, if tracts have not been identified)
- Identification and location of all restoration and enhancement tracts, major water control structures and other major restoration/enhancement features
- A legend
- Map scale
- A north directional arrow
- Location of natural features (rivers, lakes) to show how the proposal fits into the natural landscape
- Location of previous grant and future proposal sites
- If applicable and possible, where the proposal is in relation to a larger wetlands conservation project (show larger project boundary and boundary of current proposal).

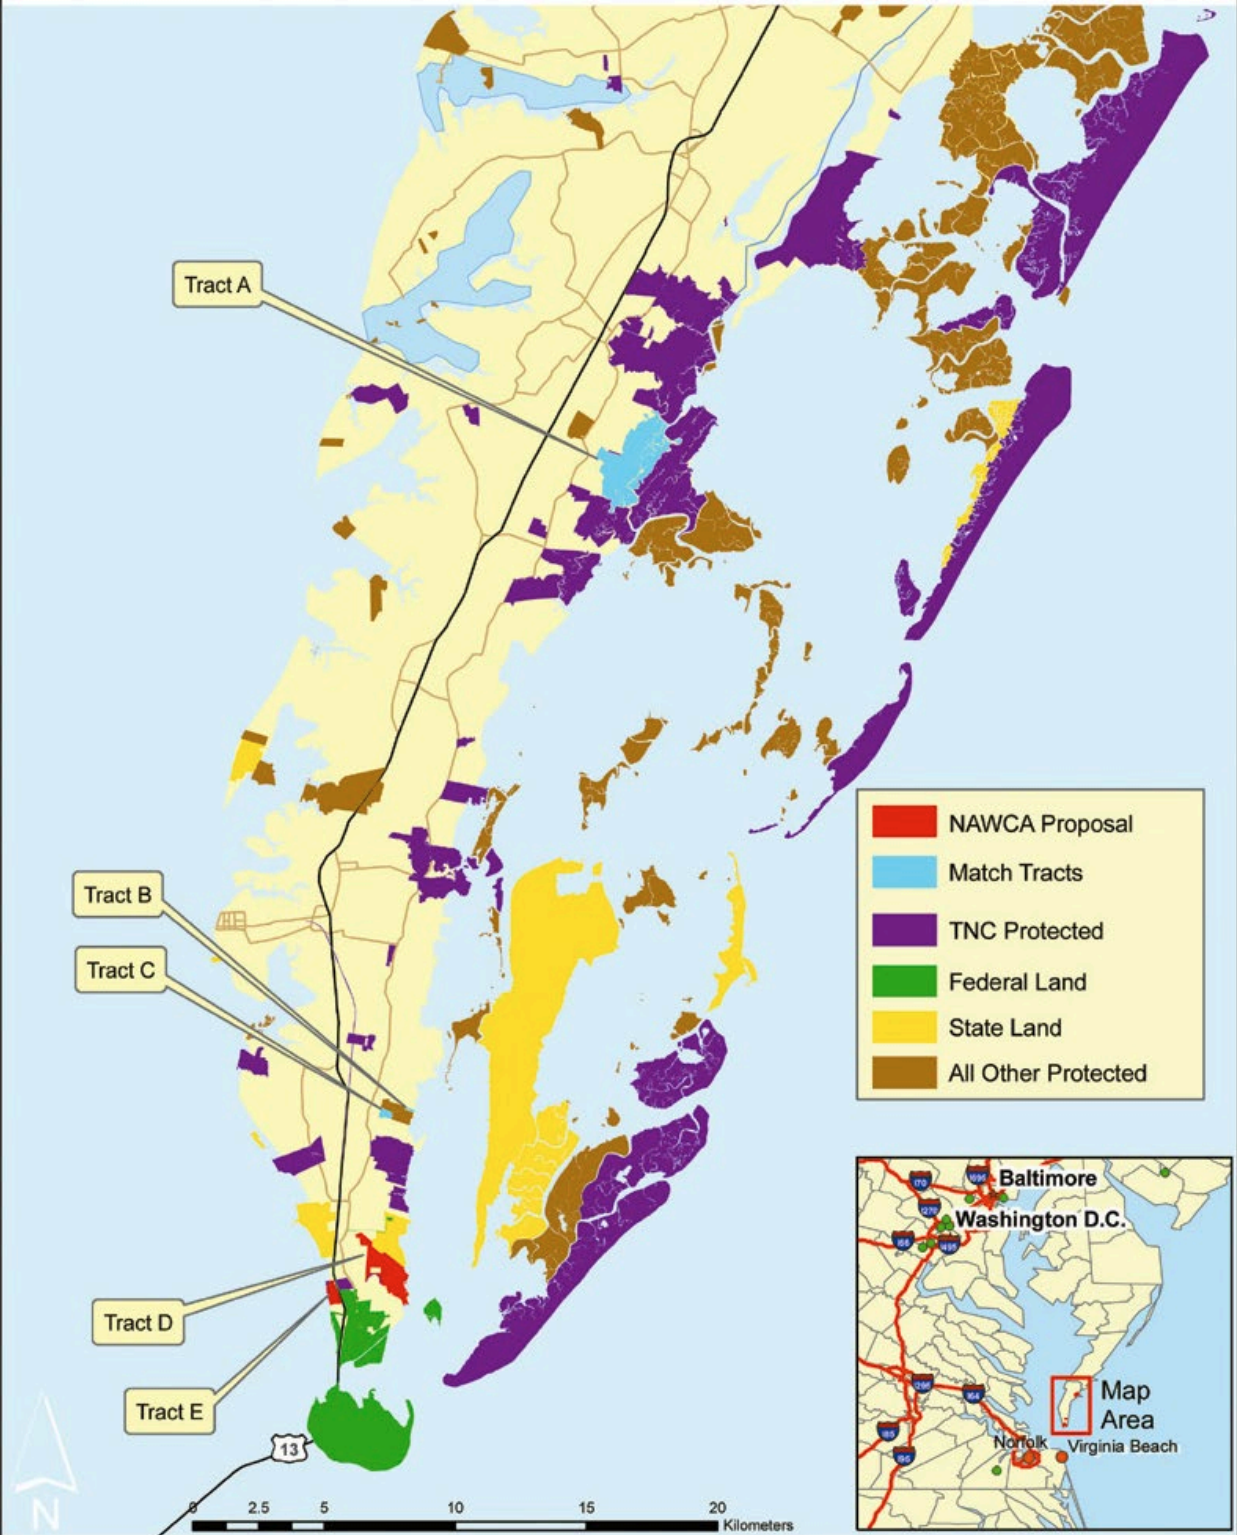

# MAP EXAMPLES

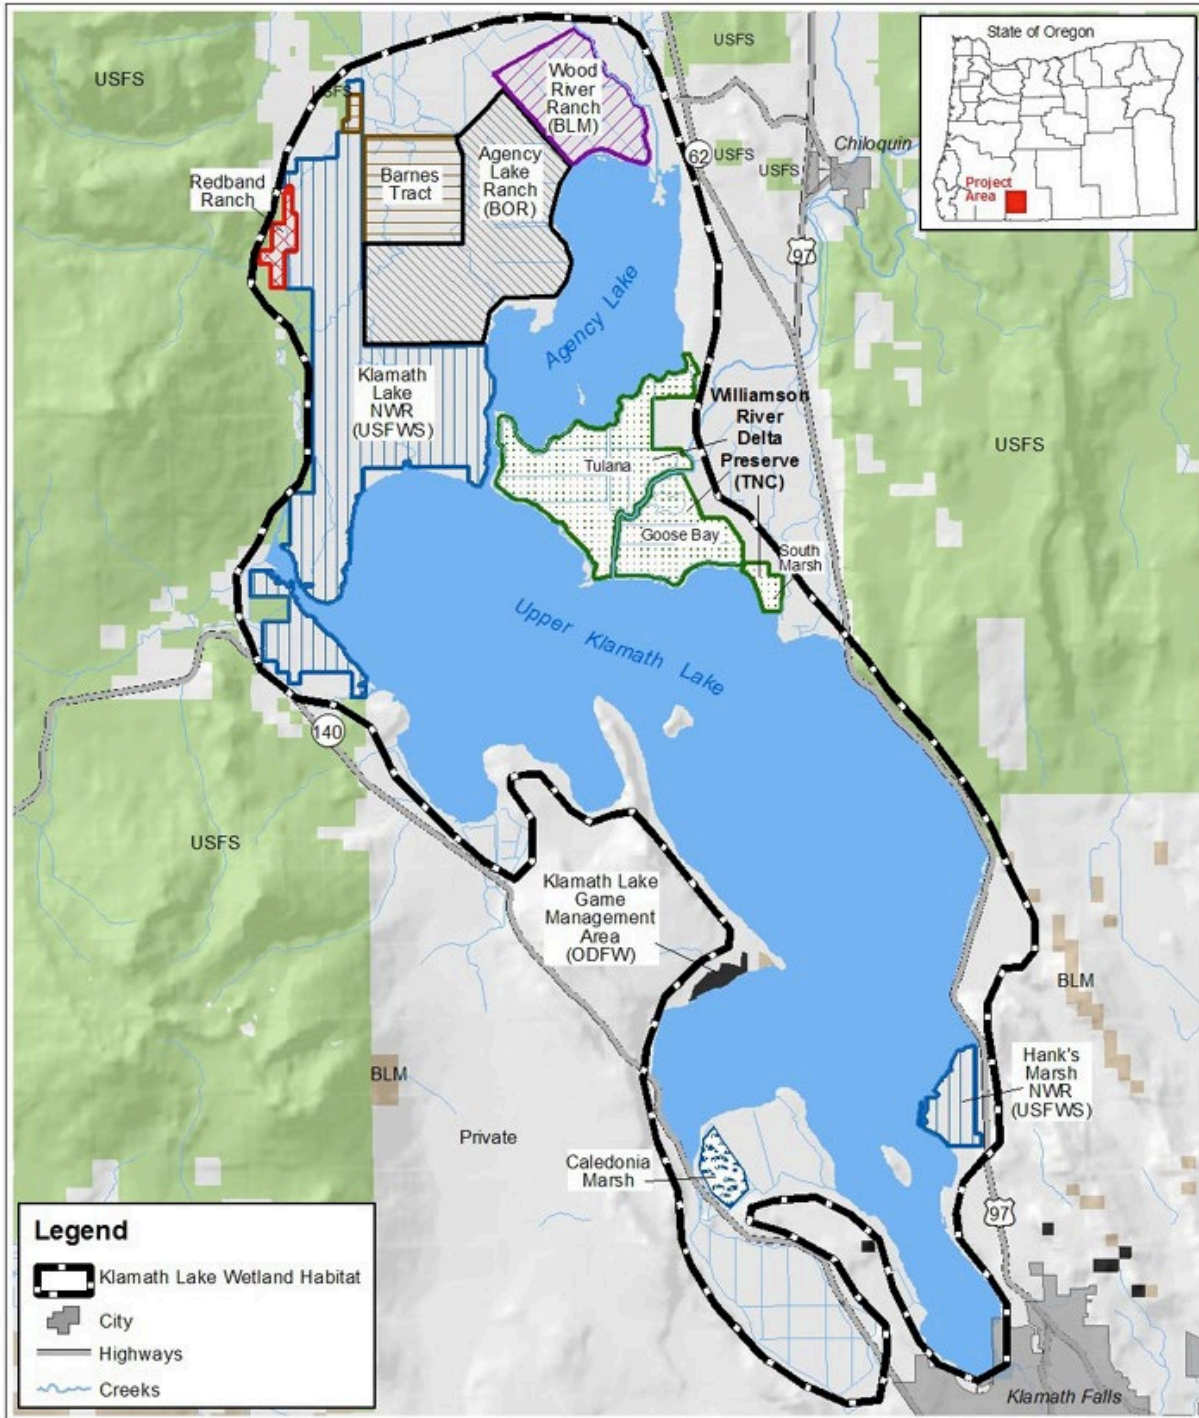

# Wetland Cooperative Conservation Initiative

Land Holdings

# KLAMATH LAKE WETLAND HABITAT

**Legend**

- Klamath Lake Wetland Habitat

---

## GIS SHAPEFILE INSTRUCTIONS

Please provide a single GIS shapefile that was used to create the maps. The shapefile submitted should use a GCS WGS 1984 projection and the attribute table should contain a name for each polygon which corresponds to a tract listed in the proposal tract table.

