## EXECUTIVE SUMMARY

The mission of the State Department's Bureau of International Narcotics and Law Enforcement Affairs (INL) is to minimize the impact of international crime and illegal drugs on the United States, its citizens, and partner nations by providing effective foreign assistance and fostering global cooperation. This mission, which centers on helping our partner nations establish a capable and accountable criminal justice sector, also includes efforts to stabilize post-conflict societies through criminal justice sector development and reform. This mission supports peace and security by stabilizing and strengthening security institutions and by combating narco-trafficking and other transnational crimes such as money laundering and criminal gangs. It promotes just and democratic governments by strengthening justice sector institutions, good governance, and respect for human rights.

INL combines forces with other U.S. Government (USG) and international agencies and takes a regional approach to widespread problems. INL also encourages governments to take responsibility as equal partners in global efforts to combat transnational crime, including drug trafficking. The Bureau's priority programs support three inter-related objectives:

- **BUILDING CRIMINAL JUSTICE SYSTEMS:** Institutionalize rule of law by developing and expanding criminal justice systems to strengthen partner country law enforcement and judicial effectiveness, foster cooperation in legal affairs, and advance respect for human rights;
- **COUNTER-NARCOTICS:** Disrupt the overseas production and trafficking of illicit drugs through targeted counter-narcotics and institution-building assistance and coordination with foreign nations and international organizations, and;
- **TRANSNATIONAL CRIME:** Minimize the impact of transnational crime and criminal networks on the United States and its allies through enhanced international cooperation and foreign assistance.

## **SECTION I – PROGRAM DESCRIPTION**

### **BACKGROUND**

INL is part of the Department of State's multi-faceted response to transnational criminal activity. Dedicated to strengthening criminal justice systems, countering the flow of illegal narcotics, and minimizing transnational crime, INL plays a key role in leading the development and

synchronization of U.S. international counternarcotics and anti-crime assistance. INL's technical support is tailored to bolster capacities of partner countries through multilateral, regional, and country-specific programs.

In support of these efforts, INL is seeking applications for seven (7) grant projects to comprehensively assess rule of law and criminal justice systems in (29) countries in the Western Hemisphere, including seven (7) Central America countries: Belize, Guatemala, El Salvador, Honduras, Nicaragua, Costa Rica, and Panama, fourteen (14) Caribbean countries, including Haiti, Jamaica, the Dominican Republic, The Bahamas, Guyana, Suriname, Trinidad and Tobago, and the Eastern Caribbean nations (Antigua and Barbuda, St. Kitts and Nevis, St. Lucia, St. Vincent and the Grenadines, Grenada, Dominica, and Barbados), and eight (8) South America/Southern Cone countries, Venezuela, Argentina, Bolivia, Brazil, Colombia, Ecuador, Peru, and Paraguay.

Ultimately, this project should support the goals of the INL Rule of Law (ROL) Program, which are to (1) support Western Hemisphere countries' transition to and implementation of an oral, adversarial and accusatory criminal justice system and (2) address important institutional weaknesses, particularly those that exacerbate the problem of impunity.

Strengthening the rule of law is a key foreign policy objective and integral to the United States government's overall effort to ensure peace and stability in the Western Hemisphere. U.S. government programs in rule of law, implemented through the State Department's Bureau of International Narcotics and Law Enforcement Affairs (INL), are focused on building the capacity of justice institutions, enhancing legal education, increasing opportunities for minorities and women, improving access to justice and creating a demand for justice.

INL directs and oversees critical foreign assistance activities pertaining to counter-narcotics, crime, rule of law and law enforcement training in the region. INL is now seeking applications from qualified organizations with the requisite capacity and experience to implement rule of law indicators and measuring programs. Specifically, the organization will develop and implement high-quality indicators to assess regional adherence to the rule of law; produce a comprehensive and robust comparative index of the indicators that relies on primary data; present the data in an easy-to-read format; compare countries' adherence to the rule of law against all other countries in the index, against other countries in a region of the world, and against other countries with similar Gross Domestic Products. Additionally, the organization will develop measurement instruments that can serve as the basis for systemic and relevant data analysis of the justice sector programs. The organization will use the data they have gathered with the information INL has gathered for INL programs during implementation with the aim of providing additional evidence to assist INL's assessment of the effectiveness of INL programs in these countries.

