Authority: Section 340E of the Public Health Service Act.

## EXECUTIVE SUMMARY

**Children's Hospitals Graduate Medical Education (CHGME) Payment Program** funds freestanding children's hospitals to support the training of pediatric and other residents in graduate medical education (GME) programs. This program addresses the difference in explicit federal GME funding between freestanding children's teaching hospitals and other teaching hospitals supported by the Centers for Medicare and Medicaid Services (CMS).

**To be eligible for CHGME funding**, by statute (Public Law 106-310) and in accordance with the Federal Register Notice (FRN), Vol. 66, No.41 published March 1, 2001, a children's hospital must meet all of the criteria specified in Section III.1. of this announcement.

The CHGME Payment Program requires two submissions during the Federal fiscal year: (1) an initial application to determine *interim payments*, and (2) a reconciliation application to finalize the number of full time equivalent (FTE) resident counts and subsequently determine *final payments*.

HRSA will use a two-tier (phases) submission process for the initial CHGME applications via Grants.gov and the HRSA's Electronic Hand Book (EHB):

- **Phase 1 - Grants.gov** – Application Form (SF-424 R&R Form) must be submitted via Grants.gov with a due date of **July 13, 2012**.
- **Phase 2 - HRSA EHBs** – Registering in the HRSA EHB and completing data forms HRSA 99; 99-1; 99-2; 99-3; 99-4; and 99-5, as well as required Attachments; the data forms must be submitted via the HRSA's EHBs with a due date on or before **August 1, 2012**.

# **I. Funding Opportunity Description**

## **1. Purpose**

This announcement solicits applications for the Children’s Hospitals Graduate Medical Education (CHGME) Payment Program. Federal funding for graduate medical education (GME) is primarily provided by the Centers for Medicare and Medicaid Services (CMS). Prior to the enactment of the CHGME Payment Program, children’s teaching hospitals received a disproportionately low amount of Federal funding when compared to teaching hospitals that serve adult patients. The purpose of the CHGME Payment Program is to compensate for the disparity in the level of Federal funding for freestanding children teaching hospitals versus other types of teaching hospitals. The CHGME Payment Program is administered by the Bureau of Health Professions (BHP), Health Resources and Services Administration (HRSA), Department of Health and Human Services (DHHS).

## **2. Background**

BHP aims to improve the health status of the population by providing national leadership and resources to develop, distribute and retain a diverse, culturally competent health workforce that provides the highest quality care for all, especially the underserved. The CHGME Payment Program supports the vision, missions and goals of HRSA as well as those of BHP. BHP oversees several grant programs that provide financial support to students in health professions programs, provide continuing education to current health professionals, and foster the development of curricula that promote quality health care.

The nearly 60 freestanding children’s teaching hospitals across the country train about 30 percent of the nation’s pediatricians, nearly half of all pediatric sub-specialists, and provide valuable training for physicians in many other specialties. These are the physicians who care for America’s youngest population - its children. Representing about one percent of all short-term acute care hospitals, these hospitals provide almost 50 percent of the patient care to low-income children, including those covered by Medicaid and those who are uninsured. In addition, these hospitals are regional and national referral centers for critically ill children, often serving as the only source of care for many critical pediatric services. More than 75 percent of inpatient care at children’s hospitals is devoted to children with one or more chronic conditions. This program provides the funding needed to support children’s hospitals in providing residency training.<sup>1</sup>

The CHGME Payment Program is designed to support the three prong social missions of freestanding children’s teaching hospitals that acquiesce with the social mission of medical education<sup>2</sup>:

---

<sup>1</sup> Supporting Children’s Hospitals and Children Health: The Role of the Federal “CHGME” Program. Prepared by The Lewin Group for the National Association of Children’s Hospitals, September 5, 2006.

<sup>2</sup> Financing Graduate Medical Education to meet the need of Children and the future of the Pediatrician workforce. Pediatrics, Volume 121, Number 4, April 2008.

- Educate and train future pediatricians, pediatric sub-specialists, and other non-pediatric residents
- Provide care for vulnerable and underserved children, and
- Conduct innovative and valuable pediatric research.

Funding children's hospitals is at the core of HRSA's mission of improving and expanding culturally competent quality health care and providing care to the underserved.

In 1999, Congress addressed the difference of explicit GME funding between freestanding children's teaching hospitals and other teaching hospitals by passing the Healthcare Research and Quality Act, which established the CHGME Payment Program. There have been several amendments, and in October 2006, Congress reauthorized the CHGME Payment Program (Pub.L. 109-307) for a period of five years. In fiscal year (FY) 2012, Congress appropriated \$268 million for the CHGME Payment Program.

## **II. Award Information**

### **1. Type of Award**

Funding is in the form of a formula grant. The funds available for the CHGME Payment Program are distributed among participating eligible children's hospitals.

While traditionally CHGME has made two monthly grant payments, one for Direct Medical Education (DME), and one for Indirect Medical Education (IME), the FY 2013 President's Budget proposes that only direct payments be made. Each of the payments is determined by formula and is subject to a zero sum gain payment model. A zero sum gain model is one where a hospital receives CHGME funding proportional to number of residents its training for direct medical education, and CHGME funding proportional to the severity of illness of its inpatients, and the number of residents it trains for indirect medical education payments. Current formulas account for the number of FTE residents trained, the number of discharges, severity of illness, and the number of inpatient available beds. Furthermore, the formulas account for geographic variations in costs captured by a hospital specific-wage index and labor related share as determined by CMS regulations and respective CHGME guidance and policies. See APPENDIX A for a more thorough description of the payment methodology. Data related to indirect medical education will continue to be collected and used for funding based on the 2013 Congressional appropriation. If Congress adopts the President's proposal, the data will be collected not for payment purposes, but for administrative and analytical needs.

### **2. Summary of Funding**

This program will provide funding during Federal Fiscal Year 2013. The project period is one (1) year. Funding is dependent on the availability of funds and will be determined

based on Congressional appropriated dollars. In FY 2011 and FY 2012 the Congressional appropriation was about \$268 million. Funds are restricted to eligible and participating children's hospitals. Traditionally funds were for direct expenses and indirect expenses (DME and IME respectively) associated with operating approved graduate medical residency programs. In FY 2013, the President's budget proposes funding DME only.

### **III. Eligibility Information**

#### **1. Eligible Applicants**

Applicants (children's teaching hospitals) must meet all of the following eligibility requirements:

- 1) Participates in an approved graduate medical residency training program;
- 2) Has a Medicare Provider Number;
- 3) Is excluded from the Medicare inpatient prospective payment system (PPS) under section 1886(d)(1)(B)(iii) of the Social Security Act, and its accompanying regulations, and
- 4) Is a freestanding children's hospital.

#### **Beneficiary Eligibility:**

Any public or private nonprofit and for-profit children's teaching hospital with an accredited residency training program which meet all the above eligibility requirements may apply. Children's hospitals applying for CHGME payment grant funds must be training residents during the Federal Fiscal Year for which they apply for funds.

#### **2. Cost Sharing/Matching**

Cost sharing or matching is not applicable to this program.

#### **3. Other**

##### *Credentials/Documentation*

Payments will be determined in compliance with all mandates, rules, regulations, policies, and guidance guiding the program.

## **Documentation Recommendations**

Hospitals are responsible for the accuracy of application data submitted to HRSA and are subject to audit. Hospitals are not required to submit documentation with their initial application to support resident counts reported on their CHGME Payment Program application. However, hospitals should be prepared to produce documentation in accordance with 42 CFR 413.75(d) in any subsequent audit carried out by the Department or its delegate. The CHGME Payment Program has in place a Resident FTE Assessment (audit) process. Assessment of the resident FTE counts is conducted by auditors each Federal Fiscal Year between October and March. The results of these assessments are the basis for the hospitals' reconciliation applications. The audit methodology complies with the requirements under 42 CFR 413.75 (d) and parallels a similar GME audit process carried out by the CMS to adjudicate the number of residents training in adult teaching hospitals. Children's hospitals that do not report resident FTE counts to Medicare are **not exempt** from this policy. The information (*documentation in support of residents included in the resident FTE count for a particular cost reporting period*) must be certified by an official of the hospital and, if different, an official responsible for administering the residency program. All Medicare affiliation agreements must have a Center for Medicaid and Medicare (CMS) letter attached (Attachment 2 in the EHBs) indicating that the agreement was submitted and approved on or before the July 1 deadline.

## **IV. Application and Submission Information**

### **1. Address to Request Application Package**

#### **Application Materials**

HRSA *requires* applicants for this funding opportunity announcement to apply electronically through Grants.gov. This robust registration and application process protects applicants against fraud and ensures that only authorized representatives from an organization can submit an application. Applicants are responsible for maintaining these registrations, which should be completed well in advance of submitting your application. All applicants *must* submit in this manner unless the applicant is granted a written exemption from this requirement in advance by the Director of HRSA's Division of Grants Policy. Applicants must request an exemption in writing from [DGPPWaivers@hrsa.gov](mailto:DGPPWaivers@hrsa.gov), and provide details as to why they are technologically unable to submit electronically through the Grants.gov portal. Your email must include the HRSA announcement number for which you are seeking relief, the organization's DUNS number, the name, address, and telephone number of the organization and the name and telephone number of the Project Director, as well as the Grants.gov Tracking number (GRANTXXXX) assigned to your submission, along with a copy of the "Rejected with Errors" notification you received from Grants.gov. **HRSA and its Digital Services Operation (DSO) will only accept paper applications from applicants that received prior written approval.** However, the application must

still be submitted under the deadline. Suggestion: submit application to Grants.gov at least two days before the deadline to allow for any unforeseen circumstances.

Note: Central Contractor Registration (CCR) information must be updated at least every 12 months to remain active (for both grantees and sub-recipients). As of August 9, 2011, Grants.gov began rejecting submissions from applicants with expired CCR registrations. Although active CCR registration at time of submission is not a new requirement, this systematic enforcement will likely catch some applicants off guard. According to the CCR Website it can take 24 hours or more for updates to take effect, so ***check for active registration well before your grant deadline.***

An applicant can view their CCR Registration Status by visiting <http://www.bpn.gov/CCRSearch/Search.aspx> and searching by their organization's DUNS. The [CCR Website](#) provides user guides, renewal screen shots, FAQs and other resources you may find helpful.

Applicants that fail to allow ample time to complete registration with CCR and/or Grants.gov will not be eligible for a deadline extension or waiver of the electronic submission requirement.

All applicants are responsible for reading the instructions included in HRSA's Electronic Submission User Guide, available online at <http://www.hrsa.gov/grants/apply/userguide.pdf>. This Guide includes detailed application and submission instructions for both Grants.gov and HRSA's Electronic Handbooks. Pay particular attention to Sections 2 and 5 that provide detailed information on the competitive application and submission process.

Applicants are also responsible for reading the Grants.gov Applicant User Guide, available online at <http://www.grants.gov/assets/ApplicantUserGuide.pdf>. This Guide includes detailed information about using the Grants.gov system and contains helpful hints for successful submission.

Applicants must submit CHGME applications according to the instructions in the Guide and in this funding opportunity announcement in conjunction with Application Form 424 Research and Related (SF-424 R&R short form.) The forms contain additional general information and instructions for applications, proposal narratives, and budgets. These forms may be obtained from the following sites by:

- 1) Downloading from [www.grants.gov](http://www.grants.gov), or
- 2) Contacting the HRSA Digital Services Operation (DSO) at:  
[HRSADSO@hrsa.gov](mailto:HRSADSO@hrsa.gov)

Each funding opportunity contains a unique set of forms and only the specific forms package posted with an opportunity will be accepted for that opportunity. Specific

instructions for preparing portions of the application that must accompany the SF-424 R&R Short Form appear in the “Application Format” section below.

## 2. Content and Form of Application Submission

### Application Format Requirements

**The following are steps to apply to the CHGME Payment Program. HRSA will use a two-tier (phases) submission process for the CHGME applications via Grants.gov (Phase 1) and the HRSA EHBs (Phase 2):**

- **Phase 1. Grants.gov application** - Completed SF-424 R&R Short Form must be submitted via <http://www.Grants.gov> with a due date of no later than July 13, 2012.

Once the Grants.gov application has been successfully submitted to Grants.gov, the applicant will receive an email from HRSA within 7 business days. This email will provide instructions and necessary information needed to access your application through HRSA’s Electronic Handbooks (HRSA’s EHBs). This email will be sent to the authorizing official, the business official, the point of contact and the project director listed on the face page of the Grants.gov application.

- **Phase 2. HRSA’s EHBs:** registration and applications must be complete and successfully submitted by 5:00 PM ET on the applicable due date. Please note that applicants can only begin Phase 2 in HRSA’s EHBs after Phase 1 in Grants.gov has been completed by the applicable due date and HRSA has assigned the application a tracking number.

For information on registering in HRSA’s EHBs, please refer to <http://www.hrsa.gov/grants/userguide.htm> or call the HRSA Call Center at 1-877-464-4772. If you do not complete the registration process, you will be unable to submit an application. **HRSA recommends that applications be submitted in Grants.gov as soon as possible to ensure that maximum time is available for providing the supplemental information in HRSA’s EHBs.**

After the EHB registration is complete, the applicant will then proceed and access the CHGME HOME within the EHB to complete the CHGME application for funds. The CHGME Payment Program Forms and Information must be submitted via HRSA’s EHBs website with a due date of on or before August 1, 2012.

Copies of HRSA 99; 99-1; 99-2; 99-3; 99-4; 99-5 are included in the application guidance for your reference (APPENDIX B). **Do not include these tables as part of the Grants.gov application submission** since you will be entering the data online in the HRSA EHBs by accessing the CHGME web application as part of Phase 2.

## **CHGME Application Format**

The CHGME application includes six forms:

- a) A demographic and contact information form (HRSA 99)
- b) Determination of weighted and unweighted resident FTE count form (HRSA 99-1)
- c) Data related to the training of residents, and the care of pediatric patients such as severity of illness form (HRSA 99-2)
- d) Assurance/certification attestation form (HRSA 99-3)
- e) Government Performance Results Act (GPRA) data (HRSA 99-4); and,
- f) The application checklist (HRSA 99-5).

The aforementioned documents are available electronically on the EHBs and will continue to utilize web based submission of the CHGME application.

For children's teaching hospitals that file full Medicare Cost Reports, a copy of the respective sections of the Medicare cost reports and signed copy of the (HRSA 99) and the (HRSA 99-3) should be attached as a PDF to the electronic application in the EHB. If your hospital has one or multiple Medicare affiliation agreement(s) that modifies the "1996 Cap", a copy of the Medicare affiliation agreements should be included as a PDF attachment, including a letter showing that the affiliation agreements were submitted to CMS for approval on or before July 1. A comprehensive FTE resident assessment is conducted each fiscal year for all children's hospitals applying for funds.

Applications for funding must consist of the following documents in the following order:

## SF-424 R&R Short Form – Table of Contents

### Phase 1: Submission through Grants.Gov

-  It is mandatory to follow the instructions provided in this section to ensure that your application can be printed efficiently and consistently for review.
-  Failure to follow the instructions may make your application non-responsive. Non-responsive applications will not be considered under this funding opportunity announcement.

-  For electronic submissions, applicants only have to number the electronic attachment pages sequentially, resetting the numbering for each attachment, i.e., start at page 1 for each attachment. Do not attempt to number standard OMB approved form pages.
-  For electronic submissions, no Table of Contents is required for the entire application. HRSA will construct an electronic table of contents in the order specified.

Application Section	Form Type	Instruction	HRSA/Program Guidelines
SF-424 R&R Cover Page	Form	Pages 1 & 2 of the R&R face page	Number of pages is not applicable to this FOA.
Pre-application	Attachment	Can be uploaded on page 2 of SF-424 (R&R) - Box 20	Not Applicable to HRSA; Do not use
Project/Performance Site Location(s)	Form	Supports primary and 29 additional sites in structured form.	Number of pages is not applicable to this FOA.
Disclosure of Lobbying Activities (SF-LLL)	Form	Supports structured data for lobbying activities.	Number of pages is not applicable to this FOA.

-  After successful submission of the Application Forms in Grants.gov (Phase 1), and subsequent processing by HRSA, you will be notified by HRSA confirming the successful receipt of your application. This notification is expected within seven business days from the date of submission in Grants.gov.
-  If you do not receive notification within seven business days after submission in Grants.gov, contact the HRSA Contact Center at 877-GO4-HRSA (877-464-4772), 24 hours per day, 7 days per week, or email [callcenter@hrsa.gov](mailto:callcenter@hrsa.gov). Please have your Grants.gov tracking number at hand.
-  Your application will not be considered compliant unless you review and submit the required Attachments in HRSA's EHBs (Phase 2).

Note the following specific information related to your submission. Understand that for your application, only the forms mentioned in the Table of Contents listed above are submitted through Grants.gov. All supplemental information, including all Attachments, will be submitted through the HRSA EHBs.

**Phase 2: Submission through HRSA’s Electronic Handbooks (EHBs)**

 It is mandatory to follow the instructions provided in this section to ensure that your application can be printed efficiently and consistently for review.

 Failure to follow the instructions may make your application non-responsive. Non-responsive applications will not receive further consideration in the application review process and those particular applicants will be notified.

 For electronic submissions, applicants only have to number the electronic attachment pages sequentially, resetting the numbering for each attachment, i.e., start at page 1 for each attachment. Do not attempt to number standard OMB approved form pages.

 For electronic submissions, no table of contents is required for the entire application. HRSA will construct an electronic table of contents in the order specified.

 When providing any electronic attachment with several pages, add table of content page specific to the attachment.

 Merge similar documents into a single document. Where several pages are expected in the attachment, ensure that you place a table of content cover page specific to the attachment.

Application Section	Form Type	Instruction	HRSA/Program Guidelines
Application for Federal Assistance CHGME Payment Program Application HRSA 99- Application face page demographic and contact information	Form	Pages 1, 2, 3, 4 & 5 of the HRSA 99 page.	Required. Number of pages is not applicable in this case.  If you received funding for this program last year, in Box 8, select “ <b>Renewal</b> ” and in Box 4 enter your grant number from Box 4b of the Notice of Award.  If you did not receive funding for this program last year, use “ <b>New</b> ”.
HRSA 99-1- determination of weighted and unweighted resident FTE counts			Rules, regulations, and polices are detailed in the web application guidance
HRSA 99-2- data related to the teaching of residents and related patient care measures			Rules, regulations, and polices are detailed in the web application guidance
HRSA 99-3 assurance/certification attestation			Needs to be completed, printed, signed and mailed to the CHGMETB
HRSA 99-4 performance data tables			To be submitted only at reconciliation

Application Section	Form Type	Instruction	HRSA/Program Guidelines
HRSA 99-5 the application checklist			

 **To ensure that attachments are organized and printed in a consistent manner, follow the order provided below. Note that these instructions may vary across programs.**

-  **Evidence of Non Profit status and invention related documents, if applicable, must be provided in the other attachment form.**
-  **Additional supporting documents, if applicable, can be provided using the available rows. Do not use the rows assigned to a specific purpose in the funding opportunity announcement.**
-  **Merge similar documents into a single document. Where several pages are expected in the attachment, ensure that you place a table of contents cover page specific to the attachment.**

Attachment Number	Attachment Description (Program Guidelines)
Attachment 1	If the hospital files a full Medicare Cost report with CMS, Worksheet E3 part IV and Part VI of the Medicare Cost Reports for each of the Medicare Costs Report periods where applicable.
Attachment 2	Medicare Affiliation agreements when the hospital utilizes such agreements to increase/decrease its 1996 cap including a letter demonstrating that CMS received the agreements on or before July 1.
Attachment 3	Evidence of non-profit status, if applicable
Attachment 4	Delinquency on Federal Debt Explanation, if applicable.

Applicants are reminded that failure to include all required documents as part of the application may result in an application being considered as incomplete or non-responsive.

## **Application Format Requirements**

### ***i. Application Face Page (Grants.Gov)***

Complete Standard Form 424 Research and Related short form (SF-424 R&R), provided with the application package. Prepare this page according to instructions provided in the form itself. For information pertaining to the Catalog of Federal Domestic Assistance, **the CFDA Number is 93.255.**

### **DUNS Number**

All applicant organizations (and subrecipients of HRSA award funds) are required to have a Data Universal Numbering System (DUNS) number in order to apply for a grant or cooperative agreement from the Federal Government. The DUNS number is a unique nine-character identification number provided by the commercial company, Dun and Bradstreet. There is no charge to obtain a DUNS number. Information about obtaining a DUNS number can be found at <http://fedgov.dnb.com/webform> or call 1-866-705-5711. Please include the DUNS number in item 5 on the application face page. Applications **will not** be reviewed without a DUNS number. Note: A missing or incorrect DUNS number is the number one reason for applications being “Rejected for Errors” by Grants.gov. HRSA will not extend the deadline for applications with a missing or incorrect DUNS number. Applicants should take care in entering the DUNS number in the application.

Additionally, the applicant organization (and any subrecipient of HRSA award funds) is required to register with the Central Contractor Registration (CCR) in order to do electronic business with the Federal Government. CCR registration must be maintained with current, accurate information at all times during which an entity has an active award or an application or plan under consideration by HRSA. It is extremely important to verify that your CCR registration is active and your Marketing Partner ID Number (MPIN) is current. Information about registering with the CCR can be found at <http://www.ccr.gov>.

### ***ii. Table of Contents***

The application should be presented in the order of the Table of Contents provided in Grants.gov and the EHBS.

### ***iii. Assurances***

Complete Application Form HRSA 99-3, provided with the application package, and attach an original signed copy to the CHGME electronic application.