- Only one GIS shapefile should be submitted for each proposal. The shapefile must be a polygon(s), not points or lines.
- Submit the shapefile as a .zip file. The submitted shapefile should have these file extensions, at minimum: **.shp, .dbf, .shx, .prj, .xml**. Any other extensions that are submitted are extra, but do not delete these.
- The shapefile may contain multiple polygons representing the location of each of the tracts involved in the project - **but must, *at minimum*, contain a polygon of the overall project area.**

The attribute table should **very closely resemble the tract table**, with a few exceptions. The shapefile should contain the Project Name, Total Acreage (you do not need to break out the wetland/upland acres), and Project Area entry. Tract Name is optional if you have instead been using Tract ID throughout the proposal. The other fields are mandatory and should follow these field property *suggestions*:

- FID – *automatically assigned*
- Shape – Polygon. *If your shapefile is in Polygon ZM format, please convert it to a standard Polygon.*
- PROJ\_NAME – Text; Length: 100
- TRACT\_ID – Text; Length: 25. *Tract ID should match the ID used throughout the proposal and Tract Table. You may leave this field entry blank for the Project Area.*
- ACTTYPE – Text; Length: 50. *List the abbreviated activity per tract using this key: FA = Fee Acquired, FD = Fee Donated, EA = Easement Acquired, ED = Easement Donated, LA = Lease Acquired, LD = Lease Donated, RS = Restored, EN = Enhanced, WE = Wetland Established. You may leave this field entry blank for the Project Area.*
- TRACT\_NAME – Optional. Text; Length: 50. *You may leave this field entry blank for the Project Area.*
- ACREAGE – Double; Default Precision and Scale. *Total acreage of wetland and upland components. You may leave this field entry blank for the Project Area.*
- FUNDING – Text; Length: 50. *Funding category (Grant, Old Match, New Match, and Non-Match). You may leave this field entry blank for the Project Area.*
- COUNTY – Text; Length: 50. *You may leave this field entry blank for the Project Area.*
- STATE – Text; Length: 10. *Two letter state abbreviation. You may leave this field entry blank for the Project Area.*
- LATITUDE – Double; Default Precision and Scale
- LONGITUDE – Double; Default Precision and Scale
- HOLDER – Text; Length: 50 *Final Title Holder. You may leave this field entry blank for the Project Area.*

Any additional attribute fields submitted will be considered extra information.

For tracts that will be determined at a time after the project is funded, please still list the tract in the attribute field. Assign the tract with the same geographical boundary as the Project Area.

If you are undertaking a project where an exact activity location cannot be determined at the time of proposal (i.e. easement acquisition in the prairie potholes), then include a single polygon which encompasses the larger project area where the activities are targeted to occur.

---

---

## PROPOSAL EASEMENT, LEASES, AND INDIRECT COST RATE AGREEMENT

Have you included the following?

- **Copies of easements and leases** in place when the proposal was submitted and models/templates for easements and leases to be acquired through the proposal.
- **Negotiated Indirect Cost Rate Agreement (NICRA):** If you are requesting grant funds for indirect costs or using indirect costs as match, attach a copy of **your current approved negotiated indirect cost rate agreement** (and any other former approved negotiated indirect cost rate agreement used to determine match costs in this proposal) signed by your agency.

**PROPOSAL SUMMARY EXAMPLE**

**NOTE: This example is adapted from a previous submission.**

**NORTH AMERICAN WETLANDS CONSERVATION ACT PROPOSAL SUMMARY  
Des Moines River Valley Wetlands, Iowa**

COUNTY(IES), STATE(S), CONGRESSIONAL DISTRICT(S): Davis, Des Moines, Henry, Jasper, Jefferson, Keokuk, Lee, Lucas, Mahaska, Marion, Monroe, Polk, Van Buren, Wapello, Warren, and Washington. Iowa Congressional Districts 2 and 3.