To date, INL's ROL Program has funded efforts to improve justice sector professionals and practitioners knowledge, understanding, and skills to operate in an oral adversarial criminal justice system; institutional reorganization design by identifying procedural and conduct reforms within criminal justice institutions, including the courts; new technology to improve the efficacy, efficiency, and effectiveness of justice sector institutions; equipment and other needs to support and improve the implementation of justice; and the development of future leaders through educational and professional development at leading legal education institutions.

To further progress in these areas, INL has allocated up to **\$6,964,000 U.S. Dollars** to support “*Western Hemisphere Rule of Law Index and Analysis Program*” within this NOFO. The funding will be allocated in separate grants as noted below:

**PROJECT PURPOSE/DESCRIPTION**

INL is seeking proposals addressing how the implementer will develop and deliver the Western Hemisphere Rule of Law Index Justice Polling and Analysis Program. The implementer shall provide, on an annual basis, a quantitative country profile for each assigned country that reflects the status of the rule of law, by developing a product that can analyze the rule of law in all of the assigned Western Hemisphere countries to be compared over time and in relation to the situation worldwide. The program will contain the following elements:

- Collecting primary data from local experts in the requested countries;
- Collecting primary data from a representative sample of the general public and development of graphical reports produced with the data in the requested countries every two (2) years;
- Triangulating the data to produce comparable, independent, and reliable scores that reflect the status of the rule of law in the requested countries;
- Presenting these scores in a condensed, easy-to-read format;
- Collecting data in countries experiencing changes in their political landscape or in countries expecting major institutional changes (e.g. after a major reform);
- Developing graphical reports summarizing individuals’ perceptions of and experiences with corruption in the Caribbean;
- Collecting primary data from inmates in Honduras, El Salvador, and Costa Rica, charged

- under the inquisitorial and the accusatorial systems and the development of graphical reports;
- Ensuring all data is transferred to INL/WHP at the end of each year and/or upon request in a useable format.

The successful proposals will describe efforts to develop measurement instruments that can assist INL to inform and track its rule of law programming in the Western Hemisphere by:

- Collecting primary data on the perceptions of ordinary citizens regarding the rule of law situation in their country;
- Collecting primary data on the experiences of ordinary citizens about their experiences with authorities and the law;
- Collecting primary data about 1) the justice needs of the people, 2) the strategies they use to cope with their justiciable problems, 3) the issues they deal with when they use the formal and informal justice systems; and 4) their general opinions and attitudes about the justice systems;
- Collecting primary data on the experiences of inmates charged under the inquisitorial and the accusatorial systems;
- Using data in combination with data gathered by INL during the planning, implementation, and evaluation stages of justice sector programs to assess capacity, link inputs and potential outcomes, and ultimately help quantify the effects of INL programs and pilots;
- Transferring all collected data to INL/WHP in a user-friendly format that allows for easy analysis.

## **PROJECT OUTCOMES AND INDICATORS**

Expected outcomes from the INL-funded Polling Program include but are not limited to:

1. Every year the implementer will deliver a set of standardized country profiles that will feature the country's scores for each of the developed rule of law indicators;
2. During the first year of the grant period, the implementer will produce reports summarizing the findings of the primary data received from surveys or other data collection methods with the data gathered by INL during program implementation.

<b>Example of Indicators</b>	<b>Illustrative Targets</b>
Number of experts surveyed	A representative sample of surveys
Number of households surveyed	A representative sample of surveys
Number of inmates surveyed	A representative sample of surveys
Preparation of an annual report with standardize and comparative data	Submit one annual reports on rule of law findings nationally and for each individual country.

- Arrive electronically via Grants.gov by the designated due date and time noted in the NOFO. If reasonable accommodations are granted for persons with disabilities or for security reasons, applications must still be received by INL by the designated due date and time noted in the NOFO;
- Are in English and all costs are in U.S. dollars. If an original document within the application is in another language, an English translation must be provided. If any document is provided in both English and a foreign language, the English language version is the controlling version. *(Please note: the Department of State, as indicated in 2 CFR 200.111, requires that English is the official language of all award documents);*
- Heed all instructions contained in the NOFO, including length and completeness of application, including all required documents; and
- Do not violate any of the guidelines stated in the NOFO.