### ***iv. Certifications***

Complete Application Form HRSA 99-3, provided with the application package. Any organization or individual that is indebted to the United States, and has a judgment lien filed against it for a debt to the United States, is ineligible to receive a Federal grant. By signing the

SF-424 R&R, the applicant is certifying that they are not delinquent on Federal debt in accordance with OMB Circular A-129. (Examples of relevant debt include delinquent payroll or other taxes, audit disallowances, guaranteed and direct student loans, benefits that were overpaid, etc.). If an applicant is delinquent on Federal debt, they should attach an explanation that includes proof that satisfactory arrangements have been made with the Agency to which the debt is owed. This explanation should be uploaded as Attachment 4 in the EHBs.

#### ***v. Program Specific Forms***

The CHGME application includes six forms:

- a) (HRSA 99) application face page; demographic and contact information
- b) (HRSA 99-1) determination of weighted and unweighted resident FTE count form
- c) (HRSA-99-2) data related to the teaching of residents and related patient care measures form
- d) (HRSA-99-3) assurance/certification attestation form
- e) (HRSA-99-4) the performance data Government Performance Results Act (GPRA) tables
- f) (HRSA-99-5) the application checklist

The aforementioned documents are available electronically on the EHBs and will continue to utilize web based submission of the CHGME application.

#### ***vi. Attachments***

Please provide the following items to complete the content of the application. Each attachment must be clearly labeled, and is to be submitted during Phase 2 of the application, directly in the EHBs:

*Attachment 1* - If the hospital files a full Medicare Cost report with CMS, Worksheet E3 part IV and Part VI of the Medicare Cost Reports for each the Medicare Costs Report periods (where applicable).

*Attachment 2* - Medicare Affiliation agreements when the hospital utilizes such agreements to increase/decrease its 1996 cap including a letter indicating that the affiliation agreements were filed with CMS prior to July 1.

*Attachment 3* - Evidence of non-profit status (if applicable).

*Attachment 4* – Delinquency on Federal debt explanation (if applicable).

### **3. Submission Dates and Times**

Application Due Date

**The due date in Grants.gov (Phase 1) for applications under this funding opportunity announcement is on or before July 13, 2012 at 8:00 P.M. ET. The due date to complete all**

**other required information in HRSA EHBs (Phase 2) is on or before August 1, 2012 at 5:00 P.M. ET.** Applications completed online are considered formally submitted when the application has been successfully transmitted electronically by your organization's Authorized Organization Representative (AOR) through Grants.gov and the HRSA EHBs, and has been validated by Grants.gov and the HRSA EHBs on or before the due date(s) and submission time(s).

**Receipt acknowledgement:** Upon receipt of an application, Grants.gov will send a series of email messages advising you of the progress of your application through the system. The first will confirm receipt in the system; the second will indicate whether the application has been successfully validated or has been rejected due to errors; the third will be sent when the application has been successfully downloaded at HRSA; and the fourth will notify the applicant of the Agency Tracking Number assigned to the application.

The Chief Grants Management Officer (CGMO) or designee may authorize an extension of published deadlines when justified by circumstances such as Natural disasters (e.g., floods or hurricanes) or other disruptions of services, such as a prolonged blackout. The CGMO or designee will determine the affected geographical area(s).

**Late applications:** Applications which do not meet the criteria above are considered late applications and will not be considered in the current competition.

#### **4. Intergovernmental Review**

The CHGME Payment Program is not subject to the provisions of Executive Order 12372, as implemented by 45 CFR 100.

#### **5. Funding Restrictions**

Funds are restricted to eligible children's hospitals for direct expenses, as delineated by 1886(h)(5)(C) of the Social Security Act and §340E(g)(3) of the Public Health Service Act. While CHGME has traditionally also made a payment for indirect medical education, the FY 2013 President's Budget proposed that payments only be made for direct medical education.

**Salary Limitation:** The Consolidated Appropriations Act, 2012 (P.L. 112-74) enacted December 23, 2011, limits the salary amount that may be awarded and charged to HRSA grants and cooperative agreements. Award funds may not be used to pay the salary of an individual at a rate in excess of Executive Level II. The Executive Level II salary of the Federal Executive Pay scale is \$179,700. This amount reflects an individual's base salary exclusive of fringe and any income that an individual may be permitted to earn outside of the duties to the applicant organization. This salary limitation also applies to subawards/subcontracts under a HRSA grant or cooperative agreement.

Per Division F, Title V, Section 503 of the Consolidated Appropriations Act, 2012 (P.L. 112-74) enacted December 23, 2011 (a) No part of any appropriation contained in this Act or transferred pursuant to section 4002 of Public Law 111-148 shall be used, other than for normal

and recognized executive-legislative relationships, for publicity or propaganda purposes, for the preparation, distribution, or use of any kit, pamphlet, booklet, publication, electronic communication, radio, television, or video presentation designed to support or defeat the enactment of legislation before the Congress or any State or local legislature or legislative body, except in presentation to the Congress or any State or local legislature itself, or designed to support or defeat any proposed or pending regulation, administrative action, or order issued by the executive branch of any State or local government, except in presentation to the executive branch of any State or local government itself. (b) No part of any appropriation contained in this Act or transferred pursuant to section 4002 of Public Law 111-148 shall be used to pay the salary or expenses of any grant or contract recipient, or agent acting for such recipient, related to any activity designed to influence the enactment of legislation, appropriations, regulation, administrative action, or Executive order proposed or pending before the Congress or any State government, State legislature or local legislature or legislative body, other than for normal and recognized executive-legislative relationships or participation by an agency or officer of a State, local or tribal government in policymaking and administrative processes within the executive branch of that government. (c) The prohibitions in subsections (a) and (b) shall include any activity to advocate or promote any proposed, pending or future Federal, State or local tax increase, or any proposed, pending, or future requirement or restriction on any legal consumer product, including its sale or marketing, including but not limited to the advocacy or promotion of gun control.

Per Division F, Title V, Section 523 of the Consolidated Appropriations Act, 2012 (P.L. 112-74) enacted December 23, 2011, no funds appropriated in this Act shall be used to carry out any program of distributing sterile needles or syringes for the hypodermic injection of any illegal drug.

## 6. Other Submission Requirements

As stated in Section IV.1, except in rare cases HRSA will no longer accept applications in paper form. Applicants submitting for this funding opportunity are **required** to submit **electronically** through Grants.gov and the HRSA EHBs. To submit an application electronically, please begin by using the <http://www.Grants.gov> apply site. When using Grants.gov you will be able to download a copy of the application package, complete it off-line, and then upload and submit the application via the Grants.gov site.

It is essential that your organization **immediately register** in Grants.gov and become familiar with the Grants.gov site application process. If you do not complete the registration process, you will be unable to submit an application. The registration process can take up to one month..

To be able to register successfully in Grants.gov, it is necessary that you complete all of the following required actions:

- Obtain an organizational Data Universal Number System (DUNS) number
- Register the organization with Central Contractor Registration (CCR)
- Identify the organization's E-Business POC (Point of Contact)

- Confirm the organization’s CCR “Marketing Partner ID Number (M-PIN)” password
- Register and approve an Authorized Organization Representative (AOR)
- Obtain a username and password from the Grants.gov Credential Provider

Instructions on how to register, tutorials and FAQs are available on the Grants.gov web site at <http://www.grants.gov>. Assistance is also available 24 hours a day, 7 days a week (excluding Federal holidays) from the Grants.gov help desk at [support@grants.gov](mailto:support@grants.gov) or by phone at 1-800-518-4726. Applicants should ensure that all passwords and registration are current well in advance of the deadline.

**It is incumbent on applicants to ensure that the AOR is available to submit the Grants.gov portion of the application to HRSA by the published due date. HRSA will not accept submission or re-submission of incomplete, rejected, or otherwise delayed applications after the deadline.** Therefore, you are urged to submit your application in advance of the deadline. If your application is rejected by Grants.gov due to errors, you must correct the application and resubmit it to Grants.gov before the deadline date and time. Deadline extensions in Grants.gov will not be provided to applicants who do not correct errors and resubmit before the posted deadline.

**If, for any reason, an application is submitted more than once prior to the application due date, HRSA will only accept the applicant’s last electronic submission prior to the application due date as the final and only acceptable submission of any competing application submitted to Grants.gov.**

**Tracking your application:** It is incumbent on the applicant to track application status by using the Grants.gov tracking number (GRANTXXXXXX) provided in the confirmation email from Grants.gov. More information about tracking your application can be found at <https://apply07.grants.gov/apply/checkAppStatus.faces>. Be sure your application is validated by Grants.gov prior to the application deadline.

## V. Application Review Information

### 1. Review Criteria

This is a formula-based grant payment program. Application review is conducted at HRSA and an independent assessment of residents’ count is conducted by fiscal intermediaries. The CHGME Payment Program legislative mandate states that “the Secretary shall determine any changes to the number of residents reported by a hospital in the application of the hospital for the current fiscal year for both direct and indirect expense amounts.” The assessment of the FTE resident counts by fiscal intermediaries occurs within a six months period of time from start of the Federal Fiscal Year to the spring of the same Federal Fiscal Year, to allow for reconciliation of payments within the appropriation year for which payments are made. (The FTE assessment of residents is carried out by CHGME fiscal intermediaries each fiscal year, and each of the children’s hospitals participating in the program is subject to this assessment.)

## **2. Review and Selection Process**

The funds appropriated for the CHGME Payment Program are distributed among participating institutions as a formula payment based grant. Program data reported on HRSA forms are used to determine funding and administer the program. Applications must be complete to be considered for funding.

## **3. Anticipated Announcement and Award Dates**

The anticipated announcement award date is October 29, 2012.

# **VI. Award Administration Information**

## **1. Award Notices**

The Notice of Award sets forth the interim amount of funds granted, the terms and conditions of the award, the effective date of the award, the budget period for which initial support will be given, the non-Federal share to be provided (if applicable), and the total project period for which support is contemplated. Signed by the Grants Management Officer, it is sent to the applicant agency's Authorized Representative and Project Director and reflects the only authorizing document. It will be sent prior to the start date of October 29, 2012.

## **2. Administrative and National Policy Requirements**

Successful applicants must comply with the administrative requirements outlined in 45 CFR Part 74 [Uniform Administrative Requirements for Awards and Subawards to Institutions of Higher Education, Hospitals, Other Nonprofit Organizations, and Commercial Organizations](#) or 45 CFR Part 92 [Uniform Administrative Requirements For Grants And Cooperative Agreements to State, Local, and Tribal Governments](#), as appropriate.

HRSA grant and cooperative agreement awards are subject to the requirements of the HHS Grants Policy Statement (HHS GPS) that are applicable to the grant based on recipient type and purpose of award. This includes, as applicable, any requirements in Parts I and II of the HHS GPS that apply to the award. The HHS GPS is available at <http://www.hrsa.gov/grants/>. The general terms and conditions in the HHS GPS will apply as indicated unless there are statutory, regulatory, or award-specific requirements to the contrary (as specified in the Notice of Award).

### **Trafficking in Persons**

Awards issued under this funding opportunity are subject to the requirements of Section 106(g) of the Trafficking Victims Protection Act of 2000, as amended (22 U.S.C. 7104). For the full text of the award term, go to <http://www.hrsa.gov/grants/trafficking.html>. If you are unable to access this link, please contact the Grants Management Specialist identified in this guidance to obtain a copy of the Term.

### **Smoke-Free Workplace**

The Public Health Service strongly encourages all award recipients to provide a smoke-free workplace and to promote the non-use of all tobacco products. Further, Public Law 103-227, the Pro-Children Act of 1994, prohibits smoking in certain facilities (or in some cases, any portion of a facility) in which regular or routine education, library, day care, health care or early childhood development services are provided to children.

### **Cultural and Linguistic Competence**

HRSA programs serve culturally and linguistically diverse communities and multiple cultures. Although race and ethnicity are often thought to be dominant elements of culture, HRSA funded programs embrace a broader definition to include language, gender, socio-economic status, sexual orientation and gender identity, physical and mental capacity, age, religion, housing status, and regional differences. Organizational behaviors, practices, attitudes, and policies across all HRSA-supported entities respect and respond to the cultural diversity of communities, clients and students served. HRSA is committed to ensuring access to quality health care for all. Quality care means access to services, information, materials delivered by competent providers in a manner that factors in the language needs, cultural richness, and diversity of populations served. Quality also means that, where appropriate, data collection instruments used should adhere to culturally competent and linguistically appropriate norms. For additional information and guidance, refer to the National Standards for Culturally and Linguistically Appropriate Services in Health Care published by HHS and available online at <http://minorityhealth.hhs.gov/templates/browse.aspx?lvl=2&lvlID=15>. Additional cultural competency and health literacy tools, resources and definitions are available online at <http://www.hrsa.gov/culturalcompetence> and <http://www.hrsa.gov/healthliteracy>.

### **HEALTHY PEOPLE 2020**

Healthy People 2020 is a national initiative led by HHS that sets priorities for all HRSA programs. The initiative has four overarching goals: (1) attain high-quality, longer lives free of preventable disease, disability, injury, and premature death; (2) achieve health equity, eliminate disparities, and improve the health of all groups; (3) create social and physical environments that promote good health for all; and (4) promote quality of life, healthy development, and healthy behaviors across all life stages. The program consists of over 40 topic areas, containing measurable objectives. HRSA has actively participated in the work groups of all the topic areas and is committed to the achievement of the Healthy People 2020 goals. More information about Healthy People 2020 may be found online at <http://www.healthypeople.gov/>.

### **National HIV/AIDS Strategy (NHAS)**

The National HIV/AIDS Strategy (NHAS) has three primary goals: 1) reducing the number of people who become infected with HIV, 2) increasing access to care and optimizing health outcomes for people living with HIV, and 3) reducing HIV-related health disparities. The NHAS states that more must be done to ensure that new prevention methods are identified and that prevention resources are more strategically deployed. Further, the NHAS recognizes the importance of early entrance into care for people living with HIV to protect their health and reduce their potential of transmitting the virus to others. HIV disproportionately affects people who have less access to prevention, care and treatment services and, as a result, often have poorer health outcomes. Therefore, the NHAS advocates adopting community-level

approaches to identify people who are HIV-positive but do not know their serostatus and reduce stigma and discrimination against people living with HIV.

To the extent possible, program activities should strive to support the three primary goals of the NHAS. As encouraged by the NHAS, programs should seek opportunities to increase collaboration, efficiency, and innovation in the development of program activities to ensure success of the NHAS. Programs providing direct services should comply with federally-approved guidelines for HIV Prevention and Treatment (see <http://www.aidsinfo.nih.gov/Guidelines/Default.aspx> as a reliable source for current guidelines). More information can also be found at <http://www.whitehouse.gov/administration/eop/onap/nhas>.

### **Health IT**

Health information technology (Health IT) provides the basis for improving the overall quality, safety and efficiency of the health delivery system. HRSA endorses the widespread and consistent use of health IT, which is the most promising tool for making health care services more accessible, efficient and cost effective for all Americans.

### **Related Health IT Resources:**

- [Health Information Technology \(HHS\)](#)
- [What is Health Care Quality and Who Decides? \(AHRQ\)](#)

### **3. Reporting**

The successful applicant under this guidance must comply with the following reporting and review activities:

#### **a. Audit Requirements**

The Department of Health and Human Services (DHHS), or any other authorized Federal agency, may conduct an audit to determine whether the applicant has complied with all governing laws and regulations in its application for funding. Any and all information submitted to DHHS by an applicant or participating hospital during or after the award of funds is subject to review in an audit.

In addition, a Resident FTE Assessment will be conducted between October and May of each fiscal year. A CHGME Fiscal Intermediary (FI) is assigned to each children's hospital currently receiving CHGME Payment Program funding. The CHGME FI conducts an assessment of resident FTE counts reported by the children's hospital in its initial application (HRSA 99-1) for CHGME Payment Program funding to determine any changes to those resident FTE counts prior to the CHGME Payment Program reconciliation application cycle. The CHGME FI follows a detailed protocol based on CMS rules and regulations designed to ensure that each resident FTE claimed by the children's hospital is documented in accordance with 42 CFR 413.75(d). Resident counts are based on the number of residents training at the hospital complex and certain non-hospital/non-provider settings/sites throughout the hospital's fiscal year. Residents are counted as FTEs based on the total time necessary to fill a full-time residency slot for the year. Eligible hospitals are subjected to the terms of the Full-

Time Equivalent Assessment Process Guidance and Assessments which is available electronically via CHGME Payment Program web site.

**b. Progress Report(s).**

For this program, Government Performance and Results Act performance data tables are submitted as part of the reconciliation application, using the HRSA 99-4 form.

**c. Transparency Act Reporting Requirements**

New awards (“Type 1”) issued under this funding opportunity announcement are subject to the reporting requirements of the Federal Funding Accountability and Transparency Act (FFATA) of 2006 (Pub. L. 109–282), as amended by section 6202 of Public Law 110–252, and implemented by 2 CFR Part 170. Grant and cooperative agreement recipients must report information for each first-tier subaward of \$25,000 or more in Federal funds and executive total compensation for the recipient’s and subrecipient’s five most highly compensated executives as outlined in Appendix A to 2 CFR Part 170 (FFATA details are available online at <http://www.hrsa.gov/grants/ffata.html>). Competing continuation awardees, etc. may be subject to this requirement and will be so notified in the Notice of Award.

## VII. Agency Contacts

Applicants may obtain additional information regarding business, administrative, or fiscal issues related to this funding opportunity announcement by contacting:

**Jamie King**

Grants Management Specialist  
Office of Federal Assistance Management, Division of Grants Management Operations  
Parklawn Building, Room 11A-02  
5600 Fishers Lane Room  
Rockville, MD 20857  
Telephone: 301-443-1123  
Fax: 301-443-6343  
Email: [JKing@hrsa.gov](mailto:JKing@hrsa.gov)

Additional information related to the overall program issues and technical assistance regarding this funding announcement may be obtained by contacting:

**Ayah E. Johnson, Ph.D.**

Chief, CHGMETB, Division of Medicine and Dentistry  
Bureau of Health Professions, HRSA  
5600 Fishers Lane Room 9A-05  
Rockville, MD 20857  
Telephone: 301-443-1058  
Fax: 301-443-1879  
Email: [ajohnson@hrsa.gov](mailto:ajohnson@hrsa.gov)

Applicants may need assistance when working online to submit their application forms electronically. For assistance with submitting the first part of the application in Grants.gov, contact Grants.gov 24 hours a day, seven days a week, excluding federal holidays at:

Grants.gov Contact Center  
Phone: 1-800-518-4726  
Email: [support@grants.gov](mailto:support@grants.gov)  
iPortal: <http://grants.gov/iportal>

Applicants may need assistance when working online to submit the remainder of their information electronically through HRSA's Electronic Handbooks (EHBs). For assistance with the content of applications, the hospitals should contact their regional managers. For assistance with submitting the remaining information in HRSA's EHBs, contact the HRSA Contact Center, Monday-Friday, 9:00 a.m. to 5:30 p.m. ET at:

HRSA Contact Center  
Phone: (877) Go4-HRSA or (877) 464-4772  
Fax: (301) 998-7377  
Email: [CallCenter@HRSA.GOV](mailto:CallCenter@HRSA.GOV)

## **VIII. Tips For Writing A Strong Application**

A concise resource offering tips for writing proposals for HHS grants and cooperative agreements can be accessed online at: <http://www.hhs.gov/asrt/og/grantinformation/apptips.html>.

## APPENDIX A

### CHILDREN'S HOSPITALS GRADUATE MEDICAL EDUCATION PAYMENT PROGRAM APPLICATION FOR GRANT PAYMENTS

*Grants.gov (Phase 1) Submission due date July 13, 2012*  
SF 424 R&R Short Form

*HRSA EHBs (Phase 2) Submission due date August 1, 2012. Refer to Section IV of this guidance for detailed instructions.*

Applications are made by submission of application face page; demographic and contact information (HRSA 99), determination of weighted and unweighted resident FTE count form (HRSA 99-1), data related to the teaching of residents, and related patient care measures form (HRSA 99-2), assurance/certification attestation form (HRSA 99-3), the performance data (GPRA) tables (HRSA 99-4) and the application checklist (HRSA 99-5). The application is available on the web by accessing the EHB.

Attachment 1 – (HRSA 99) application face page; demographic and contact information

Attachment 2 – (HRSA 99-1) determination of weighted and unweighted resident FTE count form

Attachment 3 – (HRSA 99-2) data related to the teaching of residents and related patient care measures form

Attachment 4 - (HRSA 99-3) assurance/certification attestation form

Attachments 5- (HRSA 99-4) the performance data (GPRA) tables

Attachments 6- (HRSA 99-5) the application checklist.

Department of Health and Human Services

Bureau of Health Professions

Dear Applicant:

The Children's Hospitals Graduate Medical Education (CHGME) Payment Program application package, including all applicable forms, guidance and instructions, is enclosed. It is very important to thoroughly read the detailed application guidance and instructions before completing the required application forms. The material contains information related to submission of both the initial and reconciliation applications.

Your completed application must be mailed following the guidance provided in the "Application Cycle and Deadlines" section of the attached package. Applications must be received by the stated deadlines to be considered for CHGME Payment Program funding.

If you have questions regarding the application, please call the Children's Hospitals Graduate Medical Education Training Branch at 301-443-1058 or e-mail at [childrenshospitalgme@hrsa.gov](mailto:childrenshospitalgme@hrsa.gov).

Sincerely yours,

/s/

Janet Heinrich, DrPH, RN, FAAN  
Associate Administrator

## ***Section I***

### *Overview of the CHGME Payment Program*

#### **Introduction**

In 1999, Congress addressed the disparity of explicit graduate medical education (GME) funding between freestanding children's teaching hospitals and other teaching hospitals by passing the Healthcare Research and Quality Act, which established the Children's Hospitals Graduate Medical Education (CHGME) Payment Program. The act was signed on December 6, 1999 and the legislation authorized the program for Federal fiscal year (FY) 2000 and FY 2001. On October 17, 2000, the Children's Health Act of 2000 amended the Healthcare Research and Quality Act of 1999 extending the CHGME Payment Program through FY 2005. On December 23, 2004, additional amendments under Public Law 108-490 were made to Section 340E of the Public Health Service Act affecting the CHGME Payment Program. In October 2006, the Children's Hospital GME Support Reauthorization Act of 2006 reauthorized the CHGME Payment Program through FY 2011.