GRANT AMOUNT \$1,000,000  
Allocation: Iowa Department of Natural Resources \$1,000,000

MATCHING PARTNERS \$3,549,100  
Grantee: Iowa Department of Natural Resources \$2,015,000  
Iowa Natural Heritage Foundation \$ 620,650  
Lee County Conservation Board \$ 789,650  
Hardwood Timberland Unlimited \$ 73,800  
Pheasants Forever, Warren County Chapter \$ 20,000  
Pheasants Forever, Iowa Capital Chapter \$ 10,000  
Pheasants Forever, Lee County Chapter \$ 10,000  
Three Rivers Conservation Foundation \$ 10,000

**In the Matching Partners indicate what partner is contributing to the matching contribution plan. If Iowa Natural Heritage Foundation is providing MCP, list MCP at the end of their title. If a partner is contributing MCP as well as additional match then include the partner name twice.**

Iowa Natural Heritage Foundation MCP \$2,500,000  
Iowa Natural Heritage Foundation \$ 50,000

GRANT AND MATCH - ACTIVITIES, COSTS AND ACRES \$4,549,100/3,327 acres  
Fee Acquired \$3,924,100/2,438 acres  
Enhanced \$ 622,000/889 acres  
Indirect Costs \$ 3,000

NON-MATCHING PARTNERS  
U.S. Fish and Wildlife Service \$50,000

PROPOSAL PURPOSE AND DESCRIPTION: This is phase 2 of 4 anticipated NAWCA proposals directed at wetland conservation projects along the main-stem tributaries of the Mississippi River which traverse central and southern Iowa. The Phase I project (Iowa River Corridor) was focused on the central and lower Iowa River. This proposal offers an equally impressive number and quality of wetland conservation projects along the Skunk and Des Moines Rivers. Through an extended planning process that began in late 2007, we have been able to target conservation activities to protection and enhancement of two of the largest wetland habitat complexes in the state of Iowa: Pool 19 on the Mississippi River and Red Rock Reservoir on the Des Moines River. Both areas are known for the large number of waterfowl and diverse assemblages of shorebirds, herons, rails, and other waterbirds they host during both spring and fall migration. In addition, we are conserving bottomland deciduous forests associated with two of Iowa’s State Forests, which represent some of the largest forested tracts in the state, and represent important habitats as both migration stopovers and breeding areas for many species of neotropical migrants.

**HABITAT TYPES AND WILDLIFE BENEFITTING:** The proposal area is an important part of a major migration corridor for waterfowl, including Lesser Scaup, and other wetland birds moving north from the Central Mississippi River to the Prairie Pothole Region (PPR) and other breeding grounds to the North and West. The proposal area includes important mid-latitude migration habitats on the Central Mississippi River, and provides similar floodplain habitats along the central and lower Des Moines and Skunk Rivers to expand on a series of large habitat complexes which serve as important migration stopover sites. The added semi-permanent wetlands and seasonally flooded mud flats and moist soil management areas will increase the number of migratory birds these areas serve during spring and fall migrations. The proposal area also supports breeding populations of a wide variety of migratory bird species, and this proposal conserves a diverse set of palustrine herbaceous and forested wetlands along with some of the best remaining mature bottomland forest as well as adding to some large blocks of tallgrass prairie. These habitats are additions to the large wetland complexes, and act to improve the water quality, aquatic vegetation, and invertebrate communities in these important migration habitats.

**PUBLIC BENEFITS/PUBLIC ACCESS:** The proposal tracts provide excellent access to wetland habitats and serve as much needed stages for both structured and unstructured opportunities to experience, appreciate, and learn about Iowa's native floodplain wetland habitats and the benefits of reconnecting the river to its floodplain. Activities in this proposal will provide significant improvements in flood control and water quality through wetland and grassland habitat restoration which include conversion of row crop agriculture within and adjacent to the floodplain of the Des Moines and Skunk Rivers. Every tract included in this project will be open to public access, however, some consumptive and passive use restrictions may apply. Public fishing, swimming, hiking, bird watching, natural resource interpretation, scientific education and research and scenic enjoyment are permitted.