*It is the sole responsibility of the applicant to ensure that all of the documents submitted in the grant application package are complete, accurate, and current. INL strongly encourages all applicants, especially foreign or first-time applicants, to submit applications before the designated due date to ensure that the application has been received and is complete.*

## 9. NICRA, if applicable

- If your organization has a negotiated indirect cost rate agreement (NICRA) and will include NICRA charges in the budget, your latest NICRA must be included as a PDF file. This document will not be reviewed by the panelists, but rather used by program and grant staff if the submission is recommended for funding, and therefore does not count against the submission page limitations, as described above.
- If your proposal includes subgrants to organizations charging indirect costs, please submit the applicable NICRA also as a PDF file
- See “Indirect Cost Rate” below for more information on indirect cost rates
- If your organization **does not** have a negotiated indirect cost rate agreement (NICRA) please specify if your organization elects to charge the de Minimis rate of 10% of the Modified Total Direct Costs (MTDC). MTDC **excludes** equipment, capital expenditures, charges for patient care, rental costs, tuition remission, scholarships and fellowships, participant support costs and the portion of each subaward in excess of \$25,000.” The de Minimis rate must be included in the detailed budget and an explanation must be provided in the budget narrative.

**[END OF SECTION IV]**

## TAB A: PROPOSAL GUIDELINES

**Proposals should include the following components:**

- Introduction and Problem Statement
- Planned Activities
- Indicators

**Problem Statement and Rationale:** Describe the problem and how the project will achieve or contribute to achieving a sustainable solution and a measurable outcome. The applicant should explain the extent of existing assistance within the particular geographic area, and how the proposed intervention may complement (or differ from) other similar interventions. The implementer should also explain, as necessary, the particular experience and qualifications they bring to the project. The rationale should also reflect understanding of the priorities and policies of the bureau/post or program with which this agreement is associated.

**Planned Activities and Indicators:** Describe the planned activities, and relevant stakeholders for implementation. The implementer should highlight key stakeholders and their expected role in the project, along with any contingencies. The implementer should list assumptions that are dependent on the ultimate success of the project. This could include elements like geographic location, coordination efforts with other international organizations, or political will from host governments, private sector, and NGOs. As appropriate, limited contingency possibilities should be included in the proposal, in case the initial planning assumptions are not met. Example of a planned activity and contingency:

Planned Activity	Contingency
<i>Energy efficiency workshops in collaboration with the government of Mexico and other representatives from the Latin America region, focused on raising awareness of energy efficiency standards.</i>	<i>If government of Mexico doesn't engage at the expected level, project team will look to other regional stakeholders, such as the OAS, to assist in convening key stakeholders.</i>

In the proposal, there should be a clearly defined link between each of the following elements as delineated:

**Process Indicators** measure the activity that has been completed. Please delineate the specific activities to be conducted, such as workshops, roundtables, trainings, forums, exchanges, policy dialogues, etc. All indicators must include targets. Example of a process indicator:

<b>Process Indicator</b>	<i>50 women trained in energy efficiency standards</i>
--------------------------	--

**Output Indicators**, otherwise known as deliverables associated with the agreement, should be

included. Unlike process indicators, outputs are what is produced, and are often tangible. At this level, it is the measurement of ability, knowledge, skills, or access. All indicators must include targets. Example of an output indicator involving the same participants:

<b>Output Indicator</b>	<i>80 percent of participants demonstrate at least 75 percent cognizance of efficiency standards</i>
-------------------------	--

**Outcome Indicators** measure the change in system or behavior or practice. Expected outcomes are the results that come from a series of activities that are necessary to achieve impact. All indicators must include targets. Example of an outcome indicator:

<b>Outcome Indicator</b>	<i>30 percent of efficiency standards being implemented in a participant’s country as a result of participant’s participation.</i>
--------------------------	--

All indicators **must** include measurable, numerical targets, which should serve as the foundation for monitoring and evaluation efforts. Ultimately, proposed activities and achievement of indicator targets will lead to impact.

**TAB B: PROGRAM MONITORING AND EVALUATION PLAN, LOGIC MODEL, and PROGRAM RISK ANALYSIS**

INL will work with recipient organizations to implement the appropriate monitoring and evaluation plan that meets both the needs of the bureau and the implementing partner. Incorporating a well-designed monitoring and evaluation component into a project is one of the most efficient methods of documenting the progress and potential success of a program. Successful monitoring and evaluation depend on the following:

- Setting objectives that are specific, measurable, attainable, results-focused, and placed in a reasonable time frame (SMART);
- Linking project activities to stated objectives;
- Developing key performance indicators that measure realistic progress towards the objectives.