There are more than 60 freestanding children's teaching hospitals across the country that train about 30 percent of the Nation's pediatricians, nearly half of pediatric sub-specialists, and provide valuable training for physicians in many other specialties. These are the physicians who care for America's youngest population – its children. Almost 50 percent of the patient care that children's teaching hospitals provide is for low-income children, including those covered by Medicaid and those who are uninsured. In addition, these hospitals are regional and national referral centers for very sick children, often serving as the only source of care for many critical pediatric services. More than 75 percent of inpatient care at children's hospitals is devoted to children with one or more chronic conditions.

The CHGME Payment Program provides a more adequate level of support for GME training in U.S. children's teaching hospitals that have a separate Medicare provider number. These hospitals receive relatively little funding from Medicare for GME. Funding received by other teaching hospitals from Medicare was expected to exceed more than \$9 billion in FY 2009.

The CHGME Payment Program law authorized \$280 million for payments in FY 2000, \$285 million in FY 2001, and "such sums as necessary" for fiscal years 2002 through 2005. Congress appropriated \$40 million for the program in FY 2000, \$235 million in FY 2001, \$285 million in FY 2002, \$292 million in FY 2003, \$305 million for FY 2004, and \$303 million for FY 2005. For both FY 2004 and FY 2005 Congress implemented a rescission which reduced the total appropriated amounts. In FY 2009, the CHGME Payment Program appropriation provided GME support to 56 children's hospitals in 30 states, the District of Columbia and Puerto Rico, supporting more than 4,500 un-weighted resident full-time equivalents (FTEs) training in these hospitals. In October 2006, the Children's Hospital GME Support Reauthorization Act of 2006 reauthorized the CHGME Payment Program through FY 2011 for \$330 million per year. Since the inception of this program, the program has disbursed more than \$2.5 billion in Federal GME support to freestanding children's teaching hospitals.

## **Administration**

The CHGME Payment Program is administered by the Graduate Medical Education Branch (GMEB) of the Division of Medicine and Dentistry (DMD), Bureau of Health Professions (BHP), Health Resources and Services Administration (HRSA), Department of Health and Human Services (DHHS). The objective of the GMEB is to provide the assistance that freestanding children's hospitals need to ensure a future pediatric workforce that will treat U.S. children and to protect the safety net hospitals that address the needs of the underserved.

Questions regarding the CHGME Payment Program should be directed to the:

Department of Health and Human Services  
Health Resources and Services Administration  
Bureau of Health Professions  
Division of Medicine and Dentistry  
Children's Hospitals Graduate Medical Education Training Branch  
Parklawn Building  
5600 Fishers Lane Room 9A-05  
Rockville, Maryland 20857

Telephone: 301-443-1058 Fax: 301-443-1879

## ***Section II***

### ***Application Cycle and Deadlines***

For hospitals to be considered for CHGME Payment Program funding, they must comply with statutory eligibility requirements described herein and participate in the CHGME Payment Program's application cycle, which consists of specific processes for any given FY. These processes are guided by the CHGME Payment Program's statutes and are described below.

#### **Initial Application**

For children's hospitals, meeting all statutory and eligibility requirements, to receive CHGME Payment Program funding, they must submit a completed initial application for CHGME Payment Program funding in accordance with the established deadlines noted below. During the initial application process, eligible children's hospitals provide the CHGME Payment Program with information relevant to the interim determination of payments.

Initial applications for CHGME Payment Program funding must include the following forms:

- i. HRSA 99: Demographic and Contact Information
- ii. HRSA 99-1: Determination of Weighted and Unweighted Resident FTE Counts
- iii. HRSA 99-2: Determination of Indirect Medical Education Data Related to the Teaching of Residents
- iv. HRSA 99-3: Certification
- v. HRSA 99-5: Application Checklist

Applications accepted for review must be completed following the application guidance and instructions provided herein, submitted in English, typed, and include the above completed forms and supporting documentation as identified in the HRSA 99-5 (Application Checklist). The forms HRSA 99-1, HRSA 99-2 and HRSA 99-5 must be submitted electronically through the secure Electronic Handbook System. The forms HRSA 99 and HRSA 99-3 require an original signature for completion and must be attached to the electronic application or can be mailed on or before **August 1, (insert year)**, and submitted to the:

Department of Health and Human Services  
Health Resources and Services Administration  
Bureau of Health Professions  
Division of Medicine and Dentistry  
Graduate Medical Education Branch  
Parklawn Building  
5600 Fishers Lane Room 9A-05  
Rockville, Maryland 20857

Applications that are not postmarked by the specified deadline will not be accepted for processing and funding and will be returned to the applicant.

### **Interim Payment Determination and Disbursement (Based Upon the Initial Application)**

In accordance with CHGME Payment Program statutory requirements, information provided by participating children's hospitals in their initial applications for CHGME Payment Program funding is used by the CHGME Payment Program to calculate payments for all eligible children's hospitals prior to the beginning of the FY (October 1<sup>st</sup>) for which children's hospitals have applied for CHGME Payment Program funding. CHGME payments, allocated to eligible children's hospitals, are a function of the number of resident full-time equivalents (FTEs) participating in approved medical residency programs, inpatient discharges, case mix index, and the number of inpatient available beds, as reported by children's hospitals in their initial applications for CHGME Payment Program funding. Payments are awarded for direct medical education (DME) and indirect medical education (IME) expenses, respectively. DME and IME payment calculations are subject to all rules, regulations, and policies governing the CHGME Payment Program.

On or after October 1<sup>st</sup> of the FY for which eligible children's hospitals have applied for CHGME Payment Program funding, the CHGME Payment Program will begin making interim payments. CHGME Program payments to eligible children's hospitals will be contingent upon receiving an appropriation from Congress. Children's hospitals will be notified, in writing, of the Secretary's interim payment determination. In accordance with CHGME Payment Program statutes, payments will reflect a 25 percent withholding from each interim installment (payment) for both DME and IME payments, as necessary, to ensure that a hospital will not be overpaid on an interim basis.

### **Assessment of Resident FTE Counts Reported in Initial Applications**

The CHGME Payment Program statute, Public Law 106-310, mandates that "the Secretary shall determine any changes to the number of residents reported by a hospital in the (*initial*) application of the hospital for the current FY for both direct and indirect expense amounts." Therefore, prior to the end of the FY for which children's hospitals have applied for CHGME Payment Program funding, the Secretary must determine (*reconcile*) any changes to the number of resident FTEs reported by a hospital in its initial application for the current FY, which will impact final payments made by the CHGME Payment Program to all eligible children's hospitals. This determination is done by conducting a comprehensive assessment of the resident FTE counts claimed by children's hospitals in their initial applications for CHGME Payment Program funding.

The CHGME Payment Program has contracted with fiscal intermediaries (hereinafter CHGME FIs) to carry out an assessment of resident FTE counts (hereinafter the "Resident FTE Assessment Program") reflected in participating children's hospitals initial applications for CHGME Payment Program funding to determine any changes to the resident FTE counts initially reported. An assessment of resident FTE counts reported by children's hospitals in their initial applications for CHGME Payment Program funding is performed regardless of the type(s) of Medicare cost report (MCR) the hospital files (e.g., full, low- or no-utilization) for purposes of receiving CHGME Payment Program funding. This process is designed to assess resident FTE counts for all

children's hospitals in an equitable fashion and within CHGME Payment Program time constraints.

The Resident FTE Assessment Program requires participating children's hospitals to comply with requests from the CHGME FIs, within the time constraints provided, as any changes to resident FTE counts in one children's hospital's application for CHGME Payment Program funding affects the distribution of funds among all eligible children's hospitals. To minimize public burden, CHGME FIs use and build upon work previously conducted by CHGME and/or Medicare FIs in prior years. The CHGME Payment Program has made available several guidance documents on the CHGME Payment Program's website at <http://bhpr.hrsa.gov/childrenshospitalgme/apply.htm> which provide further information about the Resident FTE Assessment Program and documentation recommendations related to the assessment of resident FTE counts.

At the conclusion of the Resident FTE Assessment Program, the CHGME FIs will forward final assessment reports to the respective children's hospitals, the Medicare FIs, and the CHGME Payment Program explaining the results of the review. The assessment reports include CHGME FI-generated HRSA 99-1's, which children's hospitals must use to complete their reconciliation applications (see Reconciliation Application below). The assessment reports may also include supporting documentation including, but not limited to: adjustment reports, updates to the intern and resident database, adjustments to the Centers for Medicare and Medicaid Services (CMS) form 2552-96 Worksheet E-3, Part IV, or letters (to the Medicare FI) requesting the reopening of one or more MCRs.

### **Reconciliation Application**

During the third quarter of each FY (typically April 1<sup>st</sup>) for which payments are being made, the CHGME Payment Program will release a reconciliation application for use by participating children's hospitals to report changes in the resident FTE counts reported in their initial applications for CHGME Payment Program funding. For children's hospitals to continue receiving CHGME Payment Program funding, they must submit a completed reconciliation application for CHGME Payment Program funding in accordance with established deadlines noted below. The resident FTE counts reported by children's hospitals in their reconciliation applications must be for the same MCR period(s) identified in the hospital's initial application for the subject FY and consistent with those reported in the CHGME FIs FTE final assessment report to be accepted by the CHGME Payment Program.

The resident FTE counts from the final assessment reports are used to determine the final amounts payable to children's hospitals for the current FY for both DME and IME. Children's hospitals whose resident FTE counts have not changed are not exempt from completing and submitting a CHGME Payment Program reconciliation application.

Reconciliation applications for CHGME Payment Program funding must include the following forms:

- i. HRSA 99: Hospital Demographic and Contact Information
- ii. HRSA 99-1: Determination of Weighted and Unweighted Resident FTE Counts
- iii. HRSA 99-2: Determination of Indirect Medical Education Data Related to the Teaching of Residents
- iv. HRSA 99-3: Hospital Certification

- v. HRSA 99-4: Government Performance and Results Act Tables
- vi. HRSA 99-5: Application Checklist

Applications accepted for review must be completed following the application guidance and instructions provided herein, submitted in English, typed, and include the above completed forms and supporting documentation as identified in the HRSA 99-5 (Application Checklist). The forms HRSA 99-1, HRSA 99-2 and HRSA 99-5 must be submitted electronically through the secure web-application system at <https://chgmeapplication.hrsa.gov/default.asp>. The forms HRSA 99 and HRSA 99-3 require an original signature for completion and must be postmarked by **May 1, (insert year)**, and submitted to the:

Department of Health and Human Services  
Health Resources and Services Administration  
Bureau of Health Professions  
Division of Medicine and Dentistry  
Graduate Medical Education Branch  
Parklawn Building  
5600 Fishers Lane Room 9A-05  
Rockville, Maryland 20857

Application materials are available electronically via the CHGME Payment Program website at <http://bhpr.hrsa.gov/childrenshospitalgme/apply.htm>. If a children's hospital fails to complete and return a reconciliation application according to the terms and conditions of the CHGME Payment Program, the DHHS may suspend the award, pending corrective action, or may terminate the award for cause.

Children's hospitals that were not eligible to participate or did not apply for funding during the initial application process for a given FY are not eligible to apply for and receive funding during the reconciliation application process for the same FY. These hospitals must wait until the next (initial) application cycle to apply for CHGME Payment Program funding.

### **Final Payment Determination and Disbursement (Based Upon the Reconciliation Application)**

The Secretary will determine any balance due or any overpayment made to individual hospitals following the determination of changes, if any, to the number of resident FTEs reported by children's hospitals in their reconciliation applications as a result of the Resident FTE Assessment Program. Children's hospitals will be notified, in writing, of the Secretary's final reconciliation payment determination during the fourth quarter (July 1<sup>st</sup> – September 30<sup>th</sup>) of the FY in which payments are being made.

Children's hospitals that have been notified of an overpayment will have 30 days to return the overpayment to the DHHS without accrual of interest. Children's hospitals that fail to return overpayments within the specified timeframe will accrue and be responsible for any interest.

Reconciliation payments will be made to individual hospitals on or before the end of the FY (September 30<sup>th</sup>) in which payments are being made. The Secretary will include in the reconciliation payments funding initially withheld in accordance with statutory requirements. All

hospitals, whether or not they report changes to their resident FTE counts during the reconciliation process, can expect changes to their final payment determination as a result of resident FTE count changes reported by other participating children's hospitals. This is due to the methodology used to determine CHGME Payment Program payments. More detailed information is available on the CHGME Payment Program payment methodology in Section V of this application package. Information on the payment formulas is also available on the CHGME Payment Program website at <http://bhpr.hrsa.gov/childrenshospitalgme/>. DME and IME payment calculations are subject to all rules and regulations governing the CHGME Payment Program statute, including the June 19, 2000 Federal Register notice for DME, the July 20, 2001 Federal Register notice for IME, §422 of the Medicare Modernization Act (MMA) of 2003, and Sections 5503, 5504, 5505, and 5506 of the Affordable Care Act (ACA) of 2010 and all accompanying policies and regulations.

At the end of the FY, the CHGME Payment Program may make a final payment to distribute any remaining funds, including those funds that have been returned to the DHHS during the course of the FY as a result of overpayment or hospitals' loss of eligibility.

### **Electronic Availability of Application Materials**

Application materials are available electronically via the CHGME Payment Program website at <http://bhpr.hrsa.gov/childrenshospitalgme/apply.htm>.

**CHILDREN'S HOSPITALS GRADUATE MEDICAL  
EDUCATION PAYMENT PROGRAM**

**APPLICATION FORM HRSA 99-3**

**Public Burden Statement**

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control number for this project is 0915-0247. Public reporting burden for the applicant for this collection of information is estimated to average 62.16 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to HRSA Reports Clearance Officer, 5600 Fishers Lane, Room 14-33, Rockville, Maryland, 20857.

## Children's Hospitals Graduate Medical Education Payment Program Certification

Name of Applicant:

City, State:

Medicare Provider Number:

FFY in which Applying for CHGME PP Funding:   FFY

Type of Application (check box to the left):

Initial Application

Reconciliation Application

**Certifying Official:** A Certifying Official is the individual selected and empowered by the applicant hospital to certify the legitimacy of the application for funds under the Children's Hospitals Graduate Medical Education Payment Program (CHGME Payment Program). This Certification Statement includes the minimum standards to which the applicant must comply for participation in the CHGME Payment Program. Read these statements carefully. By signing the Certification Statement, the applicant hospital agrees to adhere to all the conditions listed and is aware that the applicant hospital may be denied entry to or revoked from the program if any conditions are violated. The Certification Statement must contain an original signature. Faxed or photocopied signatures will not be accepted.

### CERTIFICATION STATEMENT

I certify that I have examined the accompanying electronically or manually filed CHGME Payment Program application and that, to the best of my knowledge and belief, all information on the Fiscal Year \_\_\_\_\_ application provided by \_\_\_\_\_ (Hospital Name) is true, correct and complete and meets the requirements of 42 U.S.C. 256e, and applicable laws, regulations and policies. <sup>(1)</sup>

If I become aware that any information in this form is not true, accurate, or complete, I agree to notify the CHGME Payment Program of this fact within 30 days. (Note: Any changes in the information reported in this application must be reported to the CHGME Payment Program within 30 days of said change.)

I understand that any omission, misrepresentation, or falsification of any information contained in this application or contained in any communication supplying information to the CHGME Payment Program may be punishable by criminal, civil, or other administrative actions including fines, penalties, and/or imprisonment under Federal law.

I acknowledge that any funds paid to \_\_\_\_\_ (Hospital Name) in excess of the amount to which the hospital is determined to be entitled under the terms and conditions of the award are subject to recovery or offset by HHS pursuant to the Federal Claims Collection Act and implementing regulations and 45 CFR Part 30.

<sup>(1)</sup> *If the institution has not met the specific requirements of the attached laws, attach an explanation on plain white paper.*

## **Penalties for Falsifying Information on the CHGME Payment Program Application**

Among the penalties for falsifying information on the CHGME Payment Program application are the following:

1. 18 U.S.C. § 1001 authorizes criminal penalties against an individual who in any matter within the jurisdiction of any department or agency of the United States knowingly and willfully falsifies, conceals or covers up by any trick, scheme or device a material fact, or makes any false, fictitious or fraudulent statements or representations, or makes any false writing or document knowing the same to contain any false, fictitious or fraudulent statement or entry. Individual offenders are subject to fines of up to \$250,000 and imprisonment for up to five years. Offenders that are organizations are subject to fines of up to \$500,000. 18 U.S.C. § 3571. Section 3571(d) also authorizes fines of up to twice the gross gain derived by the offender if it is greater than the amount specifically authorized by the sentencing statute.

2. The Civil False Claims Act, 31 U.S.C. § 3729 imposes civil liability, in part, on any person who:

- a.) knowingly presents, or causes to be presented, to an officer or an employee of the United States Government a false or fraudulent claim for payment or approval;
- b.) knowingly makes, uses, or causes to be made or used, a false record or statement to get a false or fraudulent claim paid or approved by the Government; or
- c.) conspires to defraud the Government by getting a false or fraudulent claim allowed or paid.

The Act imposes a civil penalty of \$5,000 to \$10,000 per violation, plus 3 times the amount of damages sustained by the Government.

3. The government may assert common law claims such as "common law fraud," "money paid by mistake," and "unjust enrichment." Remedies include compensatory and punitive damages, restitution and recovery of the amount of the unjust profit.

## ASSURANCES, CERTIFICATIONS AND OTHER REQUIREMENTS

- A. **Civil Rights:** Before an award is made, the applicant organization must have submitted, and had accepted by the DHHS Office for Civil Rights, an Assurance of Compliance Form HHS 690 in accordance with Title VI of the Civil Rights Act of 1964, Public Law 88-352. Pertinent DHHS regulations are found in 45 CFR Part 80. This provides that no person in the United States shall on the ground of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be otherwise subjected to discrimination under any program or activity receiving Federal financial assistance from DHHS.
- B. **Individuals with Disabilities:** Before an award is made, the applicant organization must have submitted, and had accepted by the DHHS Office for Civil Rights, an Assurance of Compliance Form HHS 690, in accordance with Sec. 504 of the Rehabilitation Act of 1973, Public Law 93-112, as amended (29 USC 794). This provides that no handicapped individual shall, solely by reason of the handicap, be excluded from participation in, be denied the benefits of, or be subject to discrimination under any program or activity receiving Federal financial assistance. Pertinent DHHS regulations are found in 45 CFR Part 84.
- C. **Age Discrimination:** In accordance with Title III of the Age Discrimination Act of 1975, as amended, Public Law 94-135, 45 CFR Part 91, attention is called to the general rule that no person in the United States shall, on the basis of age, be excluded from participation in, be denied the benefit of, or be subjected to, discrimination under any program or activity receiving Federal financial assistance. The required assurance (Form HHS-690) must be on file with the Office for Civil Rights, Office of the Secretary, HHS, before a grant may be made.
- D. **Sex Discrimination:** Before an award is made, the applicant educational organization must have submitted and had accepted by the DHHS Office for Civil Rights an Assurance of Compliance Form HHS 690 in accordance with Sec. 901 of Title IX of the Education Amendments of 1972, Public Law 92-318, as amended, which provides that no person shall, on the basis of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance. Pertinent DHHS regulations are found in 45 CFR Part 86.

Specific provisions in Titles VII and VIII of the PHS Act (currently numbered Secs. 794 and 810) prohibit the Secretary, DHHS, from making any grant, contract, loan guarantee, or interest subsidy payment under Title VII or VIII to an entity which does not furnish assurances satisfactory to the Secretary that the entity will not discriminate on the basis of sex in the admission of individuals to its training programs.

In accordance with 45 CFR Part 83 of DHHS regulations, no grant, contract, loan guarantee or interest subsidy payment under Titles VII and VIII of the PHS Act shall be made to or for the benefit of any entity unless the entity furnishes assurances satisfactory to the Director, Office for Civil Rights, that the entity will not discriminate on the basis of sex in the admission of individuals to its training programs.

**Other Discrimination:** Attention is called to the requirements of Sec. 401 of the Health Programs Extension Act of 1973, Public Law 93-45, as amended (42 USC 300a-7), which provides that no entity which receives any grant, contract, loan, loan guarantee, or interest subsidy under the PHS Act may deny admission or otherwise discriminate against any applicant

(including applicants for internships and residencies) for training or study because of the applicant's reluctance or willingness to counsel, suggest, recommend, assist, or in any way participate in the performance of abortions or sterilizations contrary to, or consistent with, the applicant's religious beliefs or moral convictions.