**NEW PARTNERS:** This project marks a new partnership with the Lee and Warren County Conservation Boards. The significant work of these two county conservation organizations and the local citizens, businesses and conservation groups with which they work was the impetus for initiating this grant request. During the preparation of this proposal, several additional conservation opportunities have been identified that would not have been recognized were it not for this new partnership. The Des Moines River Valley project combines the work of these new partners with the efforts of some of the strongest conservation organizations operating in Iowa, including the Iowa Natural Heritage Foundation, Pheasants Forever, and the Iowa Department of Natural Resources Wildlife Bureau. This is the first NAWCA project that includes partnership with Iowa's State Forest Program. This new NAWCA partnership is a result of several recent cooperative ventures between the Forestry and Wildlife Bureaus aimed at improving forest management and bird habitat on Iowa's deciduous upland and bottomland forests, and represents one of the greatest opportunities for expansion of bird conservation in Iowa.

**RELATIONSHIP TO PREVIOUSLY FUNDED NAWCA PROPOSALS:** This project complements four other completed and ongoing NAWCA proposals that have focused on creating large functional wetland complexes within central Iowa. This project also complements long-standing cooperative agreements between the DNR and USFWS for the expansion of Iowa's Waterfowl Production Areas.

**THREATS AND SPECIAL CIRCUMSTANCES:** Major threats to Iowa's wetlands today include: non-point source pollution, silt accumulation, increased surface flows and drainage inputs, exploding rough fish populations and a general lack of infrastructure needed to adequately maintain and manage these sites. As the health and biological integrity of these wetlands continues to deteriorate, future restoration and enhancement efforts will only become increasingly more difficult and expensive. A significant match contribution (Iowa DNR - \$2,015,000) will be lost if this proposal is not funded this year.

**WORK PLAN EXAMPLE**

NOTE: This Work Plan example lists only two of the acquisition tracts involved (all tracts are shown in the TAQ 4, TAQ 5, and Tract Table examples).

**WORK PLAN (FINANCIAL PLAN JUSTIFICATION)**

**TRACT 1 - Jones**

**OVERALL ACRES AFFECTED: 459**

**CENTRAL LOCATION: 40.587980, -91.393166**

**STATE/FED AGENCIES HOLDING INTERESTS: Lee County (IA) Conservation Board**

**Acreeage Summary of Grant/Match Activities on the Tract:**

**Acquisition: 459      Restoration:      Enhancement:      Establishment:**

**Describe all grant/match activities occurring on the tract here:** Grant and match funds will be used to acquire 459 acres of palustrine emergent, palustrine forested, and lacustrine wetlands as part of the Lee County Conservation District. The property is currently privately owned and unavailable to the public. By acquiring the tract, the Conservation District will be able to better manage a large, contiguous block of habitat for wildlife and provide conservation-compatible recreational opportunities for the public.

**Tract 1 - Jones: Acquisition Financial Plan Justification - \$785,000 and 459 acres  
Grant - \$180,000      Match - \$605,000      Non-Match - \$\_\_\_\_\_ Completion: May 2011**

LAND ACQUISITION DISCLOSURE

**TRACT 2 - Nordberg**

**OVERALL ACRES AFFECTED: 438**

**CENTRAL LOCATION: 40.546688, -91.421373**

**STATE/FED AGENCIES HOLDING INTERESTS: Lee County (IA) Conservation Board**

**Acreeage Summary of Grant/Match Activities on the Tract:**

**Acquisition: 438      Restoration:      Enhancement:      Establishment:**

**Describe all grant/match activities occurring on the tract here:** Grant and match funds will be used to acquire 438 acres of palustrine emergent and lacustrine wetlands as part of the Lee County Conservation District. The property is currently privately owned and unavailable to the public. By acquiring the tract, the Conservation District will be add to a network of wildlife habitats and reduce conflicts with the public over land management activities such as burning. The tract will also provide another location for safe, conservation-compatible public recreation such as bird-watching, fishing, and hunting.

