## **I. Program Description**

### **A. Short Description of Funding Opportunity**

The Defense Innovation Unit (DIU), Office of the Secretary of Defense, is interested in receiving proposals for its Defense Innovation OnRamp. DIU is building a unified Defense Innovation OnRamp, which will include Flagship DIU offices, physical presence via a distributed team, physical and digital OnRamp Hubs, and other relationships with the academic, startup, and commercial sectors to enable non-traditional, dual-use, and/or commercial technology companies to work with the Department of Defense to rapidly support warfighter needs.

### **B. Background**

The Defense Innovation Unit is focused on strengthening the national security innovation base by lowering the barriers to entry for talent and non-traditional companies to work with DoD. The Defense Innovation OnRamp is a core part of DIU's strategy to develop a robust regional presence in order to tap into the extant commercial technology ecosystems and innovation base. This strategy includes distributed DIU offices, a regional team, OnRamp Hubs, and other relationships with the academic, startup and commercial sectors. At present, DIU operates out of 5 regional offices, has approximately 30 regionally focused representatives, and partners with over 100 universities. In the last year, DIU, with extensive support from Congress, established five OnRamp Hubs in Phoenix, Arizona; Dayton, Ohio; Honolulu, Hawaii; Seattle, Washington, and Wichita, Kansas.

### **C. Program Description/Objective:**

The recipient(s) will design, develop and manage a network of offices, physical and digital hubs, and other collaborative partnerships and projects designed to lower the barriers for entry for commercial and dual-use technology into the DoD. This will involve collaboration between a diverse set of stakeholders including private industry, private capital, research organizations, government stakeholders, academia, regional economic development organizations, DoD mission partners, other government entities, and others, with the intent of sourcing, developing, and executing viable solutions that lower entry barriers while attracting and helping scale new commercial technology and talent into the national security innovation base. The recipient(s) sought for this NFO will provide direction to improve the ways in which non-traditional companies and talent can work with the Department of Defense and grow regional defense innovation ecosystems, and oversee the execution. These efforts should be aligned with the types of commercial and dual-use technology that DIU is bringing into the Department with the speed and scale required for strategic effect. DIU will expect recipient(s) of this award to provide infrastructure for the Defense Innovation OnRamp. This could include areas such as coordination, knowledge sharing, resource management, ensuring standardization of tools and governance, and conducting regular performance management for work through this effort. The recipient(s) will also oversee and/or coordinate projects led by other organizations that address barriers for working with DoD, and through that, enhance the national security innovation base through regionally-driven efforts. These will include the ability to oversee collaborative

initiatives and teams from DoD, industry, academia, government, and other key stakeholders; development of regional ecosystems; expertise in obtaining the necessary resources from DoD and industry resource sponsors; and public-private partnerships.

**History of the Program.** The Defense Innovation OnRamp is derived from Line of Effort (LOE) 4 of DIU's eight mutually reinforcing LOEs from the DIU 3.0 strategy, released in 2024 ([https://assets.ctfassets.net/3nanhbfkr0pc/256qmF1Vel2LnqvBQWrIgW/870427e52a4e072a5eb0c4c79923016/DIU\\_CNAS\\_3.0\\_Article\\_020724.pdf](https://assets.ctfassets.net/3nanhbfkr0pc/256qmF1Vel2LnqvBQWrIgW/870427e52a4e072a5eb0c4c79923016/DIU_CNAS_3.0_Article_020724.pdf)). The strategy combined disparate elements of DIU's regional presence, to include its budding OnRamp Hub program, the regional presence of its legacy National Security Innovation Network activity, and other components of DIU's presence across the country. The strategy also builds upon guidance from the Deputy Secretary of Defense to bolster the Department's regional presence in order to tap into technology ecosystems and identify ways to better connect developers from across the country. With congressional support, DIU launched 5 OnRamp Hubs in 2023 in Arizona, Hawaii, Kansas, Ohio and Washington State.

The Defense Innovation OnRamp is focused on building a robust presence across the US, to include Flagship DIU offices, a physical presence via a distributed team, OnRamp Hubs, and other relationships with the academic, startup and commercial sectors. This could include public-private partnerships. Currently, DIU has five offices and eight geographic regions, with a commensurately distributed team. Additionally, in the last year, DIU established five OnRamp Hubs in Phoenix, Arizona; Dayton, Ohio; Honolulu, Hawaii; Seattle, Washington, and Wichita, Kansas. DIU is planning to stand up additional Hubs in the next year, and to grow the types of activities and impact at these Hubs, as well as continue to optimize other regionally-driven efforts. The objective of the Defense Innovation OnRamp is to design, develop, and manage this network, while bringing in new, non-traditional solution providers to the Department of Defense. It does this by addressing barriers to entry, executing programming and challenges, and ultimately helping attract and scale companies and their technologies.