INL expects implementing organizations will track participants or partners as appropriate and be able to respond to key evaluation questions, including satisfaction with the program/training, information learned as a result of the program/training, changes in attitude and behavior as a result of the program, and effects of the program on institutions in which participants work or partner with. Applicants should include the monitoring and evaluation process in their timeline.

Recipients will be required to provide reports with an analysis and summary of their findings, both quantitative and qualitative, in their regular quarterly progress reports to INL.

Performance indicators should be clearly defined, and are in many cases quantifiable. Qualitative indicators are encouraged if they provide a reliable means to measure a particular phenomenon or

attribute. A good guide for determining the quality of performance indicators is the acronym SMART – i.e., are the indicators: specific, measureable, attainable, realistic, and timely.

Indicators can focus on (i) inputs / process (measures activities or the necessary components for an activity to occur—e.g. training curriculum developed), (ii) outputs (products and services delivered from project activities, and often stated as an amount—e.g. 100 civil society organization members trained in organizational fundraising, 60 radio programs produced), and (iii) outcomes (the specific results of a project, which are often measured as a degree of change—after receiving training on effective engagement in the political process, 40% of female participants ran for a seat in parliament).

## **LOGIC MODEL**

A logic model is a useful tool to help “map” a project. It details planned activities, the immediate services or product of project activities (outputs), and the expected changes or benefits that occur after activities have been implemented (outcomes). Applicants can specify objectives, identify what resources (inputs) are needed, outline proposed activities (outputs) and beneficiaries, and illustrate how activities lead to expected results. The activities and expected outcomes documented within the logic model should be achievable within the level of funding and timeframe of the project.

The monitoring and evaluation plan **must** include, at a minimum, the following elements:

- A results “Logic Model” planning document (see attached sample Logic Model template)
- Indicators, as described in Tab A, as well as details on how each indicator will be measured, frequency of the measurements, units of measure, etc. Provide indicators at the output and outcome levels. Monitoring and evaluation plans should include a chart component that clearly delineates indicators and targets. All indicators must include measurable, numerical targets. (see attached sample Monitoring and Evaluation template)
- Establish, where possible, performance baseline data and expected performance targets for each indicator/outcome. In some cases, the baseline may be zero.
- Describe monitoring and evaluation tools, including methods or methodology, that will be used.
- Plans should describe the projected outcomes and a dissemination plan where applicable, and how the project’s impact and effectiveness will be monitored and evaluated throughout the project.

**INL has included a sample Monitoring and Evaluation template and a Logic Model template as an attachment to the NOFO.**

## **PROGRAM RISK ANALYSIS**

Risks are unavoidable – all programs inherently contain both internal and external risks. However, with proper identification and management, risks can be prepared for, minimized or mitigated. The purpose of a risk analysis is to identify the internal and external risks associated with the proposed

program in the application, rate the likelihood of the risks, rate the potential impact of the risks on the program, and identify actions that could help mitigate the risks. A risk analysis should not be considered a one-time exercise or a static document. INL defers to organizations to conduct adequate risk analysis and remediation for all of its operations and advises that risk analysis and remediation occur throughout the life of a program and should result in revisions to risk analysis documents and processes as necessary. Applicants should include all assumptions and external factors identified in the logic model in the risk analysis. Applicants should rate the likelihood of a risk and potential impact of the risk as “High,” “Medium,” or “Low.” A sample template is provided as an attachment to this NOFO via [www.grants.gov](http://www.grants.gov).

The safety and security of recipients and beneficiaries are of utmost importance. INL requires all recipients to conduct thorough risk assessments and take all actions necessary in accordance with those assessments to mitigate those risks. INL does not take responsibility for the risks incurred by any recipient.

For more information about the Risk Analysis, please see 2 CFR 200.519.

## TAB C: BUDGET GUIDELINES

Applications will not be considered complete unless they include a budget that responds to the NOFO guidelines.

Complete budgets will include:

1. Summary Budget (that includes approved budget categories)
2. Detailed Line-Item Budget (outlining specific cost requirements for proposed activities)
3. Sub-implementer Budgets (if applicable)
4. Corresponding Budget Narrative (to clarify and justify individual line-items (i.e. calculations of how the costs were derived per month or year, their necessity, and overall contribution to the program's cost-effectiveness)).