- E. **Drug Free Workplace Act of 1988, Title V, Subtitle D of Public Law 100-690:** The applicant institution must comply with the requirements of 45 CFR Part 82, which requires certification that grantees will provide and maintain a drug-free workplace.
- F. **Certification Regarding Lobbying and Disclosure of Lobbying Activities:** Each person shall file a certification, and a disclosure form, if required, with each submission that initiates agency consideration of such person for award of a Federal contract, grant, loan, or cooperative agreement award action exceeding \$100,000. Government-wide guidance for restrictions on lobbying was published by the Office of Management and Budget in the Federal Register, 54 FR 52306, December 20, 1989. Pertinent DHHS regulations are found in 45 CFR Part 93. See also authority under Sec. 319, Public Law 101-121, as amended (31 USC 1352).
- G. **Misconduct in Science:** Each institution which applies for or receives assistance under a research, research-training, or research-related grant or cooperative agreement under the PHS Act must submit an annual assurance (Form PHS 6349) certifying that the institution has established administrative policies as required by 42 CFR Part 93, and that it will comply with those policies and the requirements of Part 93.
- As of January 1, 1990, Notice of Grant awards for grants and cooperative agreements involving research may be issued only to institutions that have filed with the Office of Research Integrity (ORI), acceptable assurances for dealing with and reporting possible misconduct in science. The respective Grants Management Offices will determine the status of an institution by contacting ORI.
- H. **Debarment and Suspension:** The applicant organization must certify, among other things, that neither it nor its principals are presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from covered transactions by any Federal department or agency. Subawardees, that is, other corporations, partnerships, or other legal entities (called "lower tier" participants), must make the same certification to the applicant organization concerning their covered transactions. Pertinent DHHS regulations are found at 2 CFR Part 376, which implement 2 CFR part 180, "OMB Guidelines to Agencies on Government-wide Debarment and Suspension (Nonprocurement)."
- I. **Statement of Non-Delinquency on Federal Debt:** The question applies only to the person or institution requesting financial assistance, and does not apply to the person who signs an application form as the authorized representative of an institution or on behalf of another person who actually receives the funds.

Examples of Federal Debt include delinquent taxes, audit disallowances, guaranteed or direct student loans, FHA loans, and other miscellaneous administrative debts. For purposes of this statement, the following definitions apply:

- For direct loans, a debt more than 31 days past due on a scheduled payment.
- For agents, recipients of a “Notice of Grants Cost Disallowance” who have not repaid the disallowed amount or who have not resolved the disallowance.
- For guaranteed and insured loans, recipients of a loan guaranteed by the Federal Government that the Federal Government has repurchased from a lender because the borrower breached the loan agreement and is in default.

J. **Drug-Free Schools and Campuses:** The Drug-Free Schools and Communities Act Amendments of 1989, Public Law 101-226, Sec. 22, which added Sec. 1213 to the Higher Education Act, require that any public or private institution of higher education (including independent hospitals conducting training programs for health care personnel), State educational agency, or local educational agency receiving Federal financial assistance must certify to the Secretary of Education, as a condition for funding, that it has adopted and implemented a drug prevention program as described in regulations at 34 CFR Part 86, (55 FR 33581), August 16, 1990, as amended at 61 FR 66225, December 17, 1996. The provisions of the regulations also apply to sub-grantees which received Federal funds from any Federal grantee regardless of whether or not the primary grantee is an institution of higher education, State educational agency, or local educational agency.

K. **Smoke-Free Workplace:** The Public Health Service strongly encourages all grant and cooperative agreement recipients to provide a smoke-free workplace and promote the non-use of all tobacco products. Title X, Part C of Public Law 103-227, the Pro-Children Act of 1994, prohibits smoking in certain facilities that receive Federal funds in which education, library, day care, health care, and early childhood development services are provided to children.

## RELEASE OF INFORMATION

A. **General Public Information:** DHHS makes available routinely to interested persons a report listing grants awarded. Information made available includes the title of the project, grantee institution, project director, and the amount of the award.

The Freedom of Information Act (5 USC 552) and the associated Freedom of Information Regulations of DHHS (45 CFR Part 5) require the release of certain information about grants upon request. Release does not depend upon the intended use of the information.

Generally available for release upon request are all funded grant applications; progress reports of grantees; and final reports of any review or evaluation of grantee performance conducted or caused to be conducted by the Department. Release is subject to deletion of material that would affect patent or other valuable rights.

B. **Information Available to the Project Director:** The Privacy Act of 1974 (5 USC 552a) and the associated Privacy Act Regulations (45 CFR part 5b) give individuals the right of access, upon request, to information in the records concerning themselves. The Act provides a mechanism for correction or amendment of such information. It also provides for the protection of information pertaining to an individual, but it does not prevent disclosure if release of such information is required under the Freedom of Information Act. If a Privacy Act system of records applies, the name and number of the system will be identified.

If applicable, the Privacy Act requires that a Federal agency requesting information from an individual advise the individual of the agency's authority to make the request; whether compliance with the request is voluntary or mandatory; how and why the information will be used both inside and outside the agency; and what the consequences are for the individual of failing to provide all or any part of the requested information.

The DHHS requests the information described in these instructions under authority of the PHS Act as amended (42 USC 289a-1). Although provision of the information requested is entirely voluntary, it is necessary for making grant award decisions. A lack of sufficient information may hinder DHHS's ability to review applications. This information will be used with the DHHS and may be disclosed outside the Department as permitted by the Privacy Act under the applicable system of records.

- C. Government Use of Information: In addition to being used in evaluating applications, other routine uses of information can include disclosures to the public as required by the Freedom of Information Act; to the Congress; to the National Archives and Records Service; to the Bureau of the Census; to law enforcement agencies upon their request; to the General Accounting Office; and under court order. It may also be disclosed outside of the Department if necessary for the following purposes.
1. To the cognizant audit agency for auditing;
  2. To the Department of Justice as required for litigation;
  3. To respond to an inquiry from a Congressional office about the record of an individual made at the request of that individual;
  4. To qualified experts not within the definition of Department employees as prescribed in Department regulations (45 CFR Part 5b.2, Purpose and Scope) for opinion as a part of the application review process;
  5. To a Federal agency, in response to its request, in connection with the letting of a contract, or the issuance of a license, grant or other benefit by the requesting agency, to the extent that the record is relevant and necessary to the requesting agency's decision on the matter;
  6. To individuals and organizations deemed qualified by the DHHS to carry out specific research related to the review and award process of the DHHS;
  7. To organizations in the private sector with whom DHHS has contracted for the purpose of collating, analyzing, aggregating or otherwise refining records in a system. Relevant records will be disclosed to such a contractor. The contractor shall be required to maintain Privacy Act safeguards with respect to such records; and
  8. To the applicant organization in connection with performance or administration under the terms and conditions of the award.

## **Section IV**

### *Hospital Eligibility*

#### **Eligibility Criteria**

According to Public Law 106-310, a children's teaching hospital must meet the following eligibility criteria for CHGME Payment Program funding. The hospital must:

1. participate in an approved graduate medical residency training program;
2. have a Medicare Provider Agreement;
3. be excluded from the Medicare inpatient prospective payment system (PPS) under section 1886(d)(1)(B)(iii) of the Social Security Act, and its accompanying regulations<sup>(1)</sup>; and
4. operate as a "freestanding" children's teaching hospital, as defined by the CHGME Payment Program.<sup>(2)</sup>

*(1) A hospital with a 3300 series Medicare provider number would meet this criterion (i.e., 55-3300).*

*(2) A children's teaching hospital is considered "freestanding" if it does not operate under a Medicare hospital provider number assigned to a larger health care entity that receives Medicare GME payments.*

#### ***Additional references:***

- *Social Security Act, Section 1886*
- *CHGME Payment Program, Federal Register Notice, March 1, 2001 (66 FR 12940)*

#### **Changes in Eligibility**

A hospital remains eligible for CHGME Payment Program funding as long as it meets the eligibility criteria listed above and trains residents as a "freestanding" children's hospital during the FY for which CHGME Program payments are being made.

If a hospital becomes ineligible for payments:

1. It must notify the CHGME Payment Program immediately of the change in status and the date of the change; and
2. It will be liable for the reimbursement, with interest, of any funds received during the period of ineligibility.

#### ***Additional references:***

- *CHGME Payment Program, Federal Register Notice, March 1, 2001 (66 FR 12940)*

## Section V

### Payment Methodology

#### Payment Methodology

CHGME Payment Program funding to individual children's hospitals is based upon a number of variables, including the rolling average of weighted and un-weighted resident FTE counts, which are used to calculate DME and IME payments, respectively. Payment variables and calculations are subject to all rules and regulations governing the CHGME Payment Program statute, including the June 19, 2000 *Federal Register Notice* for DME (65 FR 37985), the March 1, 2001 *Federal Register Notice* (66 FR 12940), the July 20, 2001 *Federal Register Notice* for IME (66 FR 37980), the October 22, 2003 *Federal Register Notice* (68 FR 60396), §422 of the MMA of 2003, as well as and Sections 5503, 5504, 5505, and 5506 of the ACA of 2010 and all accompanying policies and regulations.

The rolling average is the average of the resident FTE counts reported by the children's hospital for the <sup>(1)</sup>:

1. most recently filed MCR (or the most recently completed MCR period); and
2. the prior two years.

*<sup>(1)</sup> CHGME Payment Program funding to a children's hospital that has not completed three (3) MCR periods will be based upon the hospital's resident FTE count from its "most recently filed" or "most recently completed" MCR period until three (3) MCR periods have been completed.*

The rolling average resident FTE count includes all residents except those that qualify for an adjustment after the averaging rules are applied in accordance with 42 CFR 413.77.

The resident FTE count for any MCR period is based upon the number of:

1. Allopathic and osteopathic residents following application of the "cap", where applicable; and
2. Dental and podiatric residents.

Effective "for portions of cost reporting periods occurring on or after July 1, 2005", the CHGME Payment Program will not include resident FTEs counted against the §422 cap increase in the 3-year rolling average calculation for purposes of DME and IME payments. *Additional information regarding the CHGME Payment Program's implementation of §422 of the MMA of 2003 is included in Sections VII and VIII of this application package.*

Effective "for portions of cost reporting periods ending on or after July 1, 2011", the CHGME Payment Program will include resident FTEs counted against the §5503 cap increase in the 3-year rolling average calculation for purposes of DME and IME payments. *Additional information regarding the CHGME Payment Program's implementation of §5503 of the ACA of 2010 is included in Sections VII and VIII of this application package.*

## ***Section VI***

### ***Hospital Data Needed to Complete the CHGME Payment Program Application***

#### **Data Sources for Children’s Hospitals that File Full MCRs**

To complete a CHGME Payment Program application, hospitals that file full MCRs (i.e., report residents to Medicare on CMS 2552-96, Worksheet E-3, Part IV) must use the data as reflected in their:

1. most recently filed MCR for the period ending on or before December 31, 1996 (the “cap year”);
2. most recently filed MCR; and the
3. prior two years.

In addition, hospitals who received adjustments to their cap (increases or decreases) as a result of §422 of the MMA of 2003 must use data included in and provide a copy of their written notification from CMS regarding these adjustments on CMS 2552-96, Worksheet E-3, Part VI. *Additional information regarding the CHGME Payment Program’s implementation of §422 of the MMA of 2003 is included in Sections VII and VIII of this application package.*

Also, hospitals who received adjustments to their cap (increases or decreases) as a result of §5503 of the ACA of 2010 must use data included in and provide a copy of their written notification from CMS regarding these adjustments on CMS 2552-96, Worksheet E-3, Part IV. *Additional information regarding the CHGME Payment Program’s implementation of §5503 of the ACA of 2010 is included in Sections VII and VIII of this application package.*

#### ***Additional references:***

- *Social Security Act, Section 1886*
- *CMS, 42 CFR 413.77*
- *CMS, Federal Register Notice, August 11, 2004 (69 FR 48916)*
- *CMS, Federal Register Notice, November 24, 2010 ( 75 FR 72192)*
- *CHGME Payment Program , Federal Register Notice, March 1, 2001 (66 FR 12940)*

***Applicable to the following application forms: HRSA-99-1, HRSA-99-2, and HRSA-99-4***

#### **Data Sources for Children’s Hospitals that File Low- or No-Utilization MCRs**

To complete a CHGME Payment Program application, hospitals that file low- or no-utilization MCRs (i.e., do not report residents to Medicare on CMS 2552-96, Worksheet E-3, Part IV) must use the data as reflected in their hospital records for the:

1. most recently completed MCR period for the period ending on or before December 31, 1996 (the “cap year”);
2. most recently completed MCR period; and the
3. completed MCR periods for the prior two years.

In addition, hospitals who received adjustments to their cap (increases or decreases) as a result of §422 of the MMA of 2003 must use data included in and provide a copy of their written

notification from CMS regarding these adjustments. *Additional information regarding the CHGME Payment Program's implementation of §422 of the MMA of 2003 is included in Sections VII and VIII of this application package.*

Also, hospitals who received adjustments to their cap (increases or decreases) as a result of §5503 of the ACA of 2010 must use data included in and provide a copy of their written notification from CMS regarding these adjustments. *Additional information regarding the CHGME Payment Program's implementation of §5503 of the ACA of 2010 is included in Sections VII and VIII of this application package.*

Hospitals whose most recently completed MCR period ends **less than** five (5) months prior to the stated CHGME Payment Program initial application deadline may report as their most recently completed MCR period resident FTE counts from their most recently completed or the previously completed MCR period.

**Example:**

Charlie's Angels Children's Center (CACC) will file a low-utilization MCR for its 06/30/08 year-end. The CHGME Payment Program application deadline for FY 2009 is August 1, 2008 (approximately 1 month after CACC's year-end). CACC has the option of reporting as its "most recently completed MCR period" data from its 6/30/07 or 6/30/08 year-end. Since CACC needs time to close-out its resident FTE counts and financial records for its 6/30/08 year-end, it decides to use the resident FTE count data from its 6/30/07 cost reporting period to complete Section 4 of HRSA-99-1. Consequently, CACC must use data from its 6/30/06 and 6/30/05 MCR periods to complete Sections 5 and 6 of the HRSA-99-1, respectively. CACC must also use its hospital data from its 6/30/07 cost reporting period to complete all subsequent application forms (i.e., HRSA-99-2, HRSA-99-4, etc.). CACC cannot use the resident FTE count data from its 6/30/08 MCR period until the next CHGME Payment Program initial application cycle (FY 2010).

***Additional references:***

***Applicable to the following application forms: HRSA-99-1, HRSA-99-2, and HRSA-99-4***

**Data Sources for Children's Hospitals that Have Not Completed Three (3) MCR Periods**

If a hospital has completed at least one (1), but not more than two (2) MCR periods, CHGME Payment Program funding to the children's hospital will be based upon data from the hospital's "most recently filed" or "most recently completed" MCR period until three (3) MCR periods have been completed. Hence, the hospital will not complete sections 5 and 6 of HRSA-99-1 and

its DME and IME payments will not be based upon a three-year rolling average resident FTE count.

Upon completion of three (3) MCR periods, the hospital will complete sections 5 and 6 of HRSA-99-1 and will receive DME and IME payments based upon a three-year rolling average resident FTE count. In addition, hospitals who received adjustments to their cap (increases or decreases) as a result of §422 of the MMA of 2003 must use data included in and provide a copy of their written notification from CMS regarding these adjustments. *Additional information regarding the CHGME Payment Program's implementation of §422 of the MMA of 2003 is included in Sections VII and VIII of this application package.*

Also, hospitals who received adjustments to their cap (increases or decreases) as a result of §5503 of the ACA of 2010 must use data included in and provide a copy of their written notification from CMS regarding these adjustments. *Additional information regarding the CHGME Payment Program's implementation of §5503 of the ACA of 2010 is included in Sections VII and VIII of this application package.*

***Additional references:***

- *CHGME Payment Program , Federal Register Notice, July 20, 2001 (66 FR 37980)*
- *CMS, Federal Register Notice, August 11, 2004 (69 FR 48916)*
- *CMS, Federal Register Notice, November 24, 2010 ( 75 FR 72152)*

***Applicable to the following application forms: HRSA-99-1, HRSA-99-2, and HRSA-99-4***

**Data Sources for Children's Hospitals that Have Not Completed One (1) MCR Period**

New children's teaching hospitals (new to the CHGME Payment Program ) training residents who were originally trained in a program that received and will continue to receive funding under the CHGME Payment Program are required to wait until they have completed a MCR period before applying for CHGME Payment Program funding. These hospitals must also apply the 3-year rolling average (to their resident FTE counts) in accordance with Medicare regulations. Over a 3-year period, the "new children's teaching hospital" will gradually increase its number of resident FTEs that can be claimed in the CHGME Payment Program as the children's hospital that originally trained those resident FTEs gradually decreases its resident FTE count for determining payments from the CHGME Payment Program .

New children's teaching hospitals (new to the CHGME Payment Program ) training residents previously trained at a hospital that never received (or is no longer receiving) funding under the CHGME Payment Program are eligible for CHGME Payment Program funding without having completed a MCR period. In addition, a hospital that becomes newly eligible for the CHGME Payment Program by starting its own "new medical residency training program" according to Medicare regulation 42 CFR 413.79(e)(1) will also be eligible for CHGME Payment Program funding without having completed a MCR period.

Hospitals that are eligible to receive CHGME Payment Program funding without having completed a MCR period must follow the guidance provided in Section X of this application package which provides special calculation instructions for hospitals that have not completed a MCR report.

***Additional references:***

- *CHGME Payment Program , Federal Register Notice, July 20, 2001 (66 FR 37980)*

***Applicable to the following application forms: HRSA-99-1, HRSA-99-2, and HRSA-99-4***

## ***Section VII***

### ***Determining the Total Number of Resident Full-Time Equivalent***

#### **Cap and Cap Year**

Section 1886(d)(5)(B)(v) of the Social Security Act established “caps” on the number of allopathic and osteopathic residents that a hospital operating an approved GME program may count when requesting payment for DME and IME costs. A hospital’s “**cap**” (hereinafter the “**1996 Base Year Cap**”) is currently defined as the “number of un-weighted resident FTEs enrolled in a hospital’s allopathic and osteopathic residency programs during the most recent cost reporting period ending on or before December 31, 1996 (the “cap year”).” The cap (i.e., limit) on the number of allopathic and osteopathic residents is effective for all cost reporting periods beginning on or after October 1, 1997. Dental and podiatric residents are **exempt** from the cap, but are included in the resident FTE counts for all relevant years to calculate the three-year rolling average.

The “**cap year**” is defined as a hospital’s most recent cost reporting period ending on or before December 31, 1996.

#### **Example:**

CACC had 75 resident FTEs enrolled in its allopathic programs, 25 resident FTEs enrolled in its osteopathic programs and 7 resident FTEs enrolled in its dental and podiatric programs for its 6/30/96 MCR period (its most recent MCR period ending on or before December 31, 1996). Hence, CACC’s cap for Medicare and CHGME Payment Program purposes is 100 (75+25=100). Note: Dental residents do not count towards the cap amount.

#### ***Additional references:***

- *Social Security Act, Section 1886*

- *CHGME Payment Program , Federal Register Notice, March 1, 2001 (66 FR 12940)*
- *CHGME Payment Program , Federal Register Notice, July 20, 2001 (66 FR 37980)*

***Applicable to the following application forms: HRSA-99-1 and HRSA-99-2***

#### **Adjustments to a Hospital’s Cap**

As noted above, Section 1886(d)(5)(B)(v) of the Social Security Act established caps on the number of allopathic and osteopathic residents that a hospital operating an approved GME program may count when requesting payment for DME and IME costs. While Medicare and the CHGME Payment Program only make DME and IME payments for the number of allopathic and osteopathic resident FTEs up to a hospital’s “1996 Base Year Cap”, some hospitals have trained allopathic and osteopathic residents in excess of their 1996 Base Year Cap. There are also a number of hospitals that have reduced their resident positions to a level below their 1996 Base Year Cap. Subsequent legislative actions and related Federal Register notices provisions have been published addressing these issues allowing a hospital’s cap to be permanently changed

(increased or decreased) by CMS or temporarily adjusted at the request of the hospital and approved by CMS. These provisions are detailed below.

### **§422 of the Medicare Modernization Act of 2003**

In December 2003, the President signed the MMA of 2003 (also known as the Medicare Prescription Drug and Improvement Act of 2003), Public Law 108-173. §422 of the MMA, added Section 1886(h)(7) to the SSA. This provision reduced the 1996 Base Year Cap for certain hospitals and redistributed those positions to other hospitals that applied for and received an increase to their 1996 Base Year Cap under §422. Hereinafter, any decreases to a hospital's 1996 Base Year Cap as a result of §422 will be referred to as the "**§422 Cap Reduction**" and any increases to the 1996 Base Year Cap as a result of §422 will be referred to as the "**§422 Cap Increase**." Authority for implementing §422 of the MMA was delegated to the CMS. Determinations made and implemented by CMS in response to §422 are final and not subject to appeal, and binding on the CHGME Payment Program.

Under the CHGME Payment Program statute, by incorporation of the SSA provisions, the HRSA must implement the counting law and rules of Medicare, which include those related to the implementation of §422 of the MMA. Additional information regarding the CHGME Payment Program's implementation of §422 of the MMA can be found in Section VIII of this application package.

### **§5503 of the Affordable Care Act of 2010**

In March 2010, the President signed the ACA of 2010 (also known as the Affordable Care Act of 2010), Public Law 111-148. §5503 of the ACA added Section 1886(h)(8)(F) to the SSA. This provision reduced the 1996 Base Year Cap for certain hospitals and redistributed those positions to other hospitals that applied for and received an increase to their 1996 Base Year Cap under §5503. Hereinafter, any decreases to a hospital's 1996 Base Year Cap as a result of §5503 will be referred to as the "**§5503 Cap Reduction**" and any increases to the 1996 Base Year Cap as a result of §5503 will be referred to as the "**§5503 Cap Increase**." Authority for implementing §5503 of the ACA was delegated to the CMS. Determinations made and implemented by CMS in response to §5503 are final and not subject to appeal, and binding on the CHGME Payment Program.

Under the CHGME Payment Program statute, by incorporation of the SSA provisions, the HRSA must implement the counting law and rules of Medicare, which include those related to the implementation of §5503 of the ACA. Additional information regarding the CHGME Payment Program's implementation of §5503 of the ACA can be found in Section VIII of this application package.