**Tract 2 – Nordberg: Acquisition Financial Plan Justification - \$850,300 and 438 acres**  
**Grant - \$45,000      Match - \$805,300      Non-Match - \$ \_\_\_\_\_      Completion: June 2011**

**TRACT 9 - Red Rock Mgmt. Unit**

**OVERALL ACRES AFFECTED: 429**

**CENTRAL LOCATION: 41.499867, -93.321698**

**STATE/FED AGENCIES HOLDING INTERESTS: Iowa DNR**

**Acreeage Summary of Grant/Match Activities on the Tract:**

**Acquisition:      Restoration:      Enhancement: 429      Establishment:**

**Describe all grant/match activities occurring on the tract here:** Grant, match, and non-match funds will be used to enhance a 429-acre moist soil unit. Enhancement will involve soil grading and planting to improve water flow and diversity of habitats on the unit. Palustrine emergent, palustrine forested, and palustrine scrub-shrub habitats will be enhanced. All physical enhancements will require no maintenance

and be largely self-sustaining. Success of plantings will be monitored for 5 years following planting, with partial re-planting if failure exceeds 30%.

**Tract 9 - Red Rock Mgmt. Unit: Enhancement Financial Plan Justification - \$350,000 and 429 acres**  
**Grant - \$175,000 Match - \$150,000 Non-Match - \$25,000 Completion: Sept 2012**

Tract 11 Unidentified Tracts	Fee Acquired	65.0	153.0	1.0	218	G,NM	NAWCA, IDNR	16 county proposal area, Iowa	41.124510, -92.373827	IDNR, WCCB, LCCB
<b>Total Acres</b>		<b>2,146</b>	<b>1,181</b>		<b>2,358</b>					

**FINAL TITLEHOLDER SUMMARY: LCCB - 897 acres; USFWS - 889 acres; IDNR - 781 acres; WCCB - 542 acres; IDNR/WCCB/LCCB - 218 acres tbd.**

---

---

**OPTIONAL MATCHING CONTRIBUTION PLAN EXAMPLE**

**NOTE:** The tract name and specific location are fictional in this example. The descriptions have been adapted from previous submissions.

**What is the Match Plan Amount and Purpose?** This matching contribution plan seeks to maintain the eligibility of \$2,500,000 in non-federal funds for use as match in two future proposals that will be submitted over the next five years for wetland conservation work in the Iowa River Corridor. Those proposals will include habitat protection, restoration, and enhancement and will likely incorporate major work elements related to improving priority wetland habitat for migratory birds.

**What is the Match Plan Intent?** Iowa Natural Heritage Foundation (INHF) is participating in this proposal as a 10% partner by contributing \$2,500,000 of eligible match from a fee-title land protection project. The remaining balance of match funds from the 1,126 acre Tract 12 - Elk Creek Meadows acquisition (\$2,500,000) will provide a foundation of match for two more NAWCA proposals that will focus on priority wetland habitat for migratory birds in the Iowa River Corridor.

**What is the Match Plan Need?** Non-federal match is difficult to secure and is becoming scarcer as state funding for conservation work becomes more competitive. It is very unlikely that without approval of this matching contribution plan that sufficient non-federal match will be available for two more NAWCA proposals. Approval of this matching contributions plan will establish the financial foundation to accomplish priority wetland conservation work in the Iowa River Corridor. This future work will further support the long-term wetland conservation objectives defined in the Upper Mississippi River/Great Lakes Region Joint Venture implementation plan.

**Is there a Match Plan Chart?** Yes, see chart below.

**Where is the location of the MCP acquisition tract?** Tract 12 - Elk Creek Meadows is a 1,126 acre fee-title acquisition located in Marion County, Iowa (41.401477, -93.078003). The tract will be incorporated as a unit of Elk Rock State Park.

<b>Match Plan Partner</b>	<b>Current Proposal</b>	<b>Proposal II</b>	<b>Proposal III</b>	<b>Total \$</b>
Iowa Natural Heritage Foundation	\$2,500,000	\$1,500,000	\$1,000,000	\$5,000,000
<b>Current Proposal Total</b>	<b>\$2,500,000</b>			
<b>MCP Future Total</b>		<b>\$1,500,000</b>	<b>\$1,000,000</b>	<b>\$2,500,000</b>