**Past Project Examples.** Samples of past Defense Innovation OnRamp activities and projects conducted include the following:

- Education for industry on DoD acquisition / procurement
- Facilitation of DoD industry engagement - industry interactions, to include by hosting convening events, technology showcases, and match making opportunities
- Host for execution of strategic projects and programming
- Operation of collaboration spaces
- Exposure to funders (investment & educational)
- Mentoring for industry
- Evaluation of solution TRL/MRL
- Tech/IP protection training
- Deployment / access to cloud-based tools
- Advertising talent opportunities within DoD

- Linking university innovation efforts (to include but not limited to those run by DIU Talent Programming) to DoD efforts
- Advancing the maturation of regional innovation ecosystems

The authorization to make awards under this funding opportunity may be found via the Assistance Listing Number 12.599 on [SAM.gov](https://sam.gov).

#### E. Legal Requirements

The cooperative agreement awarded under this announcement will be governed by the general terms and conditions in effect at the time of the award that conform to DoD's implementation of OMB guidance applicable to financial assistance in 2 CFR 200, "Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards," as implemented by 2 CFR 1100. Additionally, the requirements of the DoD Grant and Agreement Regulations at 32 CFR Subchapter C are applicable to this grant. These terms and conditions are incorporated by reference in this announcement.

## II. Federal Award Information

The following information applies to awards issued under this announcement:

Single Award Anticipated: At present, it is anticipated only one award will be made as a result of this announcement, however, this could change to meet DoD priorities.

Anticipated Range of Individual Award Amounts: The Government anticipates making an initial estimated award of at least \$30-40M for the first year, with the possibility of additional funding in later years.

Anticipated Period of Performance: The anticipated period of performance is five years.

#### Instrument Type:

The type of funding instrument selected by the government is planned to be a cooperative agreement. Award type and funding arrangements are at the discretion of the government. Collaborations or sub-awards with different entities are allowable. The government reserves the right to accept only portions of an application and to negotiate potential awards.

## III. Eligibility Information

#### A. Eligible Applicants

1. For the anticipated cooperative agreement, only U.S. organizations are eligible.

The applicant must be registered in the System for Award Management (SAM) before submission of applications. Information on SAM registration is available at <https://sam.gov/content/entity-registration>. The applicant must provide a valid unique entity identifier on their application. The applicant must continue to maintain an active SAM registration with current information at all times during which it has an active Federal award or an application or plan under consideration by a federal awarding agency. Washington Headquarters Services (WHS) may not make a federal award to the applicant until the applicant has complied with all applicable unique entity identifier and SAM requirements.

Disclosures of current and pending support made in this application may render an applicant ineligible for funding. Prior to award and throughout the period of performance, DoD may continue to request updated continuing and pending support information, which will be reviewed and may result in discontinuation of funding.

## B. Cost Sharing or Matching

Cost Sharing is not required.

## C. Conflict of Interest

The organization must disclose any potential or actual scientific or nonscientific conflicts of interest and must also disclose any potential or actual conflict(s) of interest for any identified sub recipient included in the application. These conflicts could arise based on current and previous partnerships and programs that the applicant may be or have been a part of that conflict with DoD partnerships and programs. These can be addressed on a case by case basis and the Government may follow-up with questions to make a determination.

Depending on the circumstances, the Government may request a conflict of interest mitigation plan. The plan must be approved by the Government. Conflicts of interest which are unable to be mitigated will result in an applicant being deemed ineligible for award.

## D. Other

### a) Licensure or Certification

The proposal must include the Acknowledgment of Support and Disclaimer on all materials created or produced under the awards. This language may be found in the Terms and Conditions included in the award documents.

#### i. Certifications, representations, and assurances

Funding Restrictions: DoD will only fund salary, fringe benefits and indirect costs on awards under the announcement. Funds from an award may not be used to attain fee or profit.

## V. Application Review Information

### A. Selection Criteria

Technical merit and relevance to the DoD mission will be used to evaluate applications. The standards identified in 32 CFR 22.415 will be used to assess the recipient's qualifications. The government may engage with offerors individually to ask technical questions and negotiate changes to the applications.

### B. Review and Selection Process:

Employees of commercial firms under contract to the Government may be used to administratively process applications. By submitting an application, the applicant consents to allowing access to its application(s) by support contractors. These support contracts include nondisclosure agreements prohibiting their contractor employees from disclosing any information submitted by applicants.

The government will conduct reviews of the technical proposal as well as conduct a budget review and a risk review as directed by 2 CFR 200.206. This will include a review of the Federal Awardee Performance and Integrity Information System (FAPIIS). The applicant may review information in FAPIIS and comment on any information entered into that system. Comments made by applicants will be taken into account in addition to other information in considering applicants' integrity, business ethics, and record of performance.

At the time of application, there is no additional material to be submitted for this review. However, there may be additional requests for clarification as these reviews progress.

**C. Anticipated Announcement and Federal Award Dates:**

Decisions are expected to be announced via email.

## **VI. Federal Award Administration Information**

### **A. FEDERAL AWARD NOTICES**

The government will notify the recipient of the award via email. The notification e-mail regarding a selection is not authorization to commit or expend DoD funds. A DoD grants officer is the only person authorized to obligate and approve the use of Federal funds. This authorization is in the form of a signed Notice of Award. After selection but prior to award, the government may request additional information. This may include representations and certifications, revised budgets or budget explanations, or other information as applicable to the proposed award. The award start date will be determined after successfully coordinating all pre-award requirements.