#### ***Additional references:***

- *Social Security Act, Section 1886*
- *CMS, 42 CFR 413.79(c)(2)*

### **Medicare GME Affiliation Agreements and Other Regulations Allowing the Establishment or Adjustment of a Hospital Cap**

Hospitals that were not in existence for the most recent cost reporting period ending on or before December 31, 1996 do not have a “1996 Base Year Cap” and are, therefore, “capped” to a resident FTE count of zero “0”. Hence, eligible hospitals must obtain (or adjust) their 1996 Base Year Cap (or lack thereof) in order to receive CHGME Payment Program funding.

To provide an adjustment to a cap, the CHGME Payment Program will allow hospitals to add resident FTEs to their “1996 Base Year Cap” based on the following Medicare and CHGME Payment Program regulations:

1. the formation of a new medical residency program as described in 42 CFR 413.79(e)(1); or
2. the redistribution of FTE resident positions from a closed hospital as described in §5506 of the ACA (75 FR 72212, November 24, 2010), with the following exceptions:
  - i. In the first cost reporting period in which the hospital takes displaced residents and the hospital closure occurs, the applying hospital would receive a temporary cap adjustment, and the displaced residents FTEs would be exempt from the three-year rolling average and the IRB ratio cap.
  - ii. In the cost reporting period following the one in which the hospital closure occurred, the applying hospital’s permanent cap increase would take effect, and the displaced resident FTEs would no longer be exempt from the three-year rolling average and the IRB ratio cap.
3. the execution of a Medicare GME Affiliation Agreement for an aggregate cap, as set forth in 42 CFR 413.79(f) and 63 FR 26338 as published in the Federal Register on May 12, 1998, with the following exceptions:
  - i. A “new children's teaching hospital” participating in the CHGME Payment Program for the first year must establish an effective date of the agreement for purposes of the CHGME Payment Program . For the first year, unless otherwise specified, the Department will use as the effective date of the Medicare GME Affiliation Agreement for an aggregate cap the date that the hospital becomes eligible for CHGME Payment Program funding. This effective date will only apply to the CHGME Payment Program. A hospital must also have an effective date of July 1<sup>st</sup> for the Medicare Program. Subsequent to the first year of the Medicare GME Affiliation Agreement, the effective date must comply with the above-cited Federal Register final rule, which specifies an effective date of July 1<sup>st</sup> for all affiliation agreements.

The CHGME Payment Program allows this exception because hospitals must meet eligibility criteria and have their caps determined prior to the CHGME Payment Program application deadline. If the CHGME Payment Program application deadline occurs before July 1<sup>st</sup>, some hospitals would have a cap of zero and thus be excluded from receiving funds. By deviating from the prescribed Medicare final rule, the CHGME Payment Program will not place some hospitals in this position.

Unlike the Medicare Program, for the first year that a hospital is eligible to participate in the CHGME Payment Program, the CHGME Payment Program will not prorate the cap based on the effective date of the cap.

Instead, the full value of the cap as determined by the Medicare GME Affiliation Agreement will be used. For purposes of the CHGME Payment Program and its application forms, a hospital that is now starting to train residents previously trained at a hospital that never received or is no longer receiving funds from the CHGME Payment Program will be allowed to use the cap agreed upon in the Medicare GME Affiliation Agreement until the full value of the cap is reflected in the MCR. Afterwards, the hospital will use the resident FTE count and cap from its filed MCR as indicated in Section VI of this application package.

**Example:**

CACC opened as a freestanding children's hospital on January 1, 2008 and would like to apply for FY 2009 CHGME Payment Program funding. The CHGME Payment Program FY2009 application deadline is August 1, 2008. Since CACC did not train residents in 1996, it has a cap of zero, but was able to arrange a Medicare GME Affiliation Agreement for an aggregate cap with Shirley Temple Medical Center in which CACC's current residents had previously trained.

CACC did the following in order to apply for CHGME Payment Program funding:

1. Established a cap by forming a Medicare GME Affiliation Agreement with Shirley Temple Medical Center for an aggregate cap.
2. The agreement had an effective date of January 1, 2008 (for CHGME Payment Program purposes only) and an effective date of July 1, 2008 and expiration date of June 30, 2009 for and in accordance with Medicare rules and regulations.
3. CACC and Shirley Temple Medical Center filed the agreement with their Medicare FIs (the hospital's have different Medicare FIs) before June 30, 2008 (in accordance with Medicare rules and regulations) and provided a signed copy to the CHGME Payment Program following acceptance by the FIs.

Hospitals that report residents to Medicare and are part of an affiliated group may elect to apply the resident FTE limit on an aggregate basis under Medicare rules and regulations. If the combined resident FTE counts for the individual members of the group exceed the aggregate limit, each hospital's resident FTE cap will be adjusted per the agreement between the members of the affiliated group. These adjustments must be reflected in the filed MCR in order to be considered for the CHGME Payment Program.

Hospitals that receive an increase to their 1996 Base Year Cap from CMS under §422 of the MMA of 2003 and participate in a Medicare GME Affiliation Agreement under 42 CFR 413.79(f) on or after July 1, 2005, may only affiliate for the purpose of adjusting their (original) 1996 Base Year Cap. The additional slots that a hospital receives under §422 may not be aggregated and applied (through Medicare GME Affiliation Agreements) to the cap of any other hospitals.

The additional slots that a hospital receives under §5503 may not be aggregated and applied (through Medicare GME Affiliation Agreements) to the cap of any other

hospitals for the 5-year period probationary period. Hospitals that receive an increase to their 1996 Base Year Cap from CMS under §5503 of the ACA of 2010 and participate in a Medicare GME Affiliation Agreement under 42 CFR 413.79(f) for cost reporting periods ending on or after July 1, 2011, may only affiliate for the purpose of adjusting their (original) 1996 Base Year Cap.

After the 5-year probationary period, hospitals that receive an increase to their 1996 Base Year Cap from CMS under §5503 of the ACA of 2010 and participate in a Medicare GME Affiliation Agreement under 42 CFR 413.79(f) for cost reporting periods ending on or after July 1, 2011, may affiliate for the purpose of adjusting their (original) 1996 Base Year Cap and their §5503 Cap Increase. The additional slots that a hospital receives under §5503 may be aggregated and applied (through Medicare GME Affiliation Agreements) to the cap of any other hospitals following the 5-year probationary period beginning July 1, 2016.

Hospitals should refer to 42 CFR 413.79(f) for additional information on adjustments to the cap.

- *Social Security Act, Section 1886*
- *CMS, 42 CFR 413.79(f)*
- *CMS, Federal Register Notice, November 24, 2010 ( 75 FR 72195)*
- *CHGME Payment Program , Federal Register Notice, March 1, 2001 (66 FR 12940)*
- *CHGME Payment Program , Federal Register Notice, July 20, 2001 (66 FR 37980)*

***Applicable to the following application forms: HRSA-99-1, HRSA-99-2, and HRSA-99-4***

**Exceeding the Cap**

**For DME payment calculations** if a hospital's un-weighted resident FTE count for allopathic and osteopathic residents exceeds its FTE limit ("cap"), the weighted count is reduced by the ratio of the resident FTE limit to the actual un-weighted resident FTE count for the subject cost reporting period. *Additional information regarding the CHGME Payment Program's implementation of §422 of the MMA of 2003 and §5503 of the ACA of 2010 is provided below.*

**Example:**

CACC, per its Medicare GME Affiliation Agreement, has a cap of 100. For its 6/30/08 MCR, CACC reported an un-weighted resident FTE count of 150 and a weighted count of 105 for its allopathic and osteopathic programs.

For DME payment purposes, CACC would determine its weighted allopathic and osteopathic resident FTE count by taking its cap divided by its total un-weighted resident FTE count and multiplying that product by the total weighted resident FTE for allopathic and osteopathic residents  $[(100/150) \times 105 = 70.00]$ . *The weighted count of any dental and podiatric residents trained during this MCR*

*period would be added to the 70.00 as dental and podiatric residents are exempt from (i.e., not subject to) the cap.*

**For IME payment calculations** if a hospital's un-weighted resident FTE count for allopathic and osteopathic residents exceeds its FTE limit ("cap"), the hospital must report the lesser of the un-weighted resident FTE count or the cap for the subject cost reporting period. *Additional information regarding the CHGME Payment Program's implementation of §422 of the MMA of 2003 and §5503 of the ACA of 2010 is provided below.*

**Example:**

CACC, per its Medicare GME Affiliation Agreement, has a cap of 100. For its 6/30/08 MCR, CACC reported an un-weighted resident FTE count of 150 and a weighted count of 105 for its allopathic and osteopathic programs.

For IME payment purposes, CACC would report 100.00 [the lesser of the un-weighted allopathic and osteopathic resident FTE count (150) or the cap (100)]. *The un-weighted count of any dental and podiatric residents trained during this MCR period would be added to the 100.00 as dental and podiatric residents are exempt from (i.e., not subject to) the cap.*

**Impact of §422 of the MMA When a Hospital Exceeds its Cap**

§422 of the MMA will affect the determination of DME and IME payments for each of the children's hospitals participating in the CHGME Payment Program. The CHGME Payment Program will begin accounting for the redistribution of the 1996 caps under §422 of the MMA in determining DME and IME payments starting with "portions of a hospital's cost reporting periods occurring on or after July 1, 2005."

Children's hospitals whose cap has been reduced under §422 of the MMA will report and be paid based on the §422 Cap Reduction effective "for portions of cost reporting periods occurring on or after July 1, 2005." The 1996 Base Year Cap will be used for MCR periods prior to the effective date. Children's hospitals will be asked to submit a copy of the letter they received from CMS informing them of the reduction in their cap that includes the actual reduction. The full effect of the reduction for a given hospital will take about three years following implementation of §422 when all three MCR periods reflected in the hospital's application for CHGME Payment Program funding are affected by the §422 Cap Reduction.

For children's hospitals who received an increase to their 1996 Base Year Cap under §422 of the MMA, the CHGME Payment Program will not include resident FTEs counted against the §422 Cap Increase in the 3-year rolling average calculation for purposes of DME and IME payments effective for portions of cost reporting periods and discharges occurring on or after July 1, 2005. In addition, effective for discharges occurring on or after July 1, 2005, the CHGME Payment Program will not apply the intern/resident to bed (IRB) ratio cap to the residents claimed against a hospital's §422 Cap Increase. However, residents claimed against the 1996 Base Year Cap will be subject to the 3-year rolling average and will be subject to the IRB ratio cap.

## **Impact of §5503 of the ACA When a Hospital Exceeds its Cap**

§5503 of the ACA will affect the determination of DME and IME payments for each of the children's hospitals participating in the CHGME Payment Program. The CHGME Payment Program will begin accounting for the redistribution of the 1996 caps under §5503 of the ACA in determining DME and IME payments starting with "portions of a hospital's cost reporting periods ending on or after July 1, 2011."

Children's hospitals whose cap has been reduced under §5503 of the ACA will report and be paid based on the §5503 Cap Reduction effective "for portions of cost reporting periods ending on or after July 1, 2011." The 1996 Base Year Cap and §422 of the MMA (if applicable) will be used for MCR periods prior to the effective date. Children's hospitals will be asked to submit a copy of the letter they received from CMS informing them of the reduction in their cap that includes the actual reduction. The full effect of the reduction for a given hospital will immediately take effect following implementation of §5503 when the current MCR period reflected in the hospital's application for CHGME Payment Program funding is affected by the §5503 Cap Reduction.

For children's hospitals who received an increase to their 1996 Base Year Cap under §5503 of the ACA, the CHGME Payment Program will include resident FTEs counted against the §5503 Cap Increase in the 3-year rolling average calculation for purposes of DME and IME payments effective for portions of cost reporting periods ending on or after July 1, 2011. In addition, effective for portions of cost reporting periods ending on or after July 1, 2011, the CHGME Payment Program will apply the intern/resident to bed (IRB) ratio cap to the residents claimed against a hospital's §5503 Cap Increase.

***Applicable to the following application forms: HRSA 99-1 and HRSA 99-2***

## **Eligible Residency Programs (Approved Training Programs)**

Residents may be included in a hospital's resident FTE count for CHGME Payment Program purposes if the residency program (in which the resident is enrolled) meets **one** of the following criteria:

- The program must be approved by one of the following accrediting bodies:
  - Accreditation Council for Graduate Medical Education (ACGME);
  - Committee on Hospitals of the Bureau of Professional Education of the American Osteopathic Association;
  - Commission on Dental Accreditation of the American Dental Association; or
  - Council of Podiatric Medicine Education of the American Podiatric Medical Association.

- The program may count towards certification of the participant in a specialty or subspecialty listed in the **current** edition of the Directory of Graduate Medical Education Programs (published by the American Medical Association) or the Annual Report and Reference Handbook (published by the American Board of Medical Specialties).
- The program is approved by the ACGME as a fellowship program in geriatric medicine; or
- The program would be accredited except for the accrediting agency's reliance upon an accreditation standard that requires an entity to perform an induced abortion or require, provide, or refer for training in the performance of induced abortions, or make arrangements for such training, regardless of whether the standard provides exceptions or exemptions.

- *CMS, 42 CFR 413.75(b)*

***Applicable to the following application forms: HRSA-99-1, HRSA-99-2, and HRSA-99-4***

**Eligible Residents**

In order to be counted in CHGME payment calculations, a resident must be:

- in an approved residency training program (*see Eligible Residency Program above*); **and either**
  - a graduate of an accredited medical school in the U.S. or Canada; **or**
  - have passed the United States Medical Licensing Examination (USMLE) Parts I & II (international or foreign medical graduates)

***Additional references:***

- *Social Security Act, Section 1886*

***Applicable to the following application forms: HRSA-99-1, HRSA-99-2, and HRSA-99-4***

**International Medical Graduates (IMGs)**

An IMG (formerly known as a foreign medical graduate (FMG)) is a resident who is not a graduate of a medical, osteopathy, dental, or podiatry school, respectively, accredited or approved as meeting the standards necessary for accreditation by the:

1. Liaison Committee on Medical Education of the American Medical Association;
2. American Osteopathic Association;

3. Commission on Dental Accreditation; or the
4. Council on Podiatric Medical Education.

In order for an IMG to be included in a hospital's resident FTE count, s/he must have passed Parts I and II of the USMLE and be enrolled in an eligible residency program.

- *CMS, 42 CFR 413.75(b)*
- *CMS, 42 CFR 413.80*

***Applicable to the following application forms: HRSA-99-1, HRSA-99-2, and HRSA-99-4***

### **Resident Full-Time Equivalent (FTE) Counts**

Resident FTE counts are based on the number of residents training at the hospital complex and certain non-hospital/non-provider settings/sites throughout the hospital's fiscal year. Residents are counted as FTEs based on the total time necessary to fill a full-time residency slot for the year.

For purposes of clarification, a resident FTE is measured in terms of time worked during a residency training year. It is not a measure of the number of individual residents who are working.

***Additional references:***

- *Social Security Act, Section 1886*
- *CMS, 42 CFR 413.78*

***Applicable to the following application forms: HRSA-99-1, HRSA-99-2, and HRSA-99-4***

### **Initial Residency Period (IRP)**

Residents are divided into two categories, those in their:

1. initial residency period (IRP);
  - i. Effective July 1, 1995, an IRP is defined as the minimum number of years required for board eligibility.
  - ii. For osteopathic, dentistry, and podiatric programs, the IRP is the minimum number of years of formal training necessary to satisfy the requirements of the approving body for those programs.
  - iii. Prior to July 1, 1995, an IRP is defined as the minimum number of years required for board eligibility in a specialty or subspecialty plus 1 year (not to exceed 5 years with some exceptions).
2. and those beyond their IRP.

**Example:**

The IRP for pediatrics is 3 years. Therefore, the initial residency period for all pediatric subspecialties (e.g., pediatric cardiology) is three years.

The IRP for general surgery is 5 years. Therefore, the initial residency period of all surgical subspecialties (e.g., pediatric surgery) is 5 years even if the training program requires a longer period of training.

A Pediatric Surgery (subspecialty) resident (or fellow) who previously completed a 5-year general surgery residency program and is now in his first year of subspecialty training (in Pediatric Surgery) is beyond his IRP. His IRP was 5 years (general surgery).

Exceptions apply to the IRP for residents enrolled in preventive medicine, geriatric medicine, transitional year and combined residency programs. Refer to 42 CFR 413.79(a) for additional information on the IRP and exceptions.

***Additional references:***

- *Social Security Act, Section 1886*
- *CMS, 42 CFR 413.79(a)*

***Applicable to the following application forms: HRSA-99-1***

**Weighting of Resident FTE Counts**

The CHGME Payment Program, like Medicare, assigns a 0.5 (or ½) weighting factor to residents who are beyond their IRP. Hence a resident who is beyond his or her initial residency period is factored by 0.5 regardless of the number of years or length of the training program in which s/he is currently enrolled.

**Example:**

John Doe completed a 3-year pediatric residency program on June 30, 2007 at CACC. Following completion of his residency program, John continued his training in a pediatric cardiology fellowship program also at CACC. During the first year of his fellowship program (July 1, 2007 to June 30, 2008), John spent 40% of the academic year at CACC and 60% of the academic year rotating to other teaching hospitals.

CACC's MCR period is the same as the academic year (July 1 to June 30). Hence, CACC would report John as 0.20 for the MCR period ending June 30, 2008 [(40/100) x 0.5 = .20]. CACC must weight John's resident FTE count because the IRP for pediatrics is 3 years and John is in his 4<sup>th</sup> year of training (3 years of residency training and 1 year of fellowship training).

For CHGME Payment Program purposes, the weighting of resident FTE counts is also applicable to the increase in resident FTEs based on §422 of the MMA and §5503 of the ACA et al.

- *CMS, 42 CFR 413.79(b)*

***Applicable to the following application forms: HRSA-99-1***

## **Where Residents Are Counted**

The time a resident spends anywhere within the hospital complex (see “Hospital Complex” below) may be included in the resident FTE count for CHGME Payment Program purposes. In addition, the time spent by residents in certain non-hospital/non-provider settings/sites is counted if the criteria identified below (under “Non-Provider/Non-Hospital Settings and Written Agreements”) are met.

***Additional references:***

- *Social Security Act, Section 1886*
- *CMS, 42 CFR 413.78*
- *CHGME Payment Program , Federal Register Notice, March 1, 2001 (66 FR 12940)*

***Applicable to the following application forms: HRSA-99-1, HRSA-99-2, and HRSA-99-4***

## **Hospital Complex**

The time a resident spends anywhere within the hospital complex (as defined in 42 CFR 413.65) may be included in the resident FTE count for CHGME Payment Program purposes.

The CMS final rule, guiding the implementation of the per- resident amount (PRA) methodology for payment of the direct GME costs of approved GME activities defines a hospital complex as “hospitals and hospital-based providers and sub providers” (54 FR 40286, September 29, 1989). The term “hospital” is defined in Section 1861(e) of the Social Security Act as, in part, an institution which is primarily engaged in providing, by or under the supervision of physicians, diagnostic and therapeutic services to inpatients. The term “provider of services” is defined in Section 1861(u) of the Social Security Act as a hospital, skilled nursing facility, comprehensive outpatient rehabilitation facility, home health agency, hospice program, or, for purposes of Section 1814(g) and Section 1835(c), a fund. The term “sub provider” is defined in the Provider Reimbursement Manual (PRM) Part II, Section 2405(b) as “a portion of a general hospital which has been issued a sub provider identification number because it offers a clearly different type of service from the remainder of the hospital, such as long-term psychiatric.”

The CHGME Payment Program, however, does not differentiate between PPS and non-PPS locations within a hospital complex.

- *CMS, 42 CFR 413.78(a)*
- *CHGME Payment Program , Federal Register Notice, March 1, 2001 (66 FR 12940)*

*Applicable to the following application forms: HRSA-99-1, HRSA-99-2, and HRSA-99-4*

### **Non-Provider/Non-Hospital Settings and Written Agreements**

The time a resident spends in a non-provider (or non-hospital) setting such as a physician’s office or a freestanding community health center in connection with an approved program may be included in the resident FTE count if the criteria in Federal regulation 42 CFR 413.78 and §5504 of the ACA (75 FR 72141, November 24, 2010) are met. For CHGME Payment Program purposes, 42 CFR 413.78 and §5504 of the ACA (75 FR 72141, November 24, 2010) applies to both DME and IME funding received under the CHGME Payment Program.

Written agreements covering residents’ time spent in non-provider/non-hospital settings shall cover a period of one year and must commence on the start of the cost reporting period and must be between the hospital and the non-hospital setting, not between the related School of Medicine (SOM), School of Podiatric Medicine (SOPM), or School of Dentistry (SOD). Refer to 42 CFR 413.78 and §5504 of the ACA (75 FR 72134, November 24, 2010) for additional information on written agreements.

#### ***Additional references and application forms:***

- *Social Security Act, Section 1886*
- *CMS, 42 CFR 413.78*

- *CMS, Federal Register Notice, November 24, 2010 ( 75 FR 72141)*
- *CHGME Payment Program , Federal Register Notice, March 1, 2001 (66 FR 12940)*

*Applicable to the following application forms: HRSA-99-1, HRSA-99-2, and HRSA-99-4*

### **Partial Resident Full-Time Equivalents (FTEs)**

A partial resident FTE is a resident who does not spend all time that is part of the approved training program in the hospital complex or qualified non-hospital setting. A resident will count as a partial resident FTE based on the proportion of allowable time worked at the children’s hospital and qualified non-hospital (provider) settings compared to the total time necessary to fill a full-time residency slot. Instances where a resident would be counted as a partial resident FTE include, if the resident:

1. is part-time;
2. rotates to other hospitals as part of the approved training program sponsored by the children’s hospital;
3. is in a program sponsored by another hospital and spends one or more rotations at the children's hospital;
4. is on maternity leave;
5. joins or leaves a program mid-year; or

6. passes the USMLE mid-year.