All organizations, including those not offering any cost-sharing (cost share is not a requirement), should submit a detailed line-time budget, formatted to include three columns:

1. INL funding request,
2. Cost-share offered, and
3. Total project funding.

Please note: Implementers under INL-funded programs are responsible for complying with all applicable tax treaties and federal, state, and local laws on tax withholding and reporting for program participants.

**Before grants are awarded, INL reserves the right to reduce, revise, or increase proposal budgets in accordance with the needs of INL and availability of funds.**

The three-column proposal line item budget template is provided as an attachment in [www.grants.gov](http://www.grants.gov).

### **LINE-ITEM BUDGET NARRATIVE SAMPLE provided below–**

**A. Personnel** – Identify staffing requirements by each position title and brief description of duties. For clarity, please list the annual salary of each position, percentage of time and number of months devoted to the project. (e.g., Administrative Director: \$30,000/year x 25% x 8.5 months; calculation:  $\$30,000/12 = \$2,500 \times 25\% \times 8.5 \text{ months} = \$5,312.$ )

**B. Fringe Benefits** - State benefit costs separately from salary costs and explain how benefits are computed for each category of employee - specify type and rate. Fringe benefit application must be consistent with organization's written policy.

**C. Travel** - Staff and any participant travel (Note: Staff refers to implementer staff only, and not sub-implementer staff or contractors):

1) international and/or domestic airfare - Please indicate origin and destination (country/city), number of travelers and unit cost per round trip

NOTE: All travel must be booked with economy class fares only. Applicants must explain differences in fares among travelers on the same routes. Note that all travel, where applicable,

must comply with the Fly America Act. For more information see <http://www.gsa.gov/portal/content/103191>.

2) in-country travel - Please indicate origin and destination (city), type of transportation, number of travelers and unit cost per traveler per trip.

3) per diem/maintenance: includes lodging, meals and incidentals for both participant and staff travel. Rates of maximum allowances for U.S. and foreign travel are available from the following website: <http://www.policyworks.gov/>. Per diem rates may not exceed the published U.S. government allowance rates; however, institutions may use per diem rates lower than official government rates.

NOTE: Per diem rates must be prorated and/or removed if applicant will pay for refreshments and/or meals for participants during a workshop/conference.

**D. Equipment** – Equipment is defined as an item with a per-unit cost of \$5,000 or more and a service life of more than one year. If the item meets these criteria, all federal procurement policies and procedures must be followed. If an item does not meet these criteria, it should be considered a supply and listed under cost category E. Please provide justification for any equipment purchase/rental in the budget narrative.

**E. Supplies** - list items separately using unit costs (and the percentage of each unit cost being charged to the grant) for photocopying, postage, telephone/fax, printing, and office supplies (e.g., Telephone: \$50/month x 50% = \$25/month x 12 months).

**F. Contractual** –

a) **Subgrants** - For each subgrant, please provide a detailed line-item breakdown explaining specific services in a separate tab in the excel workbook. Subgrant budgets should include the same level of detail for personnel, fringe benefits, travel, equipment, supplies, other direct costs, and indirect costs required of the direct applicant. If indirect costs are charged on a subgrant budget, please include the subimplementer's NICRA. Please note that a subimplementer who receives \$25,000 or more is required to have a UEI number.

b) **Consultant Fees** - For example lecture fees, honoraria, travel, and per diem for outside speakers or independent evaluators: list number of people and rates per day (e.g., 2 x \$150/day x 2 days). Consultant/outside expert fees/honoraria should be consistent with the level of experience and based on a fair market value. **(NOTE: 2020 Consultant Fees and Honorarium should NOT EXCEED \$680/day per person, effective January 1, 2020. The 2020 rates will apply to all NOFOs issued on/after January 1, 2020.)**

**G. Construction** – Due to the nature of INL programs, construction costs are not allowable or applicable.

**H. Other Direct Costs** - these will vary depending on the nature of the project. The inclusion of items in this cost category should be justified in the budget narrative. All costs must be allowable, allocable, and reasonable, and consistent with OMB guidelines. Single audit or 2 CFR 200 Subpart F audit costs can be included if they are not part of indirect costs. Only the portion of an organizational audit cost associated with this project can be included in the budget. **Line items including justifications using words such as “Miscellaneous,” “Other,” “Etc.,” “Contingency Fund,” and “Reserve Fund” are not permitted.**

**I. Indirect Charges** -

An organization with a NICRA should include a copy of their negotiated indirect cost-rate agreement with their application. This document will not be reviewed by the panelists, but rather used by program and

grant staff if the submission is recommended for funding. As such, it does not count against the submission page limitations. Applicants should indicate in the proposal budget how the rate is applied (e.g. to direct administrative expenses, to all direct costs, to wages and salaries only, etc.) and if any of the rate will be cost-shared.