Hospitals should consult with their FIs regarding additional exceptions.

The sum of partial FTE resident counts at all institutions where an individual resident works as part of his/her approved residency program may not exceed 1.0 FTE. Also, time spent by residents moonlighting ***may not*** be counted.

**Example:**

During the course of the year, a full-time resident in orthopedic surgery spends 90 days at the children's hospital and 275 days at the hospital sponsoring the residency program. The resident would count as a 0.25 FTE at the children's hospital [ $90/365 = 0.2465$  (rounded to 0.25)].

A part-time third year resident in pediatrics works 4 days week. The normal workweek for a full time third year pediatric residents is 6 days per week. The resident would count as 0.67 FTE [ $4/6 = .6666$  (rounded to 0.67)]

During the course of the year, a full-time resident (who is also a foreign medical graduate) is enrolled in his second year of a three-year family practice residency program at CACC. The resident spends the entire academic year (2007-2008) at CACC and does not rotate to any other sites. The resident took and passed Part I of the USMLE in September 2007. On May 1, 2008, the resident sat for Part II of the USMLE and is awaiting the examination results. In June 2008 the resident learns that he passed Part II of the USMLE. Since CACC's year-end is June 30, CACC may count and include the resident in their resident FTE counts (as a partial FTE) for the period May 1, 2008 (the date he took the examination) to June 30, 2008 (CACC's yearend). The resident would count as 0.17 FTE [ $61 \text{ days (31 days in May + 30 days in June)} / 365 \text{ days} = 0.1671$  (rounded to 0.17)].

***Additional references:***

- *CMS, 42 CFR 413.78(b)*

***Applicable to the following application forms: HRSA-99-1, HRSA-99-2, and HRSA-99-4***

**Research Time**

Research may be included in a hospital's resident FTE count if the research is part of the residency program and the resident carries out the research in:

1. the children's hospital complex (clinical or bench research); or
2. in a non-provider setting where the research involves patient care and the compensation for both the residents, the faculty and other teaching costs are paid by the children's hospital (requirements listed at 42 CFR 413.78 (66 FR 39896, Aug. 1, 2001) and §5505 of the ACA (75 FR 72144, Nov. 24, 2010) must be met.

### **Resident FTE Count Accuracy and Documentation**

Children’s hospitals are responsible for the accuracy of the resident FTE counts submitted to HRSA and are subject to audit. More specifically, the Secretary, by statute, must “determine any changes to the number of residents reported by a hospital in the (*initial*) application of the hospital for the current FY for both direct and indirect expense amounts.” This mandate is accomplished through the Resident FTE Assessment Program carried out by the CHGME Payment Program (see “Application Cycle and Deadlines”). Children’s hospitals are not required to submit with their completed initial applications for CHGME Payment Program funding, documentation in support of the resident FTE data reported in their applications. However, at the time children’s hospitals certify their applications (i.e., sign and submit form HRSA 99-3 to the CHGME Payment Program); the hospital should possess documentation in accordance with 413.75(d) and other applicable Medicare record-keeping regulations. Hospitals that do not report resident FTE counts to Medicare are **not exempt** from this policy.

The CHGME Payment Program has developed a Documentation Guidance (document) and an accompanying sample documentation binder to assist participating hospitals in collecting and providing the documentation necessary to support resident FTEs reported by a children’s hospital in its initial application for CHGME Payment Program funding. Participating children’s hospitals can use this document and the accompanying sample binder for compiling and organizing the information/data to be provided to the CHGME FI during the Resident FTE Assessment process. The Documentation Guidance (document) is available at <http://bhpr.hrsa.gov/childrenshospitalgme/apply.htm>.

## ***Section VIII***

### ***Special Instructions for Calculating Reductions and Increases to a Hospital's 1996 Base Year Cap as a Result of §422 of the Medicare Modernization Act of 2003***

Hospitals that received an increase or reduction to their 1996 Base Year Cap as a result of §422 of the MMA must use the following methodology for calculating and claiming resident FTE counts against their caps.

#### **Decrease to a Hospital's 1996 Base Year Cap (§422 Cap Reduction)**

Children's hospitals who received a decrease to their 1996 Base Year Cap as a result of §422 of the MMA will report and be paid based on the §422 Cap Reduction effective "for portions of cost reporting periods occurring on or after July 1, 2005." The 1996 Base Year Cap will be used for MCR periods prior to the effective date. Children's hospitals will be asked to submit a copy of the letter they received from CMS informing them of the reduction in their cap that includes the actual reduction amount. The full effect of the reduction for a given hospital will take about three years following the implementation of §422 when all three MCR periods reflected in the hospital's application for CHGME Payment Program funding are subject to the §422 Cap Reduction.

#### **Example:**

CACC had 75 resident FTEs enrolled in its allopathic programs, 25 resident FTEs enrolled in its osteopathic programs and 7 resident FTEs enrolled in its dental and podiatric programs for its 6/30/96 MCR period (its most recent MCR period ending on or before December 31, 1996). Hence, CACC's 1996 Base Year Cap for Medicare and CHGME Payment Program purposes is 100 (75+25=100). However, in December 2004 CACC received a letter from CMS indicating that their 1996 Base Year Cap would be reduced by 7.50 resident FTEs under §422 of the MMA. CACC's new, revised cap is now 92.50 (1996 Base Year Cap - §422 Cap Reduction). *Any dental and podiatric residents trained during this MCR period would not be included in the 1996 Base Year Cap or the "new, revised" cap as dental and podiatric residents are exempt from (i.e., not subject to) the cap.*

#### **Increase to a Hospital's 1996 Base Year Cap (§422 Cap Increase)**

Children's hospitals who received an increase to their 1996 Base Year Cap as a result of §422 of the MMA will report and be paid based on the §422 Cap Increase effective "for portions of cost reporting periods occurring on or after July 1, 2005." The 1996 Base Year Cap will be used for MCR periods prior to the effective date. Children's hospitals will be asked to submit a copy of the letter they received from CMS informing them of the adjustment to their cap that includes the actual increase amount. It is important to note that a §422 Cap Increase is not automatically added to a hospital's 1996 Base Year Cap. A hospital's ability to utilize their §422 Cap Increase is contingent upon whether the hospital is training above or below their total adjusted cap

(including the 1996 Base Year Cap and the §5503 Cap (if applicable)). Examples are provided below.

*CACC had 75 resident FTEs enrolled in its allopathic programs, 25 resident FTEs enrolled in its osteopathic programs and 7 resident FTEs enrolled in its dental and podiatric programs for its 6/30/96 MCR period (its most recent MCR period ending on or before December 31, 1996). Hence, CACC's 1996 Base Year Cap for Medicare and CHGME Payment Program purposes is 100 (75+25=100). However, in December 2004 CACC received a letter from CMS indicating that their 1996 Base Year Cap would be increased by 20 resident FTEs under §422 of the MMA. CACC now has a 1996 Base Year Cap of 100 and a §422 Cap Increase of 20.*

**Examples (for Hospitals Training “Above” Their 1996 Base Year Cap):**

Example #2: During CACC's most recent MCR period, CACC claimed 110 allopathic and osteopathic resident FTEs and 7 dental and podiatric resident FTEs. Based on CACC's 1996 Base Year Cap of 100 and §422 Cap Increase of 20, CACC would claim 100 resident FTEs against its 1996 Base Year Cap and the remaining 10 resident FTEs would be claimed against its §422 Cap Increase. *Any dental and podiatric residents trained during this MCR period would be added to the total (un)weighted allopathic and osteopathic resident FTEs following application of the caps as dental and podiatric residents are exempt from (i.e., not subject to) the cap.*

Example #2: During CACC's most recent MCR period, CACC claimed 140 allopathic and osteopathic resident FTEs and 7 dental and podiatric resident FTEs. Based on CACC's 1996 Base Year Cap of 100 and §422 Cap Increase of 20, CACC would claim 100 resident FTEs against its 1996 Base Year Cap and the remaining 40 resident FTEs would be claimed against its §422 Cap Increase. As CACC's number of resident FTEs claimed exceeds both its 1996 Base Year Cap and its §422 Cap Increase, the DME and IME payment calculation methodology described in Section VII of this application package (“Exceeding the Cap”) would be followed. *Any dental and podiatric residents trained during this MCR period would be added to the total (un)weighted allopathic and osteopathic resident FTEs following application of the caps as dental and podiatric residents are exempt from (i.e., not subject to) the cap.*

**Examples (for Hospitals Training “Below” Their 1996 Base Year Cap):**

Example #1: During CACC's most recent MCR period, CACC claimed 95 allopathic and osteopathic resident FTEs and 7 dental and podiatric resident FTEs. Based on CACC's 1996 Base Year Cap of 100 and a §422 Cap Increase of 20, CACC would claim 95 resident FTEs against its 1996 Base Year Cap and zero “0” residents against its §422 Cap Increase. *Any dental and podiatric residents trained during this MCR period would be added to the total (un)weighted allopathic and osteopathic resident FTEs following application of the caps as dental and podiatric residents are exempt from (i.e., not subject to) the cap*

Example #2: During CACC's most recent MCR period, CACC claimed 105 allopathic and osteopathic resident FTEs and 7 dental and podiatric resident FTEs. In August 2011 CACC received a letter from CMS indicating that their 1996 Base Year Cap would be increased by 10 resident FTEs under §5503 of the ACA. Based on CACC's 1996 Base Year Cap of 100, a §5503 Cap Increase of 10, and a §422 Cap Increase of 20, CACC would claim 100 resident FTEs against its 1996 Base Year Cap, five "5" resident FTE against its §5503 Cap Increase and zero "0" residents against its §422 Cap Increase. *Any dental and podiatric residents trained during this MCR period would be added to the total (un)weighted allopathic and osteopathic resident FTEs following application of the caps as dental and podiatric residents are exempt from (i.e., not subject to) the cap*

***Additional references:***

- **CMS, Federal Register Notice, November 24, 2010 ( 75 FR 72193)**
- *CMS, 42 CFR 413.79(b)*

***Applicable to the following application forms: HRSA-99-1***

## ***Section IX***

### ***Special Instructions for Calculating Reductions and Increases to a Hospital's 1996 Base Year Cap as a Result of §5503 of the Affordable Care Act of 2010***

Hospitals that received an increase or reduction to their 1996 Base Year Cap as a result of §5503 of the ACA must use the following methodology for calculating and claiming resident FTE counts against their caps. It is important to note that 75% of the §5503 Cap Increase must be used to train residents in primary care (defined in 42 CFR 413.75(b)) as an approved program in family medicine, general internal medicine, general pediatrics, preventive medicine, geriatric medicine, or osteopathic general practice) and general surgery programs. *Additional information regarding §5503 Cap Increase and its resident FTE requirements is specified in §1886(h)(8)(B)(ii) of the SSA.*

#### **Decrease to a Hospital's 1996 Base Year Cap (§5503 Cap Reduction)**

Children's hospitals who received a decrease to their 1996 Base Year Cap as a result of §5503 of the ACA will report and be paid based on the §5503 Cap Reduction effective "for portions of cost reporting periods ending on or after July 1, 2011." The 1996 Base Year Cap and the §422 Cap Reduction (if applicable) will be used for MCR periods prior to the effective date. Children's hospitals will be asked to submit a copy of the letter they received from CMS informing them of the reduction in their cap that includes the actual reduction amount. The full effect of the reduction for a given hospital will immediately take effect following implementation of §5503 when the current MCR period reflected in the hospital's application for CHGME Payment Program funding is affected by the §5503 Cap Reduction.

#### **Example:**

CACC had 75 resident FTEs enrolled in its allopathic programs, 25 resident FTEs enrolled in its osteopathic programs and 7 resident FTEs enrolled in its dental and podiatric programs for its 6/30/96 MCR period (its most recent MCR period ending on or before December 31, 1996). Hence, CACC's 1996 Base Year Cap for Medicare and CHGME Payment Program purposes is 100 (75+25=100). However, in August 2011 CACC received a letter from CMS indicating that their 1996 Base Year Cap would be reduced by 7.50 resident FTEs under §5503 of the ACA. CACC's new, revised cap is now 92.50 (1996 Base Year Cap - §5503 Cap Reduction). *Any dental and podiatric residents trained during this MCR period would not be included in the 1996 Base Year Cap or the "new, revised" cap as dental and podiatric residents are exempt from (i.e., not subject to) the cap.*

#### **Increase to a Hospital's 1996 Base Year Cap (§5503 Cap Increase)**

Children's hospitals who received an increase to their 1996 Base Year Cap as a result of §5503 of the MMA will report and be paid based on the §5503 Cap Increase effective "for portions of cost reporting periods ending on or after July 1, 2011." The 1996 Base Year Cap and the §422 Cap Increase (if applicable) will be used for MCR periods prior to the effective date. Children's hospitals will be asked to submit a copy of the letter they received from CMS informing them of

the adjustment to their cap that includes the actual increase amount. It is important to note that a §5503 Cap Increase is not automatically added to a hospital's 1996 Base Year Cap. A hospital's ability to utilize their §5503 Cap Increase is contingent upon whether the hospital is training above or below their 1996 Base Year Cap. Examples are provided below.

*CACC had 75 resident FTEs enrolled in its allopathic programs, 25 resident FTEs enrolled in its osteopathic programs and 7 resident FTEs enrolled in its dental and podiatric programs for its 6/30/96 MCR period (its most recent MCR period ending on or before December 31, 1996). Hence, CACC's 1996 Base Year Cap for Medicare and CHGME Payment Program purposes is 100 (75+25=100). However, in August 2011 CACC received a letter from CMS indicating that their 1996 Base Year Cap would be increased by 20 resident FTEs under §5503 of the ACA. CACC now has a 1996 Base Year Cap of 100 and a §5503 Cap Increase of 20.*

#### **Examples (for Hospitals Training “Above” Their 1996 Base Year Cap):**

Example #1: During CACC's most recent MCR period, CACC claimed 110 allopathic and osteopathic resident FTEs and 7 dental and podiatric resident FTEs. Based on CACC's 1996 Base Year Cap of 100 and §5503 Cap Increase of 20, CACC would claim 100 resident FTEs against its 1996 Base Year Cap and the remaining 10 resident FTEs would be claimed against its §5503 Cap Increase. Please note 75% (in this case 7.5) of the resident FTEs claimed against the §5503 Cap Increase would need to be residents training in primary care and general surgery programs. *Any dental and podiatric residents trained during this MCR period would be added to the total (un)weighted allopathic and osteopathic resident FTEs following application of the caps as dental and podiatric residents are exempt from (i.e., not subject to) the cap.*

Example #2: During CACC's most recent MCR period, CACC claimed 140 allopathic and osteopathic resident FTEs and 7 dental and podiatric resident FTEs. Based on CACC's 1996 Base Year Cap of 100 and §5503 Cap Increase of 20, CACC would claim 100 resident FTEs against its 1996 Base Year Cap and the remaining 40 resident FTEs would be claimed against its §5503 Cap Increase. As CACC's number of resident FTEs claimed exceeds both its 1996 Base Year Cap and its §5503 Cap Increase, the DME and IME payment calculation methodology described in Section VII of this application package (“Exceeding the Cap”) would be followed. Please note 75% (in this case 15) of the resident FTEs claimed against the §5503 Cap Increase would need to be residents training in primary care and general surgery programs. *Any dental and podiatric residents trained during this MCR period would be added to the total (un)weighted allopathic and osteopathic resident FTEs following application of the caps as dental and podiatric residents are exempt from (i.e., not subject to) the cap.*

#### **Examples (for Hospitals Training “Below” Their 1996 Base Year Cap):**

Example #1: During CACC's most recent MCR period, CACC claimed 95 allopathic and osteopathic resident FTEs and 7 dental and podiatric resident FTEs. Based on CACC's 1996 Base Year Cap of 100 and a §5503 Cap Increase of 20, CACC would claim 95 resident FTEs against its 1996 Base Year Cap and zero "0" residents against its §5503 Cap Increase. *Any dental and podiatric residents trained during this MCR period would be added to the total (un)weighted allopathic and osteopathic resident FTEs following application of the caps as dental and podiatric residents are exempt from (i.e., not subject to) the cap*

*Applicable to the following application forms: HRSA-99-1*

## **Section X**

### *Special Instructions for Calculating*

#### ***Indirect Medical Education Payment Variables***

Hospitals applying for IME payments should follow the instructions provided below when calculating inpatient discharges, CMI, available beds, and the intern/resident to bed ratio. Additional information and “calculation” instructions are provided in Section X of this application package for hospitals that are eligible to begin receiving CHGME Payment Program funding without having completed a MCR period.

#### **Number of Inpatient Discharges**

The number of inpatient discharges is a measure of a hospital’s inpatient care. This measure is defined as the sum of all daily inpatient discharges for the hospital’s most recently filed (or most recently completed) MCR period from all parts of the hospital complex including healthy newborns from the healthy newborn nursery. *Public Law 108-490 does not exclude inpatient discharges associated with healthy newborns inpatient stays in the “well baby” nursery.*

#### ***Additional references:***

***Applicable to the following application forms: HRSA-99-2***

#### **Case Mix Index (CMI)**

The CMI is the sum of the diagnosis-related group (DRG) weights for all inpatient discharges *excluding healthy newborns* from the most recently filed (or most recently completed) MCR period divided by the number of inpatient discharges for the same period. All hospitals applying for IME payments must submit a CMI on all inpatients discharges using the appropriate CMS DRG version, excluding healthy newborns. This value must be reported to four decimal points. The CMS DRG version to be used for CHGME Payment Program purposes is published, through the CHGME Payment Program alert system each spring, prior to the beginning of the FY for which payments will be made. The principles in determining the version of the CMS grouper is delineated in the July 20, 2001 CHGME Payment Program Federal Register Notice.

***Applicable to the following application forms: HRSA-99-2***

## **Number of Available Beds**

An available bed is defined as an adult or pediatric bed, including beds or bassinets available for lodging inpatients including beds in intensive care units, coronary care units, neonatal intensive care units, short stay units, and other special care inpatient hospital units. Beds in the following location are excluded: healthy newborn nursery, labor rooms, post-anesthesia or post-operative recovery rooms, outpatient areas, emergency rooms, ancillary departments, nurses' and other staff residence, and other areas as are regularly maintained and utilized for purposes other than lodging inpatients. To be considered an available bed, a bed must be permanently maintained for lodging inpatients. It must be available for use and housed in patient rooms or wards (i.e. not in corridors or temporary beds). CMS in its August 11, 2004, final inpatient PPS Federal Register Notice, revised its regulations at 42 CFR 412.105(b) and 412.106(a)(1)(ii) to specify that bed days in a unit that was occupied to inpatient care for at least one day during the preceding 3 months are included in the available bed day count for a month. In addition, bed days for any beds within a unit that would otherwise be considered occupied should be excluded from the available bed day count for the current month if the bed has remained unavailable (could not be made available for patient occupancy within 24 hours) for 30 consecutive days, or if the bed is used to provide outpatient observation services or swing bed skilled nursing care. This clarified policy is effective for discharges occurring on or after October 1, 2004.

The available bed count for the current or prior MCR period is the sum of all available beds per day in the cost reporting period, *excluding* beds and bassinets in the healthy newborn nursery, divided by the number of days in that period.

***Applicable to the following application forms: HRSA-99-2***

## **Intern/Resident to Bed (IRB) Ratio**

The IRB ratio for the most recently filed (or most recently completed) MCR period is equal to the 3-year un-weighted rolling average divided by the number of available beds for the same period. The IRB ratio for the previous MCR period is equal to the un-weighted resident FTE count for the previous MCR period divided by the number of available beds for the same period. To comply as closely as possible with Medicare rules and regulations, the Department applies a cap on the IRB ratio pursuant to regulations at 42 CFR 412.105(a)(1), whereby the ratio from the most recently filed (or most recently completed) MCR period may not exceed the ratio for the hospital's prior cost reporting period as defined above. Hospitals that meet the criteria for an

exception or adjustment to their 1996 Base Year Cap (e.g. through a Medicare GME Affiliation Agreement) should refer to the CMS August 1, 2001 Federal Register Notice which provides additional information and guidance in determining the IRB ratio subject to these exceptions.

Effective for portions of cost reporting periods and discharges occurring on or after July 1, 2005, the CHGME Payment Program will not include resident FTEs counted against the §422 cap in the 3-year rolling average calculation and the CHGME Payment Program will not apply an IRB ratio cap to the resident FTEs counted against a hospital's §422 Cap Increase for purposes of determining IME payments. A §422 IRB calculation will be implemented as guided by CMS rules and regulations. Effective for portions of cost reporting periods ending on or after July 1, 2011, the CHGME Payment Program will include resident FTEs counted against the §5503 cap in the 3-year rolling average calculation and the CHGME Payment Program will apply an IRB ratio cap to the resident FTEs counted against a hospital's §5503 Cap Increase for purposes of determining IME payments.

## *Section XI*

### *Special Calculation Instructions for Hospitals that Have Not Completed a Medicare Cost Reporting Period*

Hospitals eligible to begin receiving CHGME Payment Program funding without having completed a MCR period, must use the following methodology to convert a partial MCR period to a full one. To calculate the variables that follow below, the participating children's hospitals must first determine the number of days in which the hospital has been eligible to receive CHGME Payment Program funding (its period of eligibility for CHGME Payment Program funding).

#### **Determining the Period of Eligibility**

For the initial application process, the period of eligibility is equal to the number of days from the date the hospital became eligible to participate in the CHGME Payment Program to the CHGME Payment Program initial application deadline date. The start date for hospitals that are training residents from an existent program is the effective date of the affiliation agreement for the aggregate cap, established for purposes of the CHGME Payment Program. For new hospitals starting a new residency program, the start date is the date on which the hospital first trains residents.

For the reconciliation application process, the hospital will report the actual resident FTE count from the most recently filed (or most recently completed) MCR. If the hospital has not filed (or completed) an MCR period by the CHGME Payment Program reconciliation application deadline, the period of eligibility is equal to the number of days from the beginning of the FY for which payments are being made (October 1) to the CHGME Payment Program reconciliation application deadline date.

#### **Example:**

CACC became a freestanding children's hospital when it received its own Medicare provider number (55-3300) on January 1, 2008. CACC has a June 30<sup>th</sup> MCR year-end. On July 1, 2008 CACC began training residents previously trained at a hospital that has never received funding from the CHGME Payment Program. The FY 2009 CHGME Payment Program application deadline is August 1, 2008. CACC's period of eligibility for the initial application is July 1, 2008 to July 30, 2008. Hence, the resident FTE counts and all other data reported in CACC's CHGME Payment Program initial application will be based on this period (7/1/08 through 7/30/08). CACC will follow the instructions provided herein to calculate its resident FTE counts, CMI, etc. for an incomplete cost reporting period. CACC's CHGME Payment Program funding will not be based upon a rolling-average until three (3) MCR periods have been completed.

The reconciliation application deadline is May 1, 2009. CACC will not complete its first MCR period until June 30, 2009. Consequently, CACC's period of

eligibility for the reconciliation application will be October 1, 2008 through May 1, 2009.

The following methodology should be used to convert relevant data from a partial MCR period to a full MCR period.

### **Calculating the Resident FTE Count for an Incomplete Cost Reporting Period**

To convert the resident FTE count from a partial MCR period to a full MCR period:

1. Determine the hospital's period of eligibility.
2. Count the actual ("raw") number of un-weighted allopathic and osteopathic resident FTEs during the hospital's period of eligibility.
3. Divide the un-weighted resident FTE count for allopathic and osteopathic residents (number 2 above) by the number of days in during the hospital's period of eligibility (number 1 above). This number is the average number of un-weighted resident FTEs per day.
4. Multiply the average number of un-weighted resident FTEs (number 3 above) by the number of days that your hospital will be training residents during the FY in which payments are being made. This number is the estimated number of un-weighted allopathic and osteopathic resident FTEs trained per year.
5. Use the same methodology (steps 1-4 above) to determine the weighted resident FTE count of allopathic and osteopathic residents. The example below includes the calculation of the weighted resident FTE count.
6. Use the same methodology (steps 1-4 above) to determine the un-weighted and weighted resident FTE count for dental and podiatric residents.

The concept of converting a partial MCR period into a full MCR period is consistent with Medicare regulations. Since the CHGME Payment Program is paying hospitals for training residents during the FY for which payments are being made, the Program will convert a partial training period to reflect the amount of time the hospital will training residents during the FY for which payments are being made. Although this methodology delineates the method by which partial year residents are counted, it is important to note that all counts are subjected to the cap set by the affiliation agreement.

#### **Example:**

CACC received its unique Medicare provider number (in the 3300 series) classifying it as a children's hospital on January 1, 2008. CACC did not begin training residents until Shirley Temple Medical Center transferred its pediatric residents to CACC on July 1, 2008 at which time it met all CHGME Payment Program hospital eligibility criteria. CACC has an affiliation agreement with Shirley Temple Medical Center giving it an aggregate cap of 100 FTEs. Based upon its eligibility, CACC will apply for FY 2009 CHGME Payment Program funding.

1. The number of days in which CACC was eligible to participate in the CHGME Payment Program is 30 days (the number of days from July 1, 2008 to July 30, 2008). *CACC chose to use July 30 as its “end date” to allow time for completing and validating its CHGME Payment Program application and to ensure that the application was postmarked by the CHGME Payment Program application deadline. CACC was not eligible to receive CHGME Payment Program funding prior to July 1, 2008 because it was not training residents.*
2. From July 1<sup>st</sup> to July 30<sup>th</sup> CACC trained a total of 10 un-weighted resident FTEs and 8.5 weighted resident FTEs. This resident FTE count reflects the actual “raw” number of resident FTEs that CACC trained during July. [e.g., The normal workweek for a pediatric resident is 6 days. During the week of July 1 through July 7 CACC had one full-time resident in his IRP that worked 6/6 days (6/6 = 1 FTE) and one part-time FTE in her IRP that worked 4/6 days (4/6 = 0.67 FTE). Hence, the actual “raw” number of weighted and un-weighted residents that CACC trained during the first week of July is 1.67 (1 + .67 = 1.67).]
3. The average un-weighted resident FTE count per day is 0.3333 (10 resident FTEs/30 days = 0.3333) and the average weighted resident FTE count per day is 0.2833 (8.5 FTE residents/30 days = 0.2833).
4. Since CACC will be eligible for the CHGME Payment Program and training residents every day of FY 2004 for which it is applying for CHGME Payment Program funding (October 1, 2008 to September 30, 2009), CACC will report an “estimated annualized” un-weighted FTE resident count of 121.65 [365 x 0.3333 = 121.65 (rounded from 121.6545)] and an “estimated annualized” weighted FTE count of 103.40 [365 x 0.2833= 103.40 (rounded from 103.4045)]. Since CACC's un-weighted FTE count is more than its FTE cap (of 100), CACC will have to reduce its FTE count using the methodology described under “Exceeding the Cap”.

- *CMS, 42 CFR 413.77*
- *CHGME Payment Program , Federal Register Notice, March 1, 2001 (66 FR 12940)*

***Applicable to the following application forms: HRSA-99-1, HRSA-99-2, and HRSA-99-4.***

**Calculating the Case Mix Index (CMI) for an Incomplete Cost Reporting Period**

Hospitals that have not completed a MCR period will report a CMI to the CHGME Payment Program based upon the discharges during the hospital’s period of eligibility.

**Example:**

CACC received its unique Medicare provider (3300 series) number on January 1, 2008. CACC did not begin training residents until Shirley Temple Medical Center transferred its pediatric residents to CACC on July 1, 2008 at which time it met all CHGME Payment Program hospital eligibility criteria. The number of

days in which CACC was eligible to participate in the CHGME Payment Program is 30 days (the number of days from July 1, 2008 to July 30, 2008). *CACC chose to use July 30 as its “end date” to allow time for completing and validating its CHGME Payment Program application and to ensure that the application was postmarked by the CHGME Payment Program application deadline. CACC was not eligible to receive CHGME Payment Program funding prior to July 1, 2008 because it was not training residents.* Hence, CACC’s CMI will be based upon all discharges from July 1 to July 30 using the CMS DRG-version specified by the CHGME Payment Program.

***Additional references:***

- *CMS, 42 CFR 413.77*
- *CHGME Payment Program , Federal Register Notice, July 20, 2001 (66 FR 37980)*

***Applicable to the following application forms: HRSA 99-2***

**Calculating Discharges for an Incomplete Cost Reporting Period**

Hospitals that have not completed a MCR period will report discharge data to the CHGME Payment Program based upon discharges during the hospital’s period of eligibility using the following methodology:

1. Calculate the number of discharges during the hospital’s period of eligibility. This number represents the total number of discharges during the hospital’s period of eligibility.
2. Divide the total number of discharges by the number of days in during the hospital’s period of eligibility. This represents the average number of discharges per day.
3. Multiply the average number of discharges per day by the number of days in which the hospital is eligible to receive CHGME Payment Program funding during the FY for which it is applying for funding.

**Example:**

The number of days in which CACC was eligible to participate in the CHGME Payment Program is 30 days (the number of days from July 1, 2008 to July 30, 2008). *CACC chose to use July 30 as its “end date” to allow time for completing and validating its CHGME Payment Program application and to ensure that the application was postmarked by the CHGME Payment Program application deadline. CACC was not eligible to receive CHGME Payment Program funding prior to July 1, 2008 because it was not training residents.*

1. CACC had 752 discharges from July 1 to July 30.
2. CACC’s average number of discharges per day is 25.07 (752 discharges/30 days = 25.0666).
3. Since CACC will be caring for patients as a freestanding children’s teaching hospital during the entire FY 2004 (October 1, 2008 – September 30, 2009) for which it is applying for CHGME Payment Program funding,

CACC will report 9,150 discharges on HRSA-99-2 [365 days x 25.07 discharges per day = 9,150.55 discharges (whole numbers only)].

***Additional references:***

- *CMS, 42 CFR 413.77(e)(2)*
- *CHGME Payment Program , Federal Register Notice, July 20, 2001 (66 FR 37980)*

***Applicable to the following application forms: HRSA 99-2.***

### **Calculating the Number of Available Beds for an Incomplete Cost Reporting Period**

Hospitals that have not completed a MCR period will calculate their bed count by summing the total available bed count during the hospital's period of eligibility.

**Example:**

The number of days in which CACC was eligible to participate in the CHGME Payment Program is 30 days (the number of days from July 1, 2008 to July 30, 2008). *CACC chose to use July 30 as its "end date" to allow time for completing and validating its CHGME Payment Program application and to ensure that the application was postmarked by the CHGME Payment Program application deadline. CACC was not eligible to receive CHGME Payment Program funding prior to July 1, 2008 because it was not training residents.*

During the period July 1 to July 30, 2008 CACC had 2,730 beds available to house pediatric inpatients and 910 bassinets available for healthy newborn babies. Therefore, the bed count is 91 beds per day (2,730 beds/30 days=91) as healthy newborn babies should be excluded from the reported available bed count.

***Additional references:***

- *CMS, 42 CFR 413.77(e)(2)*
- *CHGME Payment Program , Federal Register Notice, July 20, 2001 (66 FR 37980)*

***Applicable to the following application forms: HRSA 99-2***

### **Calculating Inpatient Days for an Incomplete Cost Reporting Period**

Hospitals that have not completed a MCR period will calculate their inpatient days by summing the daily midnight census during the hospital's period of eligibility.

Then the hospital divides that sum by the number of days in that period, resulting in the average midnight census. The hospital should then multiply the average midnight census with the number of days that the hospital is eligible for the CHGME Payment Program during the FY in which payments are to be made.

**Example:**

The number of days in which CACC was eligible to participate in the CHGME Payment Program is 30 days (the number of days from July 1, 2008 to July 30, 2008). *CACC chose to use July 30 as its “end date” to allow time for completing and validating its CHGME Payment Program application and to ensure that the application was postmarked by the CHGME Payment Program application deadline. CACC was not eligible to receive CHGME Payment Program funding prior to July 1, 2008 because it was not training residents.*

From July 1 to July 30, the CACC had a total of 1,911 inpatient days, resulting in an average of 63.70 inpatients per day (1,911 inpatient days/30 days). Their inpatient day total for the FY would be 365 days x 64 inpatients per day = 23,360 inpatient days (must also use whole numbers).

## Section XII

### **CHGME Payment Program Application Form Instructions Instructions for Completing HRSA 99**

#### **Hospital Demographic and Contact Information**

The HRSA 99 must be completed in its entirety. All sections of this form must be completed unless otherwise specified. The form must contain original signatures. Faxed or photocopied signatures will not be accepted. Specific line item instructions are provided below.

<b>Section</b>	<b>Instructions</b>
<b>1</b>	Provide the official name, physical address, tax identification number, county where the hospital is physically located, Medicare provider number, D&B D-U-N-S number, and website of the applicant children's hospital. Information regarding D&B D-U-N-S numbers can be obtained at 1-800-234-3867 or <a href="http://www.dnb.com">www.dnb.com</a> .
<b>2</b>	Provide the complete name, title, mailing address, telephone number and email address of the person to be notified if the application is funded. <b>All future correspondence will be mailed to this individual only</b> (e.g., notice of award letters).
<b>3</b>	Provide the complete name, title, mailing address, telephone number, email address, and signature of the person authorized to sign for the applicant hospital. An original signature and date are required. This individual must be the same individual that signs form HRSA 99-3.
<b>4</b>	Provide the complete name, title, mailing address, telephone number, email address, and signature of the hospital's Director of Graduate Medical Education. An original signature and date are required. If the hospital does not have a Director of GME, the individual who has oversight responsibility for residents participating in GME programs at the hospital should be identified.
<b>5</b>	Provide the complete name, title, mailing address, telephone number and email address of the person who can provide documentation in support of the information reported in the CHGME Payment Program application for funding. Like all Federal programs, information submitted is subject to audit. <b>All Resident FTE Assessment inquiries and related communications will be directed to this individual.</b>
<b>6</b>	Provide the complete name, title, mailing address, telephone number, and email address of the person who prepared and/or completed this application package for the applicant hospital. This individual will be the person contacted if there are questions or issues related to the information submitted in the CHGME Payment Program application for funding.

# Instructions for Completing HRSA 99-1

## Determination of Weighted and Unweighted Resident FTE Counts

**All values entered on HRSA 99-1 must be taken to the hundredth place [two decimal points (e.g. 38.00 or 12.43)] and the standard rounding rules applied [if the number is .5 or greater then round up to the next number (e.g., 38.189 would be rounded to 38.19)].**

### Instructions for the Initial Application Cycle

GUIDE TO INSTRUCTIONS		
<p>The Section and Line Number that the instructions apply to are identified in this area in the following table.</p>	<p><b>Hospitals that filed a full MCR</b> for the subject cost reporting period must follow the instructions provided in this (left) column for each section. Where specified, hospitals must report the data as stated in the hospital's CMS 2552-96 Worksheets E-3, Part IV and E-3, Part VI from the subject cost reporting period. Deviation from what is stated on Worksheets E-3, Part IV and E-3, Part VI must be supported and attested to by the FI prior to submission of this application in order to be accepted by the CHGME Payment Program. In some instances, the instructions are the same for all hospitals irrespective of the type of MCR the hospital filed for the subject cost reporting period. In those cases, only one set (i.e., one column) of instructions is provided.</p>	<p><b>Hospitals that filed a Low or No-Utilization MCR</b> for the subject recent cost reporting period must follow the instructions provided in this (right) column for each section. In some instances, the instructions are the same for all hospitals irrespective of the type of MCR the hospital filed for the subject cost reporting period. In those cases, only one set (i.e., one column) of instructions is provided.</p>
	<p><b>Hospitals that have not completed at least three (3) MCR periods</b> must follow the instructions provided in italics, where provided below.</p>	

Section	DETERMINATION OF RESIDENT FTE CAP FOR THE HOSPITAL'S MOST RECENT COST REPORTING PERIOD ENDING ON OR BEFORE DECEMBER 31, 1996			
1	<p><b>Hospitals that did not train residents during the most recent cost reporting period ending on or before December 31, 1996 should enter "N/A" on lines 1.01 through 1.03.</b></p>			
1.01	<p>Enter the inclusive dates of the subject cost reporting period. The following format must be used: (From:) <b>mm/dd/yyyy</b> (To:) <b>mm/dd/yyyy</b>.</p>			
1.02	<p>Enter the status of the subject MCR using the codes below:</p>		<p>Enter the status of the subject MCR using the codes below:</p>	
	Code	Definition	Code	Definition
	S	<p><u>Settled.</u></p> <p>This status refers to cost reports that have been settled [a notice of program reimbursement (NPR) issued] by the Medicare FI.</p>	L	<p><u>Low-utilization MCR.</u></p> <p>This status refers to resident FTE counts submitted by the hospital in their initial application that have not been assessed by the CHGME FI.</p>
	S/R/P	<p><u>Settled/Reopened/Preliminary FI.</u></p> <p>This status refers to cost reports that have been settled (an NPR issued by the Medicare FI), then re-opened by the Medicare FI and any changes (to the resident FTE counts during the reopening) have been assessed by the CHGME (or Medicare) FI.</p>	N	<p><u>No-utilization MCR.</u></p> <p>This status refers to resident FTE counts submitted by the hospital in their initial application that have not been assessed by the CHGME FI.</p>

	S/R/RS	<u>Settled/Reopened/Resettled.</u> This status refers to cost reports that have been settled (an NPR issued by the Medicare FI), reopened by the Medicare FI, and then re-settled by the Medicare FI.	C	<u>Complete.</u> This status refers to resident FTE counts that have been assessed by the CHGME FI and reported to the hospital and the CHGME Payment Program in the CHGME FI's final assessment report.
			R	<u>Re-issue.</u> This status refers to resident FTE counts reported in a CHGME FI's final assessment report that have been re-assessed based on a request from the children's hospital or the CHGME FI and the results of the reassessment reported to the hospital and the CHGME Payment Program in the CHGME FI's final re-assessment report.
<b>1.03</b>	Enter the un-weighted resident FTE count for allopathic and osteopathic programs for the most recent cost reporting period ending on or before December 31, 1996. (Worksheet E-3, Part IV Line 3.01 on the hospital's MCR beginning on or after October 1, 1997.)		Enter the un-weighted resident FTE count for allopathic and osteopathic programs for the most recent cost reporting period ending on or before December 31, 1996.	

**Hospitals must complete Sections 4 through 6 of Form HRSA-99-1 prior to completing Sections 2 and 3.**

Section	AVERAGE UNWEIGHTED RESIDENT FTE COUNT	
<b>2</b>		
<b>2.01</b>	Enter the amount from line 4.19 of the 1996 Cap Year column.	
<b>2.02</b>	Enter the amount from line 5.19 of the 1996 Cap Year column. <i>Hospitals that have not completed three (3) MCR periods should enter "N/A".</i>	
<b>2.03</b>	Enter the amount from line 6.19 of the 1996 Cap Year column. <i>Hospitals that have not completed three (3) MCR periods should enter "N/A".</i>	
<b>2.04</b>	Enter the sum of lines 2.01, 2.02 and 2.03 from above divided by 3. <i>Hospitals that have not completed three (3) MCR periods should enter the amount from line 2.01 above.</i>	
<b>2.05</b>	Enter the un-weighted number of resident FTEs in the initial years of all programs that meet the rolling average exception criteria in 42 CFR 413.79(d).	
<b>2.06</b>	Enter the sum of lines 2.04 and 2.05 from above.	
<b>2.07</b>	Enter the amount from line 4.19 of the §422 of the MMA column.	
<b>2.08</b>	Enter the sum of lines 2.06 and 2.07 from above.	
Section	AVERAGE WEIGHTED RESIDENT FTE COUNT	
<b>3</b>		
<b>3.01</b>	Enter the amount from line 4.20 of the 1996 Cap Year column.	
<b>3.02</b>	Enter the amount from line 5.20 of the 1996 Cap Year column. <i>Hospitals that have not completed three (3) MCR periods should enter "N/A".</i>	
<b>3.03</b>	Enter the amount from line 6.20 of the 1996 Cap Year column. <i>Hospitals that have not completed three (3) MCR periods should enter "N/A".</i>	
<b>3.04</b>	<i>Hospitals that have not completed three (3) MCR periods should enter the amount from line 3.01 above.</i>	
	Enter the sum of lines 3.15 and 3.21 from CMS 2552-96 Worksheet E-3, Part IV from your most recently filed MCR which is equivalent to the sum of lines 3.01, 3.02 and 3.03 from above divided by 3. If the sum of lines 3.01 through 3.03 divided by 3 does not equal the sum	Enter the sum of lines 3.01, 3.02 and 3.03 from above divided by 3.

	of lines 3.15 and 3.21 from CMS 2552-96 on your most recently filed MCR, please contact your regional manager immediately.			
<b>3.05</b>	<b>Hospitals that have not completed three (3) MCR periods should enter the weighted number of resident FTEs in the initial years of all programs that meet the rolling average exception criteria in 42 CFR 413.79(d).</b>			
	Enter the weighted number of resident FTEs in the initial years of all programs that meet the rolling average exception criteria in 42 CFR 413.79(d) .		Enter the weighted number of resident FTEs in the initial years of all programs that meet the rolling average exception criteria in 42 CFR 413.79(d) .	
<b>3.06</b>	<b>Hospitals that have not completed three (3) MCR should enter the sum of lines 3.04 and 3.05 from above. This is the weighted resident FTE count.</b>			
	Enter the sum of lines 3.04 and 3.05 from above.			
<b>3.07</b>	Enter the amount from line 4.20 of the §422 of the MMA column.			
<b>3.08</b>	Enter the sum of lines 3.06 and 3.07 from above.			
<b>Section 4</b>	<b>DETERMINATION OF RESIDENT FTE COUNT FOR THE HOSPITAL'S MOST RECENTLY COMPLETED COST REPORTING PERIOD</b>			
	<i>Hospitals that have not completed a MCR period <u>must</u> use the methodology described in the application guidance section titled "Special Calculation Instructions for Hospitals that Have Not Completed a Medicare Cost Reporting Period" to determine their weighted and un-weighted resident FTE counts based upon an incomplete cost reporting period.</i>			
<b>4.01</b>	Enter the inclusive dates of the subject cost reporting period. The following format must be used: (From:) <b>mm/dd/yyyy</b> (To:) <b>mm/dd/yyyy</b> .			
	<b><i>Hospitals that have not completed a full MCR period must enter the date in which the hospital became eligible to participate (i.e. date that the hospital obtained a Medicare provider number and began training residents) and the CHGME Payment Program application deadline. This is the hospital's period of eligibility.</i></b>			
<b>4.02</b>	Enter the status of the subject MCR using the codes below:		Enter the status of the subject MCR using the codes below:	
	Code	Definition	Code	Definition
	AF	<u>As Filed.</u> This status refers to cost reports that have been submitted by the children's hospital to the Medicare FI, but have not yet been reviewed by the CHGME (or Medicare) FI.	L	<u>Low-utilization MCR.</u> This status refers to resident FTE counts submitted by the hospital in their initial application that have not been assessed by the CHGME FI.
	AM	<u>Amended.</u> This status refers to cost reports that have been amended and submitted by the children's hospital to the Medicare FI, but have not yet been reviewed by the CHGME	N	<u>No-utilization MCR.</u> This status refers to resident FTE counts submitted by the hospital in their initial application that have not been assessed by the CHGME FI.