Per 2 CFR 200.414, any non-Federal entity that has never received a negotiated indirect cost rate, except for those non-Federal entities described in Appendix VII to Part 200—States and Local Government and Indian Tribe Indirect Cost Proposals, paragraph D.1.b, may elect to charge a de Minimis rate of 10% of modified total direct costs (MTDC) which may be used indefinitely. Per 2 CFR 200.68, MTDC means all direct salaries and wages, applicable fringe benefits, materials and supplies, services, travel, and up to the first \$25,000 of each subaward (regardless of the period of performance of the subaward). MTDC excludes equipment, capital expenditures, charges for patient care, rental costs, tuition reimbursement, scholarships and fellowships, participant support costs, and the portion of each subaward in excess of \$25,000. Other items may only be excluded when necessary to avoid a serious inequity in the distribution of indirect costs, and with the approval of the cognizant agency for indirect costs. The budget narrative should include a justification of the MTDC calculation, clearly describing which costs will be covered if using the 10% de Minimis indirect rate.

As described in 2 CFR 200.403, Factors Affecting Allowability of Costs, costs must be consistently charged as either indirect or direct costs, but may not be double charged or inconsistently charged as both. The elected methodology must be used consistently for all Federal awards until such time as a non-Federal entity chooses to negotiate for a rate, which the non-Federal entity may apply to do at any time.

Organizations not applying the de Minimis rate of up to 10% of MTDC but claiming indirect costs should have established NICRAs.

If the budget includes subawards, the recipient organization has the responsibility to honor an existing NICRA, negotiate an indirect rate, offer the 10% de Minimis, or allow costs to be directly charged to the sub-award budget for each sub-award, per 2 CFR 200.331.iiiiv.4. If an organization has an established NICRA the agreement should be submitted with the proposal package.

#### **J. Cost Share/Cost-Effectiveness -**

Cost-sharing is the portion of program costs not borne by the Federal Government. While not a competitive element, INL encourages (but does not require) cost sharing, which may take the form of allowable direct or indirect costs offered by the applicant and/or in-country partners. Applicants should consider all types of cost sharing, including in-kind and public-private partnerships. Examples include the use of office space owned by other entities; donated or borrowed supplies and equipment; (non-federal) sponsored travel costs; waived indirect costs; and project activities, translations, or consultations conducted by qualified volunteers. The values of offered cost-share should be reported in accordance with (the applicable cost principles outlined in) 2 CFR 200.306. Other United States federal funding does not constitute cost sharing.

Explanations of contributions should be included, whether cash or in-kind. Assign a monetary value in U.S. dollars to each in-kind contribution. If the proposed project is a component of a larger program, identify other funding sources and the specific funding amount to be provided by those sources. In addition, it is recommended that the budget narrative address the overall cost-effectiveness of the proposal, including leveraging of institutional or other resources.

Please note: INL programs do not require cost share, but if it is included the recipient must maintain written records to support all allowable costs that are claimed as its contribution to cost share, as well as costs to be paid by the Federal government. Such records are subject to audit. In the event the recipient does not meet the minimum amount of cost sharing as stipulated in the recipient's budget, INL's contribution may be reduced in proportion to the recipient's contribution.

For information on Shared Cost Allocations, please reference 2 CFR 200.405 [https://www.ecfr.gov/cgi-bin/retrieveECFR?gp=&SID=c8ac158b49a23a38aa04b1ba0bb242ee&mc=true&n=pt2.1.200&r=PART&ty=HTML#se2.1.200\\_1405](https://www.ecfr.gov/cgi-bin/retrieveECFR?gp=&SID=c8ac158b49a23a38aa04b1ba0bb242ee&mc=true&n=pt2.1.200&r=PART&ty=HTML#se2.1.200_1405).