		(or Medicare) FI.		
	P	<u>Preliminary.</u> This status refers to resident FTE counts that have been assessed by the CHGME (or Medicare) FI where the cost report has not yet been settled (notice of program reimbursement has not been issued).	C	<u>Complete.</u> This status refers to resident FTE counts that have been assessed by the CHGME FI and reported to the hospital and the CHGME Payment Program in the CHGME FI's final assessment report.
	S	<u>Settled.</u> This status refers to cost reports that have been settled [an NPR issued] by the Medicare FI.	R	<u>Re-issue.</u> This status refers to resident FTE counts reported in a CHGME FI's final assessment report that have been re-assessed based on a request from the children's hospital or the CHGME FI and the results of the reassessment reported to the hospital and the CHGME Payment Program in the CHGME FI's final re-assessment report.
	S/R/P	<u>Settled/Reopened/Preliminary FI.</u> This status refers to cost reports that have been settled (an NPR issued by the Medicare FI), then re-opened by the Medicare FI and any changes (to the resident FTE counts during the reopening) have been assessed by the CHGME (or Medicare) FI.		
	S/R/RS	<u>Settled/Reopened/Resettled.</u> This status refers to cost reports that have been settled (an NPR issued by the Medicare FI), re-opened by the Medicare FI, and then re-settled by the Medicare FI.		
<b>4.03</b>	1996 cap year column: Enter the un-weighted resident FTE count for allopathic and osteopathic programs for the most recent cost reporting period ending on or before December 31, 1996 which is equivalent to Line 3.01 Line 3.01 from CMS 2552-96 Worksheet E-3, Part IV from the subject MCR. This is the total weighted resident FTE count for dental and podiatric programs.
<b>4.19</b>	1996 cap year column: Enter the sum of lines 4.08, 4.15 and 4.16 from above (the sum of lines 5.08, 5.15 and 5.16 for Section 5 and the sum of lines 6.08, 6.15 and 6.16 for Section 6). This is the hospital's total un-weighted FTE resident count.	
	§422 of the MMA column: Enter line 4.08 from above.	
<b>4.20</b>	1996 cap year column: Enter the sum of lines 3.10 and 3.11 from CMS 2552-96 Worksheet E-3, Part IV. This should equal the sum of lines 4.13 and 4.18 (sum of lines 5.13 and 5.18 for Section 5 and the sum of lines 6.13 and 6.18 for Section 6).	1996 cap year column: Enter the sum of lines 4.13 and 4.18 from above (sum of lines 5.13 and 5.18 for Section 5 and the sum of lines 6.13 and 6.18 for Section 6). This is the hospital's total weighted FTE resident count.
	§422 of the MMA column: Enter line 4.13 from above.	
<b>Section 5</b>	<b>DETERMINATION OF RESIDENT FTE COUNT FOR THE HOSPITAL'S PRIOR COST REPORTING PERIOD</b>	
	The direct GME FTE resident cap slots hospitals received under 42 CFR 413.79(c)(4) are not subject to the three	

	<p>year rolling average; therefore, Section 5 does not include a §422 of the MMA column and related guidance is not applicable this section.</p> <p><i>Hospitals that have not completed three (3) MCR periods should enter “N/A” on lines 5.01 through 5.20.</i></p>
<b>Section 6</b>	<p><b>DETERMINATION OF FTE RESIDENT COUNT FOR THE HOSPITAL’S PENULTIMATE COST REPORTING PERIOD</b></p>
	<p>The direct GME FTE resident cap slots hospitals received under 42 CFR 413.79(c)(4) are not subject to the three year rolling average; therefore, Section 6 does not include a §422 of the MMA column and related guidance is not applicable this section.</p> <p><i>Hospitals that have not completed three (3) MCR periods should enter “N/A” on lines 6.01 through 6.20.</i></p>

## **Instructions for the Reconciliation Application Cycle**

All children’s hospitals, regardless of their filing status, will use the resident FTE counts as reported by their CHGME FI in his/her final Resident FTE Assessment Report to complete their reconciliation application which includes an updated and revised, as needed, HRSA 99-1. For additional information regarding the Resident FTE Assessment Program see Section II.

## Instructions for Completing HRSA 99-2

### Determination of Indirect Medical Education Data Related to the Teaching of Residents

#### Inpatient Data for the Current Medicare Cost Report (MCR) Period

The “current” MCR period is defined as the hospital’s most recently filed MCR for hospitals that file full MCRs (report residents to Medicare on CMS 2552-96, Worksheet E-3, Part IV) or the most recently completed MCR period for hospitals that file low or no-utilization MCRs.

**Hospitals that have not completed a full MCR period must** use the methodology described in the application guidance section titled “Special Calculation Instructions for Hospitals that Have Not Completed a Medicare Cost Reporting Period” to complete the below.

<b>1.01</b>	Inclusive dates of the current MCR period. Enter the inclusive dates of the MCR period reported on line 4.01 of HRSA 99-1.
<b>1.02</b>	Number of Inpatient Days. The sum of the entire midnight census counts including nursery days for the MCR period reported on line 1.01 above. <b>[Value must be taken to two decimal points (i.e., 38.00 or 12.43).]</b>
<b>1.03</b>	Number of Inpatient Discharges. The sum of all inpatient discharges including healthy newborns for the MCR period reported on line 1.01 above. <b>[Value must be taken to two decimal points (i.e., 38.00 or 12.43).]</b>
<b>1.04</b>	Case Mix Index (CMI). The CMI is the sum of the diagnosis-related group (DRG) weights for all discharges during the MCR period identified on line 1.01 above divided by the number of discharges. The CMI represents the average DRG relative weight for the hospital. All hospitals must submit a CMI on all patient discharges using the appropriate CMS DRG version, <b>excluding</b> healthy newborns. <b>[Value must be taken to 4 decimal points (i.e., 1.2105).]</b>  The CMI is utilized in the IME formula to determine IME payments. Hospitals that do not submit a CMI are not eligible for IME payments. These hospitals are required to initial the appropriate box on line 1.04 of HRSA 99-2 acknowledging their ineligibility for IME payments. The initials on HRSA 99-2 must be consistent with the signature on HRSA 99-3.

#### Intern/Resident-to-Bed (IRB) Ratio

To comply as closely as possible with Medicare rules and regulations, the Department applies a cap on the IRB ratio, similar to the cap applied by the Medicare program pursuant to regulations at 42 CFR 412.105(a)(1), whereby the ratio may not exceed the ratio for the hospital’s most recent prior cost reporting period. For those hospitals whose IRB ratio changes, there will be a one-year delay in the implementation of the revised IRB. Starting in FY 2002 the CHGME Payment Program will implement a cap on the IRB ratio. The IRB cap may not exceed the ratio for the hospital’s previous cost reporting period.

#### Calculate the IRB Ratio for the Current MCR Period

The “current” MCR period is defined as the hospital’s most recently filed MCR for hospitals that file full MCRs (report residents to Medicare on CMS 2552-96, Worksheet E-3, Part IV) or the most recently completed MCR period for hospitals that file low or no-utilization MCRs.

Hospitals that meet the criteria for an exception or adjustment to the cap should refer to the Centers for Medicare and Medicaid Services August 1, 2001 Federal Register Notice (66 FR 39878) which provides additional information and guidance in calculating the IRB ratio.

<b>1.05</b>	Enter the 3-year adjusted un-weighted FTE rolling average for the current MCR period. The 3-year un-weighted FTE rolling average for the current MCR period is equal to line 2.06 of HRSA 99-1. Enter the data reported on line 2.06 of HRSA 99-1. <b>[Value must be taken to two decimal points (i.e., 38.00 or 12.43).]</b>
<b>1.06</b>	Enter the bed count for the current MCR period. The bed count for the current MCR period is the sum of all available beds per day in the cost reporting period, <b>excluding</b> beds and bassinets in the healthy newborn nursery, divided by the number of days in that period. If a children’s hospital has not completed a Medicare cost report period prior to submission of an application to the CHGME Payment Program, it would base the bed count on the sum of all available beds per day, <b>excluding</b> beds and bassinets in the healthy newborn nursery, in the period from the day it became eligible for the CHGME program until the CHGME application deadline, divided by the number of days in that period. A bed is any bed that is permanently maintained for lodging inpatients. The bed count number is utilized in the IME formula to determine IME payments. <b>[Value must be taken to two decimal points (i.e., 38.00 or 12.43).]</b>
<b>1.07</b>	Enter the IRB ratio for the current MCR period. The IRB ratio is equal to the 3-year un-weighted rolling average (line 1.05

above) divided by the bed count (line 1.06 above). **[Value must be taken to six decimal points (i.e. 34.567800).]**

### Calculate the IRB Ratio for the Previous MCR Period

The “previous” MCR period refers to the annual cost reporting period that ended one year prior to the cost reporting period identified on line 1.01 above. The previous MCR period should equal line 5.01 of HRSA 99-1

Hospitals that were not required to complete section 5 of HRSA 99-1 should contact their regional manager for additional information and guidance for lines 1.08 through 1.11 below.

Hospitals that meet the criteria for an exception or adjustment to the cap should refer to the Centers for Medicare and Medicaid Services August 1, 2001 Federal Register Notice (66 FR 39878) which provides additional information and guidance in calculating the IRB ratio.

<b>1.08</b>	Inclusive dates of the previous MCR period. Enter the inclusive dates of the MCR period reported on line 5.01 of HRSA 99-1.
<b>1.09</b>	Unweighted FTE count for the previous MCR period. Enter the un-weighted FTE count for the previous MCR period which is equal to line 5.19 of HRSA 99-1. <b>[Value must be taken to two decimal points (i.e., 38.00 or 12.43).]</b>
<b>1.10</b>	Bed count for the previous MCR period. Calculate the available bed count for the previous MCR period. The bed count for the previous MCR period is the sum of all available beds per day in the cost reporting period, <b>excluding</b> beds and bassinets in the healthy newborn nursery, divided by the number of days in that period. <b>[Value must be taken to two decimal points (i.e., 38.00 or 12.43).]</b>
<b>1.11</b>	IRB ratio for the previous MCR period. Calculate the IRB ratio for the previous MCR period. The IRB ratio is equal to the un-weighted FTE count for the previous MCR period (line 1.09 above) divided by the bed count (line 1.10 above). <b>[Value must be taken to six decimal points (i.e. 34.567890 or 12.540000).]</b>

### IRB Cap

<b>1.12</b>	IRB Cap. Enter the lesser of 1.07 or 1.11. <b>[Value must be taken to six decimal points (i.e. 34.567890).]</b>
-------------	---

### §422 of the MMA IRB Ratio for the Current MCR Period

<b>1.13</b>	§422 of the MMA un-weighted resident FTE count for the current MCR period. The un-weighted resident FTE count for the current MCR period is equal to line 4.19 of the §422 of the MMA column of the HRSA 99-1. Enter the data reported on line 4.19 from the §422 of the MMA column of HRSA 99-1. <b>[Value must be taken to two decimal points (i.e., 38.00 or 12.43).]</b>
<b>1.14</b>	Bed count for the current MCR period. Enter the available bed count for the current MCR period. This should be consistent with the data reported in line 1.06 above. <b>[Value must be taken to two decimal points (i.e., 38.00 or 12.43).]</b>
<b>1.15</b>	§422 of the MMA IRB ratio for the current MCR period. Calculate the §422 of the MMA IRB ratio for the current MCR period. The §422 of the MMA IRB ratio is equal to the increase in the un-weighted FTE count (line 1.13 above) divided by the bed count (line 1.14 above). <b>[Value must be taken to six decimal points (i.e., 34.567890 or 12.540000).]</b>

### Outpatient Data

<b>1.16</b>	Number of Ambulatory Surgery Visits. Total number of scheduled outpatient ambulatory surgical visit provided to patients who do not remain in the hospital overnight. The surgery may be performed in operating suites also used for inpatient surgery specifically designed surgical suites for outpatient surgery, or procedure rooms within an outpatient care facility.
<b>1.17</b>	Number of Radiology Visits. Total number of diagnostic radiology visits provided to patients in the outpatient setting such as computed tomographic scanner (CT scan), magnetic resonance imaging (MRI), position emission tomography (PET), Single photon emission computerized tomography (SPECT), and ultrasound. (Do not include inpatient testing)
<b>1.18</b>	Number of Urgent Care Visits. Total number of urgent care visits that provide care and treatment for problems that are not life threatening but require attention over the short term.
<b>1.19</b>	Number of Emergency Department Visits. Total number of emergency room visits for patients whose condition requires immediate care.
<b>1.20</b>	Number of Clinic Visits. Total number of clinic visits to each specialized medical unit responsible for the diagnosis and treatment of patients on an outpatient, non-emergency basis. Visits to the satellite clinics and primary group practices should be included if revenue is received by the hospital.

## *Instructions for Completing HRSA 99-3*

### **Hospital Certification**

A certification statement must be completed and signed by the applicant hospital's certifying official attesting to the legitimacy of the application for funds under the CHGME Payment Program. By signing the certification statement, the applicant hospital agrees to adhere to all the conditions listed and is aware that the applicant hospital may be denied entry to or revoked from the program if any conditions are violated.

The certification statement must contain an original signature. Faxed or photocopied signatures will not be accepted. The HRSA 99-3 should be signed by the individual authorized to sign for the application hospital on HRSA 99 (number 3).

As a part of the first certification statement, the required **Assurances, Certifications and Other Requirements** are included. The certifying official is certifying the applicant hospital has met the requirements and the necessary forms have been filed (see attached **Assurances, Certifications and Other Requirements**). If one or more of the following assurances, certifications and other requirements are not met, attach an explanation on plain white paper.

For assurances addressed in paragraphs A through D, contact the Voluntary Compliance and Outreach Division at (202) 619-2595, to obtain information and/or confirm the applicant hospital's submission and acceptance by the Department of Health and Human Services (DHHS) Office for Civil Rights an Assurance of Compliance Form HHS 690.

## Instructions for Completing HRSA 99-4

### Government Performance and Results Act Tables

*Hospitals must report data from the cost reporting period reflected on line 4.01 of HRSA 99-1*

**Table 1. Number of FTE Residents Supported by the Children’s Hospitals in Approved Residency Training Programs**

**Note:** Applicants requesting funding must submit the required data in the following format. This data is for residents rotating through both the inpatient and outpatient settings of the hospital. Resident FTE counts reported below should be un-weighted and line 1.04 (below) should be consistent with the un-weighted resident FTE counts reflected in Form HRSA 99-1 Section 4.

Line	Instructions
1.01	<b>Sponsored* by the Children’s Hospital and Rotating at the Children’s Hospital.</b> Provide the number of FTE residents (family medicine, general internal medicine, general pediatrics, preventive medicine, geriatric medicine, osteopathic general practice, general surgery, subspecialty pediatric & fellows, and all other non-pediatric) training in your hospital and sponsored by your hospital during the cost reporting period.
1.02	<b>Sponsored by the Children’s Hospital and Rotating at Non-provider Sites.</b> Provide the number of FTE residents’ family medicine, general internal medicine, general pediatrics, preventive medicine, geriatric medicine, osteopathic general practice, general surgery, subspecialty pediatric & fellows, and all other non-pediatric sponsored by your hospital but are rotating to non-provider sites during the cost reporting period.
1.03	<b>Sponsored by Other Hospitals and Rotating at the Children’s Hospital.</b> Provide the number of FTE residents (family medicine, general internal medicine, general pediatrics, preventive medicine, geriatric medicine, osteopathic general practice, general surgery, subspecialty pediatric & fellows, and all other non-pediatric sponsored by another hospital but are rotating to your hospital during the cost reporting period.
1.04	<b>Total Number of FTE Residents.</b> Provide the total number of FTE Residents from the sum of Lines 1.01 through 1.03 (above)
1.05	<b>Sponsored by the Children’s Hospital and Rotating at Other Hospitals.</b> Provide the number of FTE resident’s family medicine, general internal medicine, general pediatrics, preventive medicine, geriatric medicine, osteopathic general practice, general surgery, subspecialty pediatric & fellows, and all other non-pediatric sponsored by your hospital but are rotating to other hospitals during the cost reporting period.

#### Definitions

<b>Sponsoring Institution</b>	*CHGME Payment Program defines a sponsoring institution as an institution, which assumes the ultimate responsibility for a graduate medical education program. According to the Accreditation Council for Graduate Medical Education (ACGME), the following are the institutional requirements for a Sponsoring Institution: 1) A residency program must operate under the authority and control of a sponsoring institution. 2) There must be a written statement of institutional commitment to GME that is supported by the governing authority, the administration, and the teaching staff. 3) Sponsoring institutions must be in substantial compliance with the Institutional Requirements and must ensure that their ACGME-accredited programs are in substantial compliance with the Program Requirements and the applicable Institutional Requirements. 4) An institution’s failure to comply substantially with the Institutional Requirements may jeopardize the accreditation of all of its sponsored residency programs.
<b>Family Medicine Resident</b>	Residents training in their initial residency period of a family medicine residency program

<b>General Internal Medicine Resident</b>	Residents training in their initial residency period of a general internal medicine residency program
<b>General Pediatric Resident</b>	Residents training in their initial residency period of a general pediatric residency program
<b>Preventive Medicine Resident</b>	Residents training in their initial residency period of a preventive medicine residency program
<b>Geriatric Medicine Resident</b>	Residents training in their initial residency period of a geriatric medicine residency program
<b>Osteopathic General Practice Resident</b>	Residents training in their initial residency period of an osteopathic general practice residency program
<b>General Surgery Resident</b>	Residents training in their initial residency period of a general surgery residency program
<b>Subspecialty Pediatric Resident</b>	Residents training beyond their initial residency period (i.e., fellows)
<b>All Other Non-Pediatric Resident</b>	Residents training in their initial residency period not specifically in family medicine, general internal medicine, general pediatrics, preventive medicine, geriatric medicine, osteopathic general practice, general surgery (i.e., radiology, pathology, endocrinology, dental)

**Table 2. Hospital's Total and Operating Margins**

<b>Margin Types</b>	<b>Hospitals Filing Low or No-Utilization Medicare Cost Reports</b>	<b>Hospitals Filing Full Medicare Cost Reports</b>
<b>Total Margins</b>	Total margin is defined as the net income from all sources [(net patient revenue + all other income)-(total operating expenses + other expenses)] divided by total hospital revenues (net patient revenues + total other income) multiplied by 100	To calculate the total margin take Worksheet G-3 Line 31 and divide it by Line 3 + Line 25.
<b>Operating Margins</b>	The operating margin is defined as the net income from service to patients (net patient revenues – total operating expenses) divided by net patient revenues (total patient revenues – contractual allowances) multiplied by 100	To calculate the operating margin, take the number from Worksheet G-3 line 3, subtract the number from worksheet A Column 3 line 95, divide by the number from worksheet G-3, line 3 and multiply it by 100.

**Table 3. Hospital's Allowable Operating Expenses**

<b>Margin Types</b>	<b>Hospitals Filing Low or No-Utilization Medicare Cost Reports</b>	<b>Hospitals Filing Full Medicare Cost Reports</b>
<b>Total Allowable Operating Expenses</b>	Contact the hospital's fiscal intermediary to clarify what Medicare accepts as allowable operating expenses, if mechanism is not already identified in the hospital's financial statements	The total allowable operating expenses can be identified on the hospital's Medicare cost report - Worksheet G-2 Part II Line 26

**Table 4. Hospital's Revenue and Expenses Attributed to Patient Care**

<b>Revenue/ Expense Type</b>	<b>Inpatient</b>	<b>Outpatient</b>
------------------------------	------------------	-------------------

Hospital's gross revenue attributed to Medicaid and SCHIP (Medicaid refers to any funding provided by Title XIX including that from Medicaid HMOs and DSH payments. SCHIP-State Children's Health Insurance Program refers to funding provided under Title XXI).	Revenue received by the hospital from the Medicaid and SCHIP programs for inpatient care. Report as dollar amounts rather than percentages	Revenue received by the hospital from the Medicaid and SCHIP programs for outpatient care. Report as dollar amounts rather than percentages
Hospital's gross revenue attributed to Medicare	Revenue received by the hospital from the Medicare for inpatient care. Report as dollar amounts rather than percentages	Revenue received by the hospital from the Medicare for outpatient care. Report as dollar amounts rather than percentages
Hospital's gross revenue attributed to self-pay	Revenue received by the hospital directly from patients for inpatient care. Report as dollar amounts rather than percentages	Revenue received by the hospital directly from patients for outpatient care. Report as dollar amounts rather than percentages
Hospital's gross revenue attributed to other sources	Revenue received by the hospital from other sources for inpatient care not listed above. Report as dollar amounts rather than percentages	Revenue received by the hospital from other sources for outpatient care not listed above. Report as dollar amounts rather than percentages
Hospital's total gross revenue attributed to patient care	Total gross revenue received by the hospital for inpatient care (sum of inpatient columns 1-4). Report as dollar amounts rather than percentages.	Total gross revenue received by the hospital for outpatient care (sum of outpatient columns 1-4). Report as dollar amounts rather than percentages.
Hospital's total expenses attributed to uncompensated care	Total expenses that the hospital attributes to uncompensated inpatient care. Report as dollar amounts rather than percentages.	Total expenses that the hospital attributes to uncompensated outpatient care. Report as dollar amounts rather than percentages.
Hospital's total expenses attributed to charity care	Total expenses that the hospital attributes to charity care in the inpatient setting. Report as dollar amounts rather than percentages.	Total expenses that the hospital attributes to charity care in the outpatient setting. Report as dollar amounts rather than percentages.

## *Instructions for Completing HRSA 99-5*

### **Application Checklist**

The application checklist must be completed following the instructions provided on the checklist itself. All required forms and supporting documentation should be included in the application package mailed to the CHGME Payment Program in the order that the forms and supporting documentation are listed on the checklist.