## **BUDGET CONDITIONS AND RESTRICTIONS:**

The recipient is reminded that funds provided under this agreement must be used in a manner fully consistent with U.S. law. The recipient agrees that none of the funds provided by this award shall be used to lobby for or against abortion. The recipient agrees that none of the funds provided by this award shall be used to pay for the performance of abortion as a method of family planning or to motivate or coerce any person to practice abortions.

Per 2 CFR 200.307 ((e) (1), (2) and (3) of this section please note the following guidance concerning use of Program Income:

- Program income earned during the project period shall be retained by the recipient and, in accordance with the terms and conditions of the award, shall be used in one or more of the ways listed in the following:
  - 1) Added to funds committed to the project by the DOS and recipient and used to further eligible project or program objectives.
  - 2) Used to finance the non-Federal share of the project or program.
  - 3) Deducted from the total project or program allowable cost in determining the net allowable costs on which the Federal share of costs is based.

INL will consider budgeted line items for the following:

- External evaluations to assess the project's impact (costs must be built into the overall original budget proposal and must be reasonable);
- Costs associated with an internal evaluation conducted by the implementer (costs must be built into the overall original budget proposal and must be reasonable);
- Visa fees, immunizations, and medical insurance associated with program travel;
- A-133 Audit or internal audit for the INL program (or prorated costs that is shared among other Federal Assistance grants/contracts)
- English translation (cost must be built into the original budget proposal and must be reasonable)

The following cost elements **will not be reimbursed** and **are not allowable** in this program:

- Publication of materials for distribution within the United States that are not related to the project/program;
- Administration of a project that will make a profit;

- Expenses incurred before or after the specified dates of award period of performance (unless prior written approval is received by the INL Grants Officer);
- Projects designed to advocate policy views or positions of foreign governments or views of a particular political faction;
- Entertainment and/or alcoholic beverages;
- Costs of entertainment, including amusement, diversion, and social activities and any associated costs are unallowable, except where specific costs that might otherwise be considered entertainment have a programmatic purpose and are authorized either in the approved budget for the Federal award or with prior written approval of the Federal awarding agency;
- Land;
- Construction;
- Direct support or the appearance of direct support for individual or single-party electoral campaigns;
- Duplication of services immediately available through municipal, provincial, or national government;
- Expenses listed as “miscellaneous”, “other”, “etc.”, or “contingencies”;
- Expenses made prior to the approval of a proposal or unreasonable expenditures will not be reimbursed.

INL may make conditions and recommendations on proposals to enhance proposed programs. Conditions and recommendations are to be addressed by the applicant before approval of the award. To ensure effective use of INL funds, conditions or recommendations may include requests to increase, decrease, clarify and/or justify budget costs.

## **SECTION V – APPLICATION REVIEW INFORMATION**

The technical applications and proposal submissions will be evaluated in accordance with the Technical Evaluation Criteria set forth below. Technical evaluation of applications will be based on the extent and appropriateness of proposed approaches and feasibility of achieving the strategic objectives, in accordance with the following criteria.

If award is not made on the initial applications, INL may request clarification and supplemental materials from applicants whose applications have a reasonable chance of being selected for award. The entry into discussion is to be viewed as part of the evaluation process and shall not be deemed by INL or the applicants as indicative of a decision or commitment upon the part of INL to make an award to the applicants with whom discussions are being held.

### **I. TECHNICAL EVALUATION CRITERIA**

A technical evaluation committee, using the criteria shown in this Section, will evaluate the technical applications. The various functional elements of the technical criteria are assigned weighted scores, so that the applicants will know which areas require emphasis in the preparation of applications.

Where technical applications are considered essentially equal, cost may be the determining factor. Applicants should note that these criteria serve as the standard against which all applications will be evaluated and serve to identify the significant matters which applicants should address in their applications.

The relative importance of each criterion is indicated by the number of points assigned. A total of 100 points is possible.

## COST EVALUATION

Cost will be evaluated for realism, reasonableness, allowability, allocability, and cost effectiveness. The pre-award evaluation of cost effectiveness will include an examination of the application’s budget detail to ensure it is a realistic financial expression of the proposed project and does not contain estimated costs that may be unallocable, unreasonable, or unallowable. Applications that have more efficient operational systems that reduce operation costs will be favorably considered.

Applications that maximize direct activity costs including cost sharing and that minimize administrative costs are encouraged. Other considerations are the completeness of the application, adequacy of budget detail and consistency with elements of the technical application. In addition, the organization must demonstrate adequate financial management capability, to be measured by a responsibility determination.
